How to add a new Custom Dimension (with attributes)

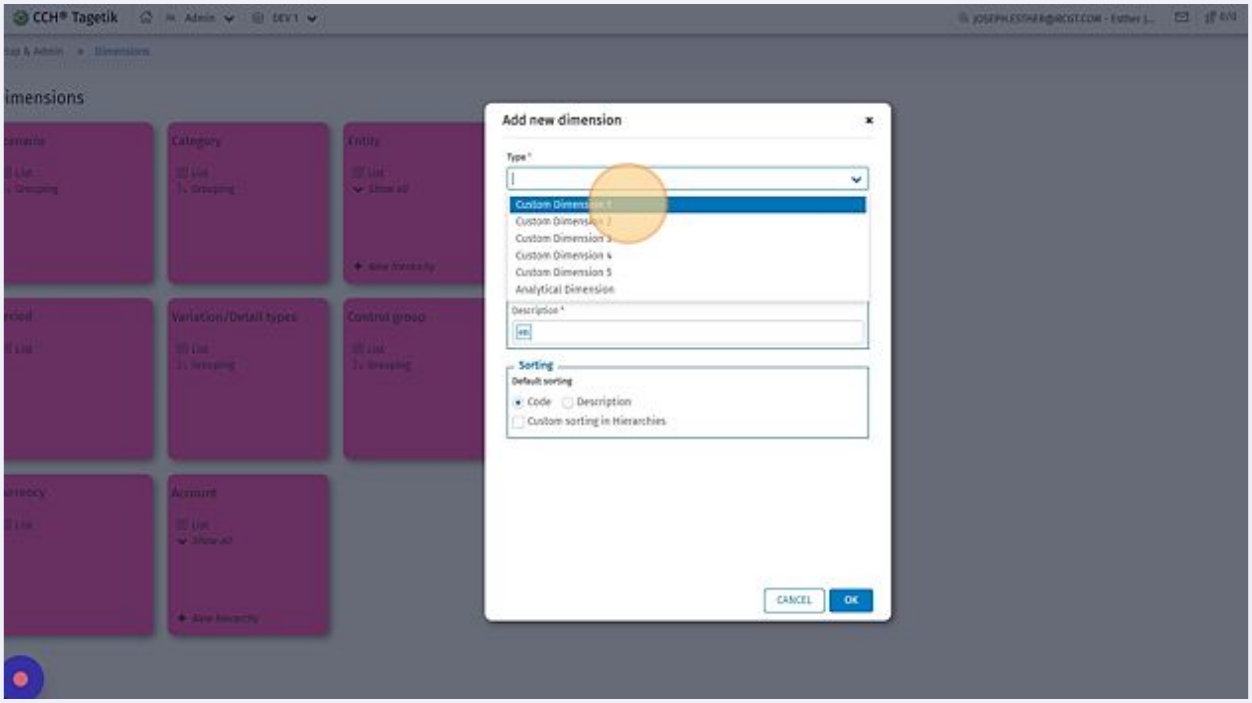

1 Click on "New Dimension"

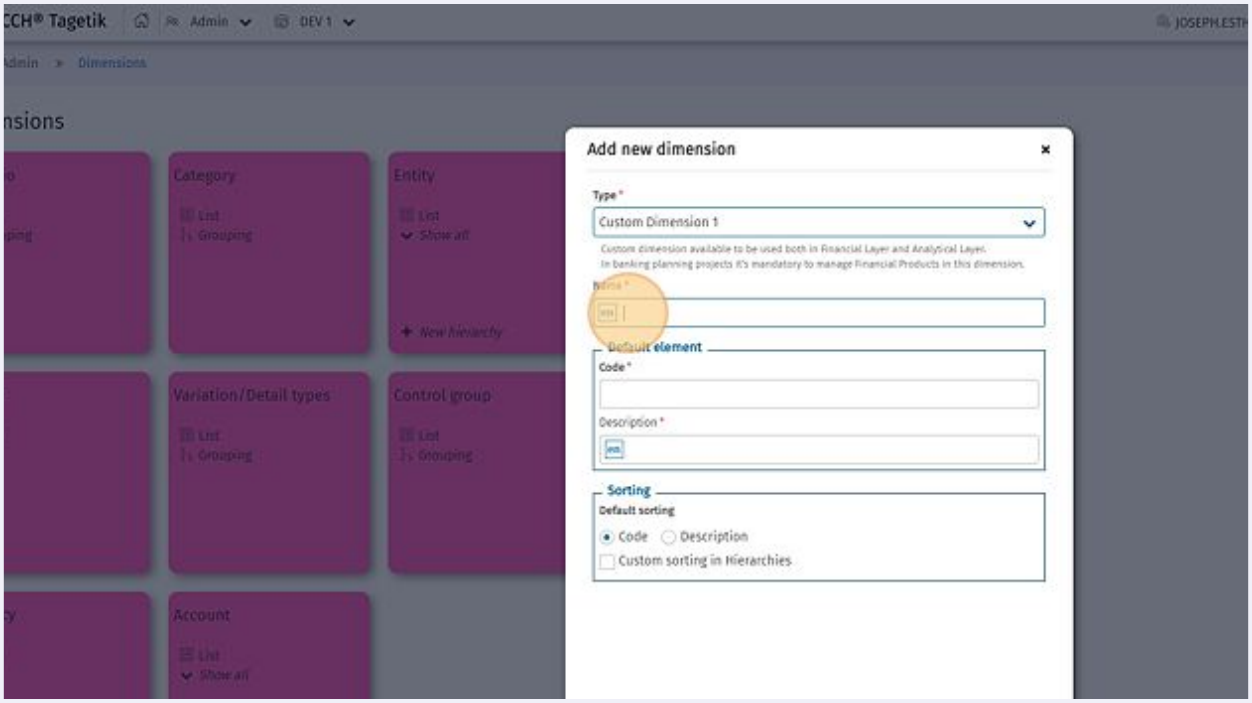

2 Select the Type of Dimension

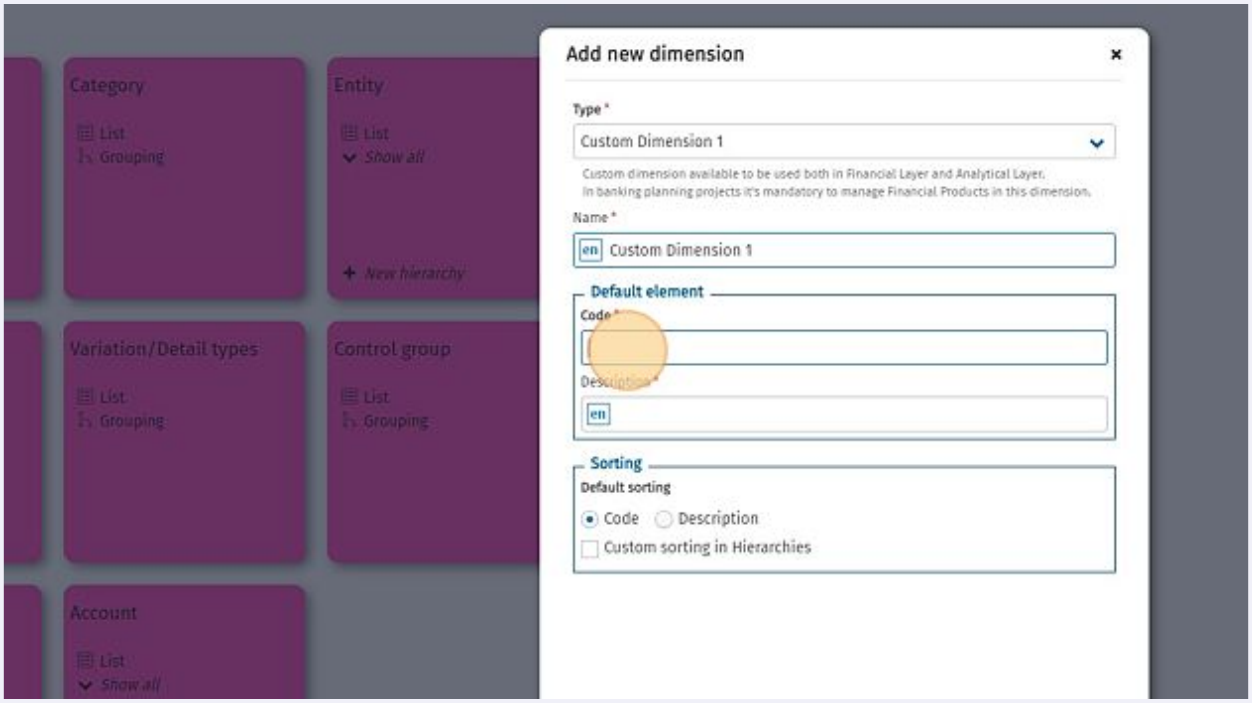

3 In this example, we are selecting "Custom Dimension 1"

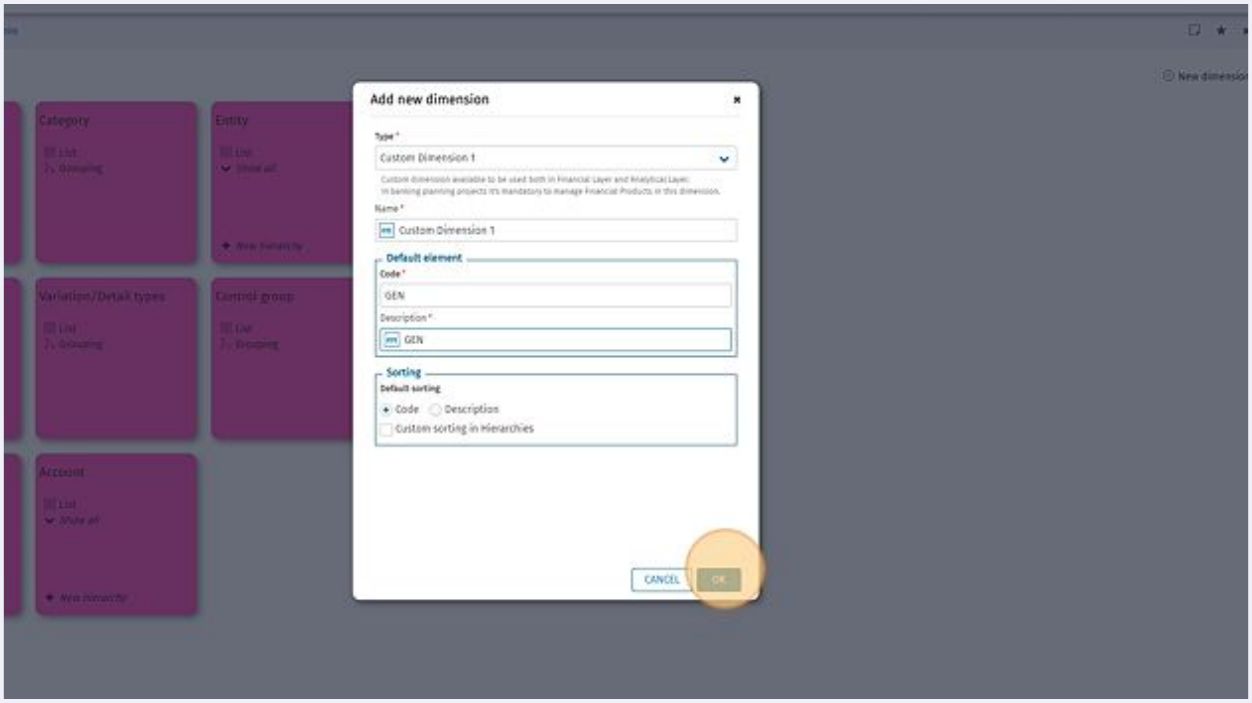

4 Name the dimension and add a default Element.

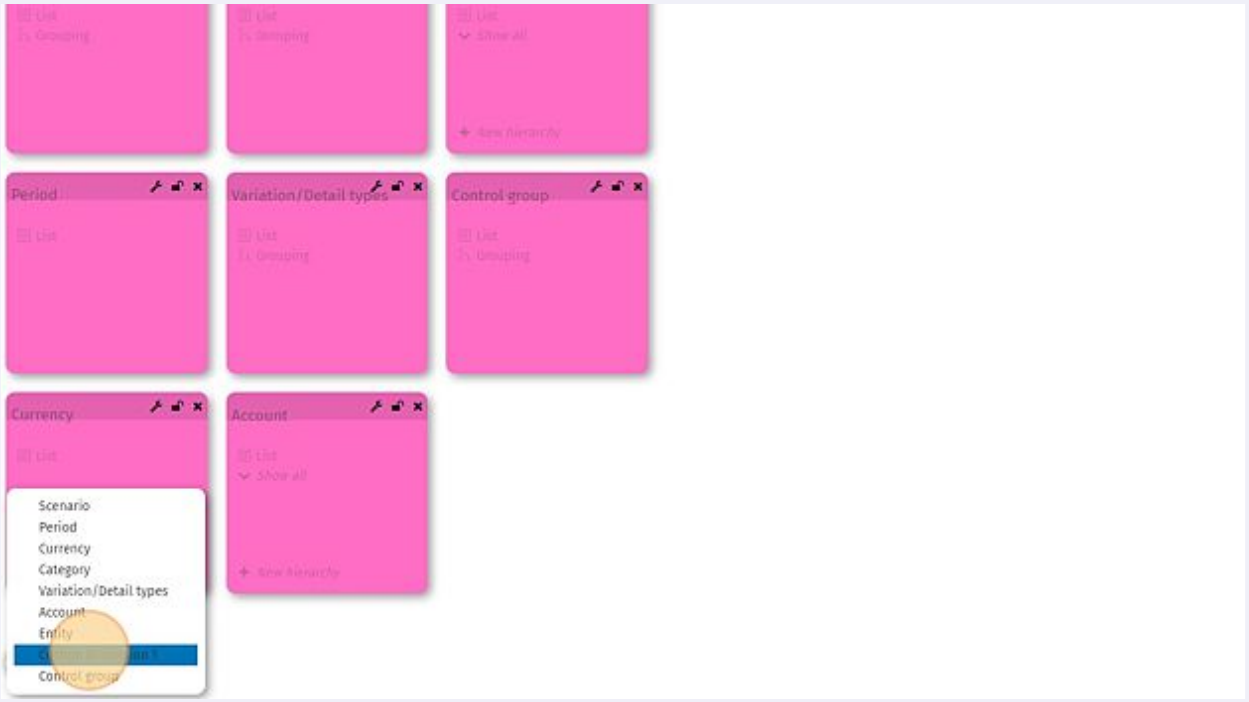

5 Add Code and Description of the default element.

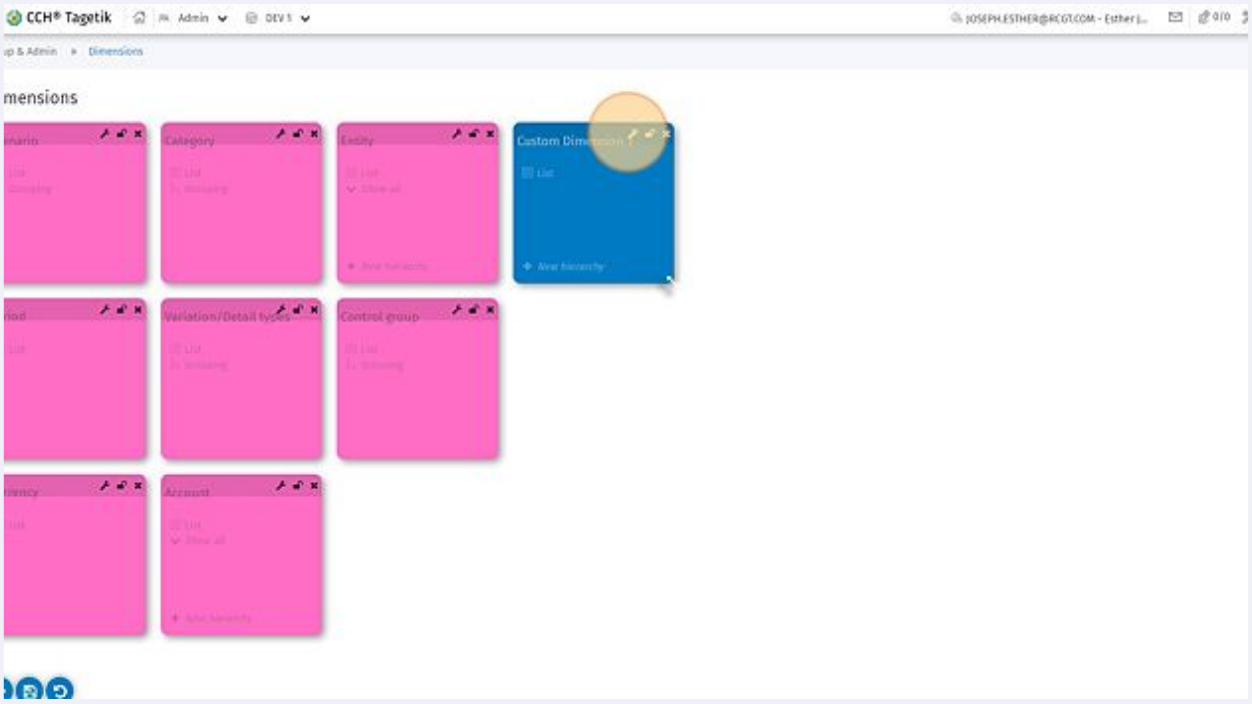

6 The set-up is then complete.

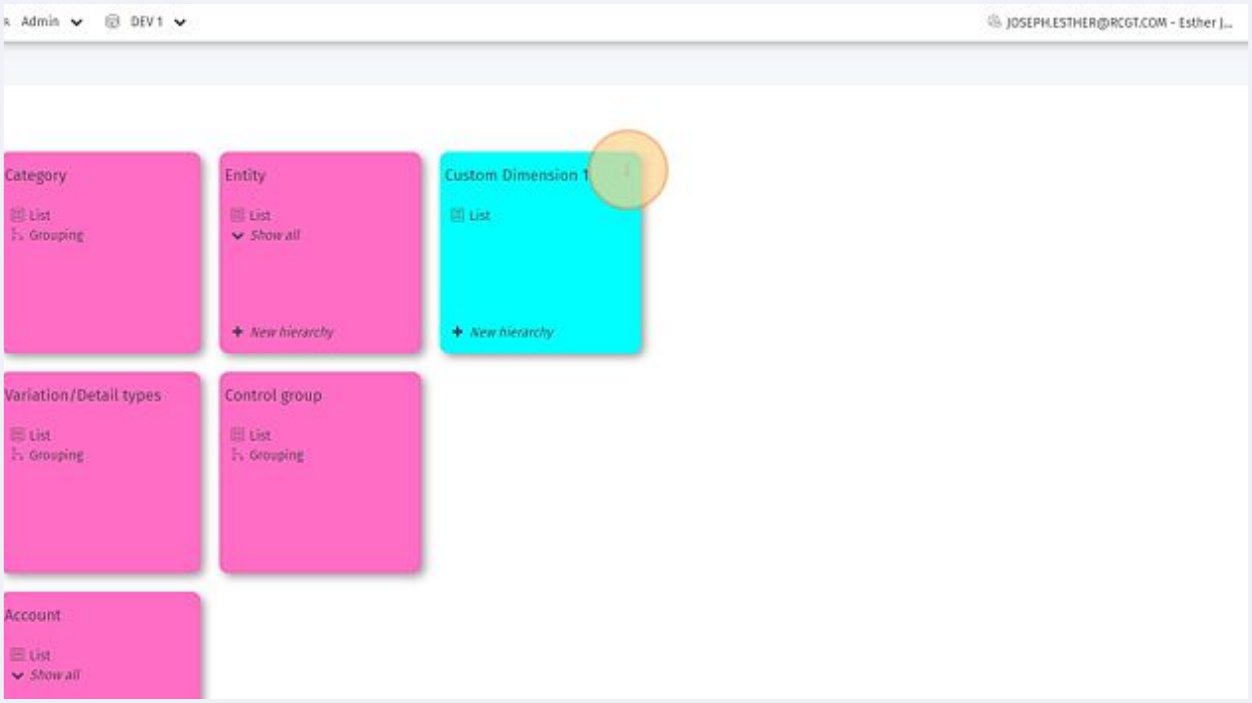

7 To make the new dimension visible, click on the Pencil on the Bottom left of the screen and select the newly created dimension.

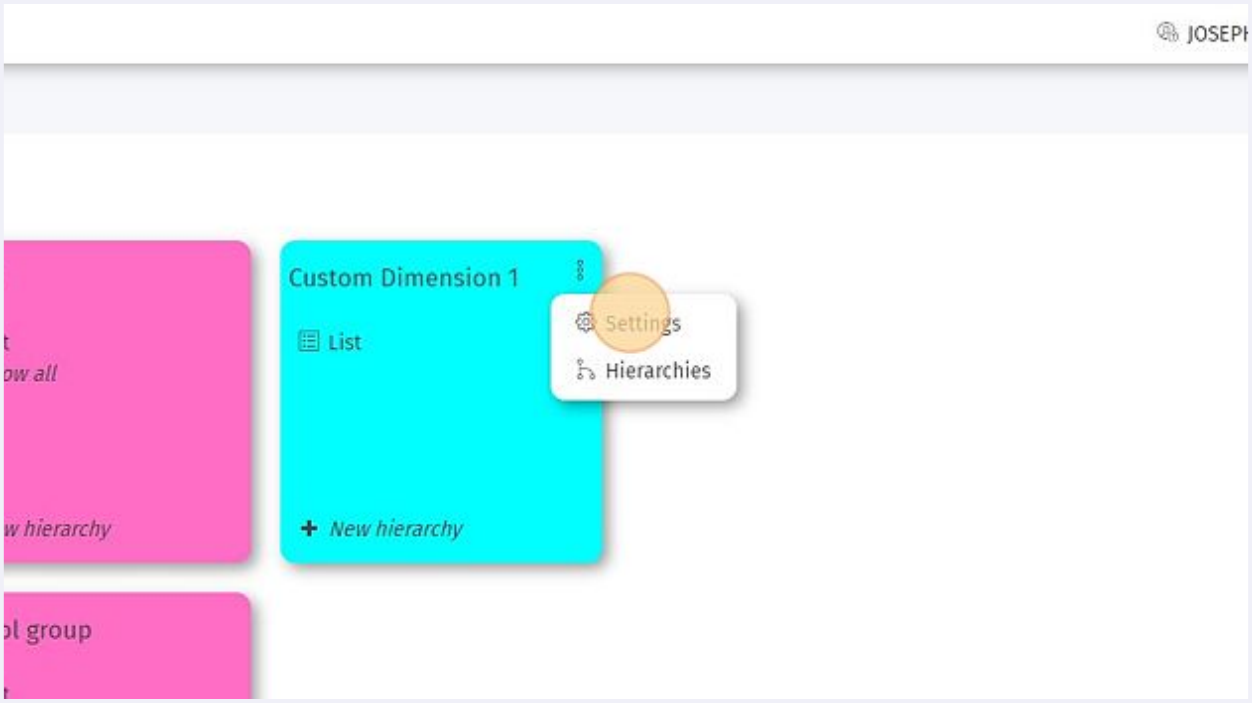

8 Click on the save icon and the set up is complete. The colour can be customised.

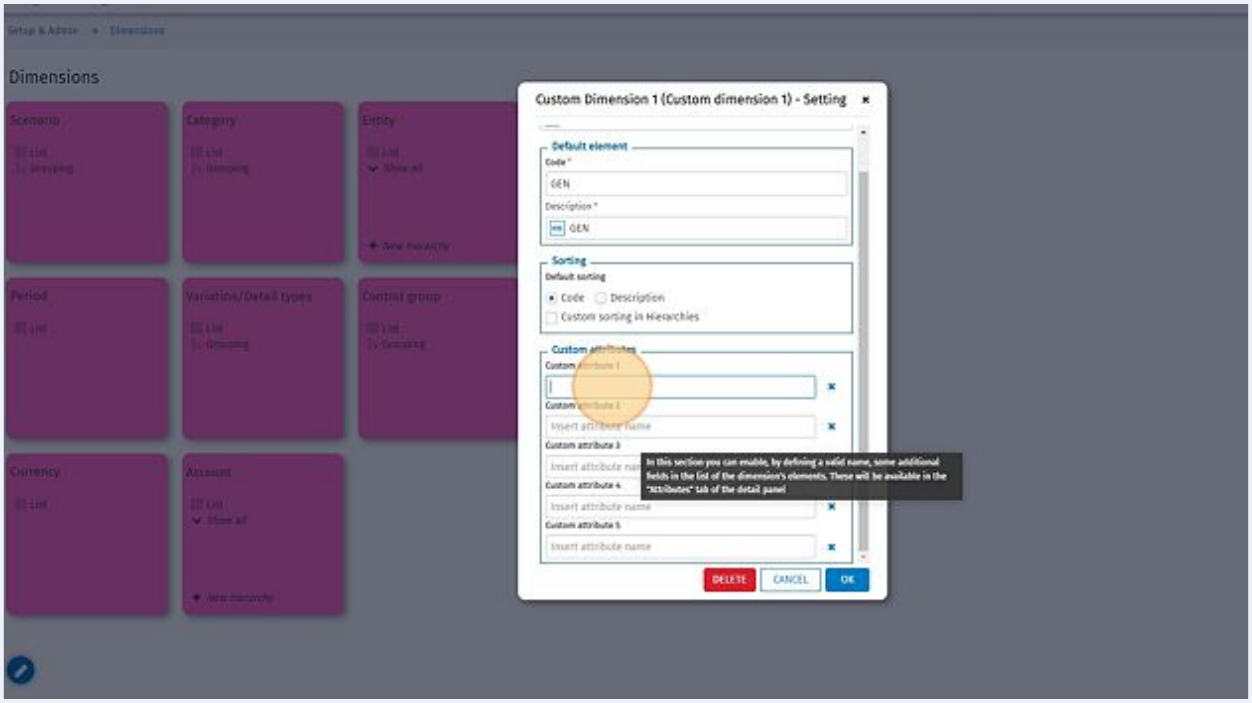

9 Once the initial set-up is done, you can click on the settings again and add attibutes.

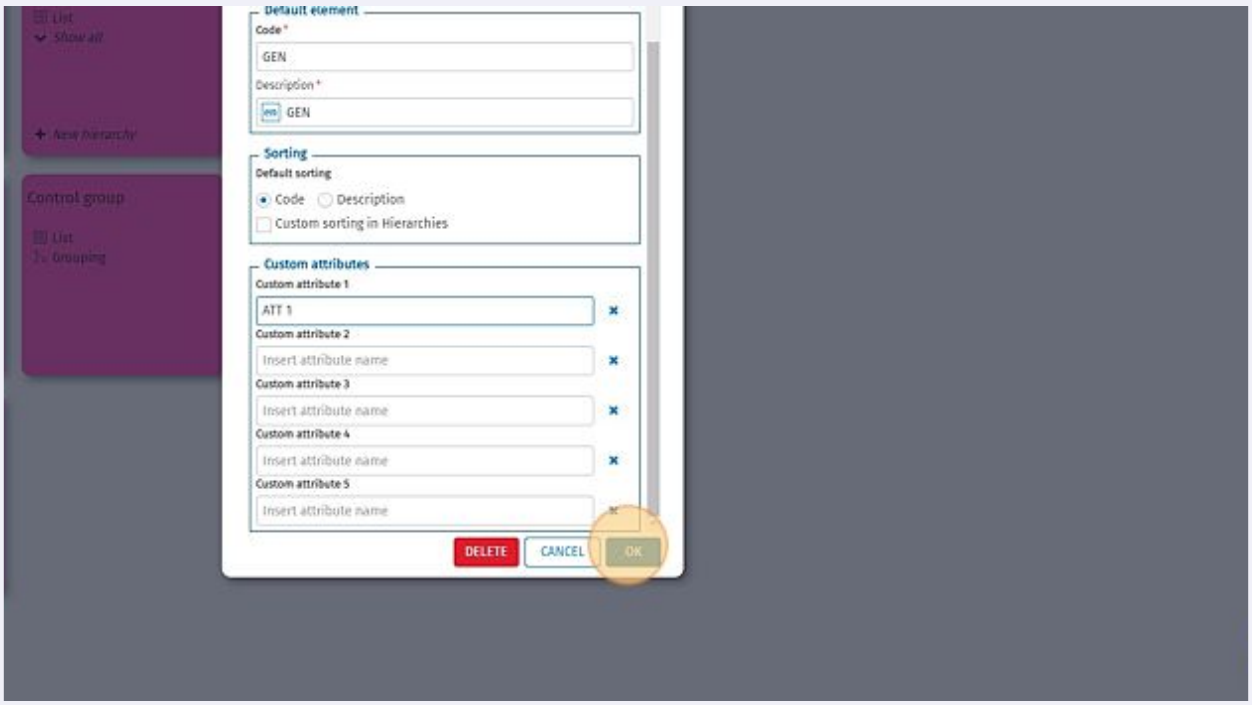

10 Click on settings.

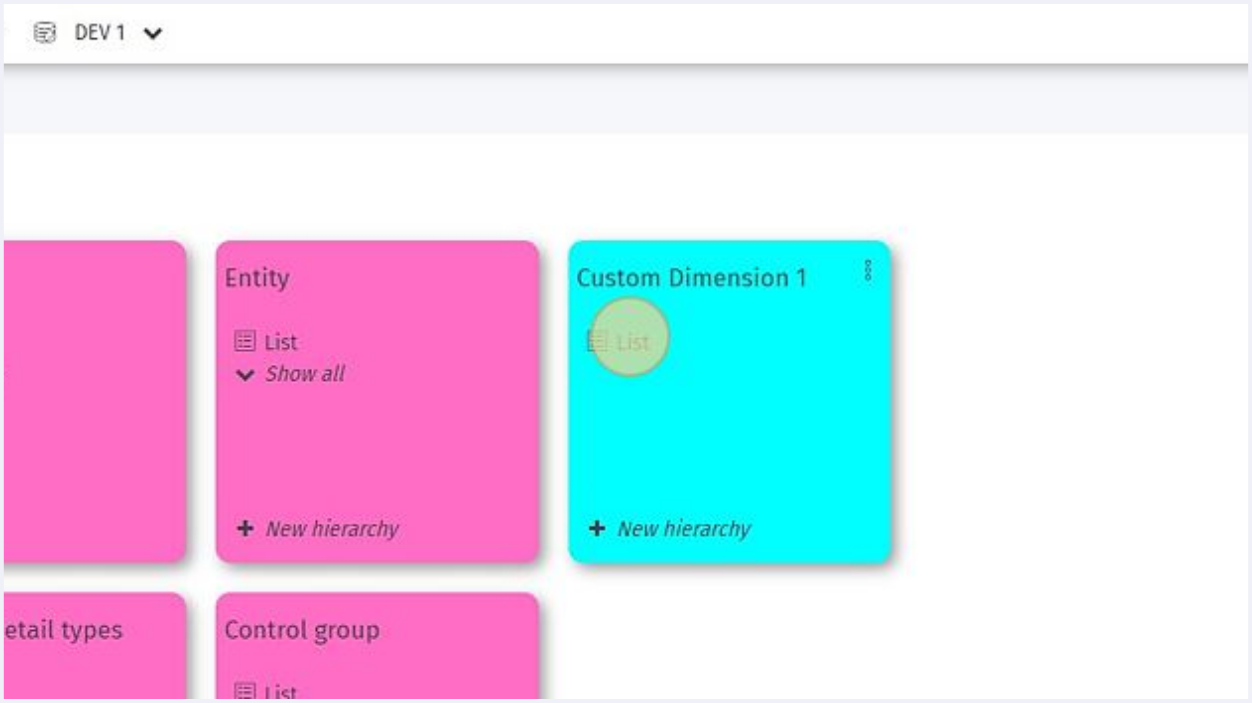

11 Add attribute title.

12 Click on "OK" to save.

13 Check that the default base element was added and that the attribute is open.

14 The default element and the new attribute should be created.
