EXERCISE 1 - Interface overview

Objective	Learning how to familiarize yourself with the CCH Tagetik web interface
Tasks How to access CCH Tagetik check Admin interface. Check Admin and End-user interface	Perform the following tasks: 1. Click the Tagetik 5 shortcut on the desktop and log into the CCH Tagetik web interface as • User: **Emperor** • Password: **tgk** 2. Bear in mind that the password is case sensitive while the user is not. 3. Check on the CCH Tagetik taskbar that the user is logged into the **Academy** database. 4. Click the icon of user **EMPEROR** on the CCH Tagetik taskbar. 5. Select **Settings** from the menu and learn how to manage user settings. 6. Click the icon of user EMPEROR on the CCH Tagetik taskbar. 7. Select **Download** and take notes of the possible download in the list of Utility and Documentation. 8. Access the **User manual** by clicking the related icon. 9. Check the Tree general menu by clicking  and learn how to navigate the tree. 10. Remember that the password is case sensitive

EXERCISE 2 - Scenario/Period

Objective

Learn how to:

- check the existing periods in the environment.
- create and parametrize a new scenario.

Tasks

Check periods

Perform the following tasks:

1. Access **Dimensions** tile from the homepage.
2. Access Period list by clicking the button **List** on the tile **Period**.
3. Check the Periods are already in place.

Tasks

Create a new scenario and generate the related periods automatically

Perform the following tasks:

1. Open the file **Actual invoices 2051.xlsx** below Workshops\Datamodel
2. Check the values into the column **INVOICE DATE** and remember that to translate the information of those dates it is necessary open a Scenario with 12 periods.
3. Access the Scenario List
4. Add a new Scenario by clicking button ⊕ and fill the following attributes:
   - Code: **2051ACT**
   - Description: **2051 Actual**
   - Version description: **Actual**
   - Year: **2051**
5. In the **Opening periods** area select:
   - Start date: **1/1/2051**
   - Number of months type: **Monthly**
6. Save.

7. Select the just created Scenario.
8. Access the list of periods related to the scenario by clicking action menu  and selecting **Periods**.
9. Check the 12 periods related to the scenario 2051ACT and their attributes.

EXERCISE 3 - Currencies

Objective

Learn how to:

- Create and parametrize a new currency
- Import FX rates for a given scenario

Tasks

Perform the following tasks:

Create a new currency

1. Reach the Currencies elements clicking **List** on the Currency tile .
2. Check **Euro** is set as preferred currency.
3. Open the file **Actual invoices 2051.xlsx** and check that the **MXN -Mexican Peso** is not included in the currency list.
4. Create a new currency:
    - Code: **MXN**
    - Description: **Mexican Peso**
    - Decimal numbers: **2**

Tasks

Perform the following tasks:

Create a new reference currency

1. Create a new Currency in order to use it as Reference currency of the Japanese Yen
    - Code: **JPY_K**
    - Description: **Japanese Yen Thousands**
2. Access the **Reference currency settings** area and set the attributes:
    - Reference currency: **JPY**
    - Reference Currency Coefficent: **1000**

Tasks	Perform the following tasks:
FX rates loading - Learn how to use import-export feature	1. Go back to CCH Tagetik homepage. 2. Click the **Rates** tile. 3. Select **FX Rates** to access FX Rates window. 4. Click on  . The system will download a special xlsx file that will be used to load new FX rates. 5. Open the file **FX_Rates.xlsx** below **Workshops\Datamodel** 6. Copy the area with the values (exclude the headers). 7. Open the import-export file. 8. Paste the elements into the Import-Export file in the correct columns. **Paste values** is the suggested option to avoid formatting issues. 9. Save the Import-Export file with the added elements. 10. Reach the FX Rates window. 11. Click on Import  . 12. Select the Import-Export file. 13. The Import/Export feature has imported 60 new items.

EXERCISE 4 - CCH Tagetik Windows: Pro tips

Objective	Learn how to use the available features of the CCH Tagetik windows

Tasks	Perform the following tasks:
Filter and order elements	1. Access the **FX Rates** window from the homepage. 2. Click button  to enable the application of filters to the displayed data. 3. Apply the following filters: • Scenario: **2051ACT - 2051 Actual** • Currency: **MXN - Mexican Peso** 4. Operator must be set as **equal** for both filters. 5. Click **Apply**. 6. The windows display 12 items. 7. Click on the header of the column **Period** to order the elements in ascendant or descendant mode of the Period values. Ordering feature is available on each column.

Tasks	Perform the following tasks:
Add, clone,edit elements	1. Select the row with period **12 - December**. 2. Change the attribute **Average FX** rate into **0.053**. 3. Select the row with period **11 - November** and clone it clicking  4. Fill the missing values in the cloned item: • Scenario: **2051BDG - 2051 Budget**

- Period: **11 - November**
- Currency: **MXN - Mexican Peso**

5. Click on Multiple edit .
6. Tick the items with periods **01- January, 02 - February, 03 - March** .
7. Remove **Multiple values** from the attribute **Average FX rate** and insert the new value **0.048**.
8. Click the Multiple edit icon to go back to the original view.
9. Click the Toggle Edit in grid mode .
10. Double click in grid the value of **Average FX rate** related to the item with Period **04 - April** and change the related value to **0.051.**
11. Save.
12. Click again the toggle Edit in grid mode to go back to the original view.
13. Click **Remove filters** button to display the entire list of elements.

Tasks **Columns management, Preferences, Notes**	Perform the following tasks: 1. Click Columns management . 2. Click the button next to **Origin**, **User Upd**, **Date Upd** to show the related columns. 3. Change the order of the column displayed dragging and dropping the name of the column: move **User Upd** as first column displayed. 4. Apply the following filter to display the rows loaded from user EMPEROR: - User Upd: **EMPEROR**

- Operator: **equal**

5. Click **Apply**.
6. Click  on the top right of the window bar.
7. Save Preferences.
8. Close and reopen the FX Rates window.
9. Check that the windows is displayed with the saved preferences.
10. Click  .
11. Restore preferences.
12. Close and reopen FX rates window.
13. Now the windows is displayed with the original shape.
14. Click on  .
15. Add the following Notes : **Update FX rates every month**.
16. Save.

EXERCISE 5 - Entities

Objective	Learn how to Create and parametrize a new entity
Tasks	Perform the following tasks:
Create a new Entity	1. Open the file **Actual invoices 2051.xlsx** below **Workshops\Datamodel**. 2. Access Dimension tile from homepage. 3. Open Entity list by clicking on **List** of the Entity tile. 4. Check that in the Actual invoice 2051 file there is a row that include the entity **D01 - Canistracci Oil**. This entity is missing from the list. 5. Add a new entity by clicking ⊕ • Code: **D01** • Description: **Canistracci oil** • Currency: **EUR - Euro** 6. Save

EXERCISE 6 - Accounts

Objective	Learn how to create and parametrize a new account
Tasks	Perform the following tasks:
Account creation	1. Open the file **Actual invoices 2051.xlsx** below Workshops\Datamodel. 2. Access dimension tile from homepage. 3. Open Account list by clicking List on accounts tile. 4. Check that in **Actual invoices 2051.xlsx** there is a missing account: 5. Select the account **50010 - Product revenues** 6. Clone the account by clicking  7. Set the following attributes. • Code: **50013** • Description: **Actual revenues** • Nature: **Profit & loss** • Account type: **Normal** • Conversion: **P&L FX rate** 8. Save.

EXERCISE 7 - Analytical dimensions

Objective	Learn how to create an Analytical dimension
Tasks • Load elements by Import/Export feature • Create a new Analytical dimension	Perform the following tasks: 1. Access **Dimensions** homepage. 2. Click button ⊕ New dimension to add a new Analytical dimension . 3. Add the following attributes • Type: **Analytical dimension** • Analytical dimension label: **SKU** • Name: **SKU** • Default element code: **GEN** • Default element description: **GEN** 4. Click **OK**. 5. Add a tile for the new Analytical dimension: 1. Click  2. Click  3. Select **SKU.** 4. Select a color to customize the tile. 5. Click  6. Import the list of SKU by import-Export tool. The SKU list is in the file **Sku.xlsx** below Workshops\Data modeling

EXERCISE 8 - Aggregation structure management

Objective

- Learn to manage and maintain hierarchies and grouping

Tasks

Perform the following tasks:

Hierarchy maintenance

1. Click **Show all** on the Entity tile to expand the existing hierarchies.
2. Click **Geographical view** to access its structure.
3. Navigate the hierarchy tree to check existing nodes and their lowest level elements.
4. Click on **Unrelated elements**.
5. Select **D01 - Canistracci oil** to relate the element to a node.
6. Drag and drop the element within **X01 - Southern Europe** node.
7. Select the node **X01 - Southern Europe**.
8. Select the just related entity **D01 - Canistracci oil**.
9. Reach **Relationships** tab to relate the element to another existing entity hierarchy.
10. Click ⊕
11. Relate **D01 - Canistracci oil** to
    - Hierarchy: **02 - Actual view**
    - Node: **A - Subgroup A**
12. Add a new entity in the **X01 - Southern Europe** node by clicking
    - Code: **D02**
    - Entity: **Quiller Inc.**
    - Currency: **EUR - Euro**

13. Save

Tasks

Perform the following tasks:

Grouping maintenance

1. Select **Grouping** from **Scenario** tile.
2. Navigate the grouping, then select the node **$ORIGINAL - Original Scenarios.**
3. Add a node by clicking  .
    - Code: **2051**
    - Description: **2051 Scenarios**
4. Select **All elements** on the left tree
5. Select scenario **2051ACT - 2051 Actual.**
6. Reach relationships tab
7. Click  and add a relationship with node **2051**
8. Click again  and add a relationship with node **ACT**.
9. In a grouping you can it have an element related to different nodes.
10. Save.
11. Select node **ACT** and then node **2051** to check that **2051ACT - 2051 Actual** is related correctly.

EXERCISE 9 - Hierarchy creation

Objective	Learn how to create a hierarchy via Import/Export

Tasks

- Create the header of hierarchy
- Create the hierarchy nodes

Perform the following tasks:

1. Reach Customer tile and add a **New hierarchy**.
   - Hierarchy code: **01**
   - Description: **Customer by size**
   - Root: **X00**
2. Save.
3. Click the Actions menu and select Structure and relationships
4. Click **Switch view** hyperlink on the top left of the window.
5. Select **Structure**.
6. Click Export to import and open the Excel file downloaded.
7. Open the file **Customer by size.xlsx** below **Workshops\Datamodel**
8. Reach the tab **Nodes**.
9. Copy the elements excluding the headers.
10. Paste values on Import/Export Excel file.
11. Import the Import/Export Excel file by clicking inside hierarchy Structure window.
12. Close the window and check the recently created structure of the hierarchy.

Tasks

Create the hierarchy relationships

Perform the following tasks:

1. Go back to the Structure and relationship window of the hierarchy **Customer by size**.
2. Click on **Switch view**.

3. Select **Element/node relationships**.
4. Click on Export to import and open the Excel file downloaded.
5. Open the file Customer by size.xlsx below Workshops\Datamodel
6. Reach the tab **Relationships.**
7. Copy the elements excluding the headers.
8. Paste values on Import/Export Excel file.
9. Import the Import/Export Excel file by clicking inside hierarchy Element/Node relationships window.
10. Close the window and check the final structure of the hierarchy **Customer by size**.

EXERCISE 10 - Analytical Workspace and Dataset creation

Objective	Learn how to create the structure of a dataset.

Tasks	Perform the following tasks:
AW and Dataset creation	1. On the Admin homepage, click **Analytical workspaces** tile to reach the analytical workspace homepage. 2. Click the button ⊕ New Workspace on the top right of the window to add a new analytical workspace • Description: **Data model test** 3. Click the icon  4. Click the icon  5. Select the AW **Data model test** to pin the workspace to the analytical workspace homepage. 6. Upload an image by clicking **Choose file** and selecting **AW icon.jpg** below Workshop\Datamodel. 7. Click the icon  8. Access the AW **Data model test**. 9. Click the button ⊕ New dataset on the top right of the dataset homepage to create a new dataset. 10. Set the description as **New Dataset** and click **Ok**.

Tasks	Perform the following tasks:
Fields definition	1. Access the structure of the dataset **New Dataset** by clicking the related tile. 2. Drag and drop the following dimensions that represent fields/columns: • Scenario

- Label: SCENARIO
- Description: Scenario

- Period
  - Label: PERIOD
  - Description: Period
- Entity
  - Label: ENTITY
  - Description: Entity
- Currency
  - Label: CURRENCY
  - Description: Currency
- Account
  - Label: ACCOUNT
  - Description: Account
- Cost Center
  - Label: COSTCENTER
  - Description: Cost center
- Product
  - Label: PRODUCT
  - Description: Product
- SKU
  - Label: SKU
  - Description: SKU
-
  - Label: CUSTOMER
  - Description: Customer

3. Click ⊕ to add the following numeric field.
   - Amount
     - Label: AMOUNT

- Description: **Amount**
- Field type: **Number**

4. Save.
5. Select **AMOUNT** field.
6. Click the hyperlink **Details** to navigate fields details.
7. Click ⊕ to add the following text field.
    - Notes
        - Label: **NOTES**
        - Description: **Notes**
        - Field type: **Text**
8. Select NOTES field.
9. Click the hyperlink **Details** to navigate field details.
10. Close the dataset structure window.
11. Hover the mouse on the top right angle of the **New Dataset** tile to reach the action menu and click it.
12. Set the dataset online by clicking **Set on-line**.
13. Check that the mode has turned from offline to **online idle**.
14. When a dataset is **online** you cannot change its structure.
15. Check that now you cannot add a new column to the structure.

Need some help?

Here you can find the solutions to the most frequent

technical issues you may get stuck with during the course.

I can't login to the training environment

Make sure you are using the access link provided by the trainer (with the proper 4 digits token if needed!). Events have a starting and ending date/time.

Make sure you are not trying to access the training course too early or too late!

My machine is slow

- Keep in mind that lab configuration may require up to 20 minutes to start from the moment you click on the CCH Tagetik Chrome icon! 

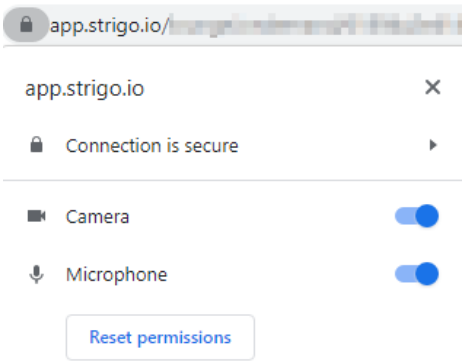

- The local connection's bandwidth is not sufficient for the number of connections currently in place (performance issues on the server side are very rare).

  Solution: ask the IT services to reboot the access point and prefer connection via cable if available.

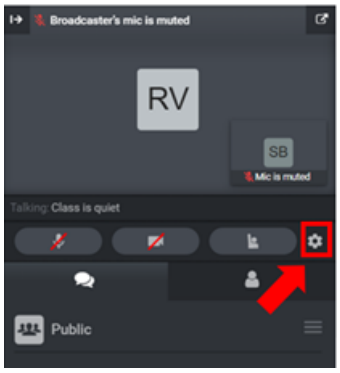

Audio/Video Troubleshooting

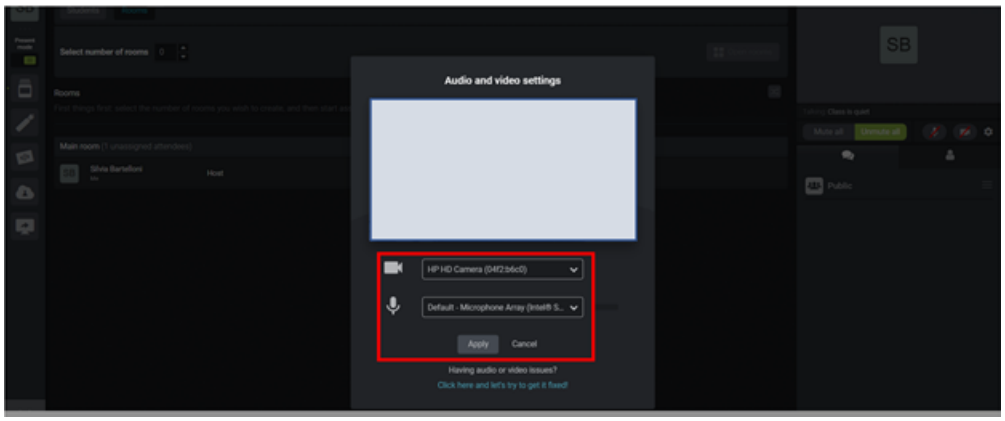

In case you are having problems with audio and video try the following:

1. Make sure you are running a compatible browser (Google Chrome, Mozilla Firefox).
2. Make sure your media devices are connected and are not muted or set to very low volume.
3. Make sure the browser you are in is allowed to use your laptop audio and video

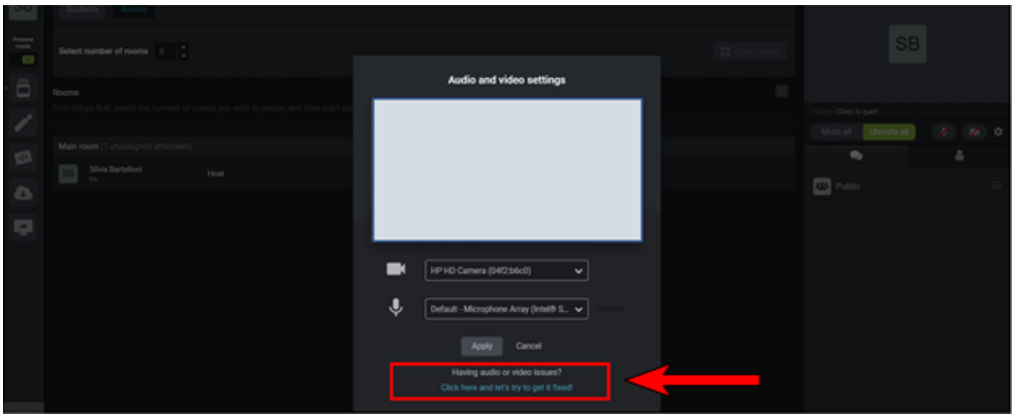

4. Make sure no other applications are running that use your media devices (microphone, camera or speakers).
5. Prevent any ad-blockers or script blockers running on the classroom's tab.
6. Refresh the page.
7. From the right communication panel, click on the settings icon and change the camera/video options selected

Check if there are any errors: if so, they will appear in red.

In addition, you can run a troubleshoot by clicking on: "Let's try and get it fixed" and then on "Run Troubleshoot"

If you still have problems, it could depend on network restrictions.

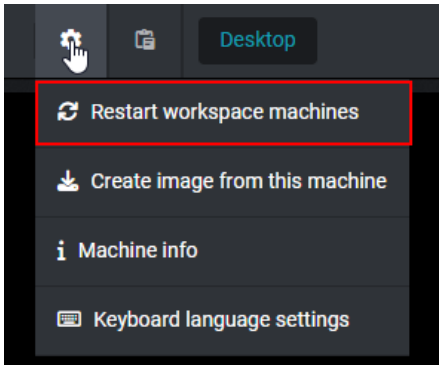

Resolution issues: if you see CCH Tagetik application masks too big in the machine even if I didn't change browser zoom.
Remember, Strigo adapts the machine to your computer resolution. Try to change your resolution or use a different monitor!

⚠ Important: Scaling setting recommended = 100% (max 125%).

Lab troubleshooting while practicing

If you are in your Virtual Machine and you are experiencing a black screen with your lab not starting:

1. Try restarting the machine by clicking on the wheel icon and then on "Restart workspace machine"

2. Try logging out and then log in again after few minutes

⚠ Important:

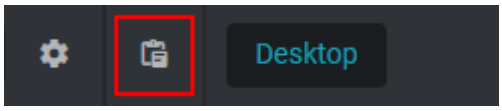

Your machine will be rebooted, but do not panic! No data will be lost. You will need to wait for the OS to restart and CCH® Tagetik to be reloaded though.

3. A pause > restart of the lab should work as well. The pause option is on the top right-hand corner of the screen. The workspace will switch to **Paused** mode, and then you want to really just give it around two minutes. This is usually enough time to let the lab machine be actually stopped, before you go and hit **Resume** again.
4. Try to open the browser in incognito/private mode.
5. Reach out to Strigo support through this link and then click start live chat

I can't copy/paste any content to the virtual machine

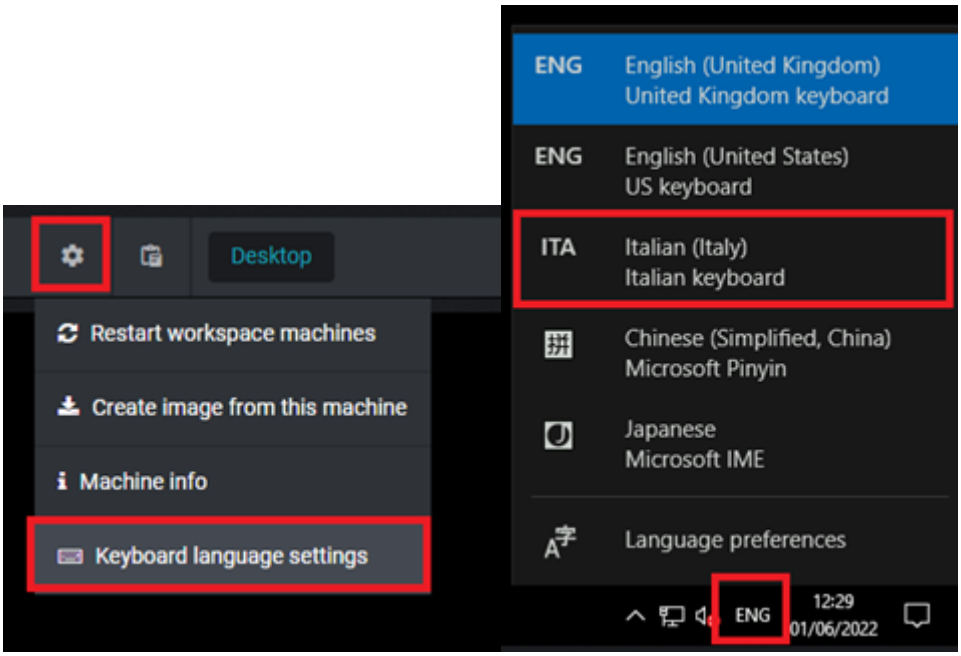

Direct copy/paste is not allowed.

Solution: Use the clipboard icon to copy and paste from the desktop to the virtual machine and viceversa.

I cannot change language in my machine

Solution: Change the language both by desktop bar and by Settings.

MS Excel: I can't select a given form or an object of a form.

This issue happens pretty often and is due to some wizard (e.g. Matrix Wizard, Cell Fields wizard) already open but not currently diplayed on the screen. **When any wizard is open and running, you can't work anywhere else**.

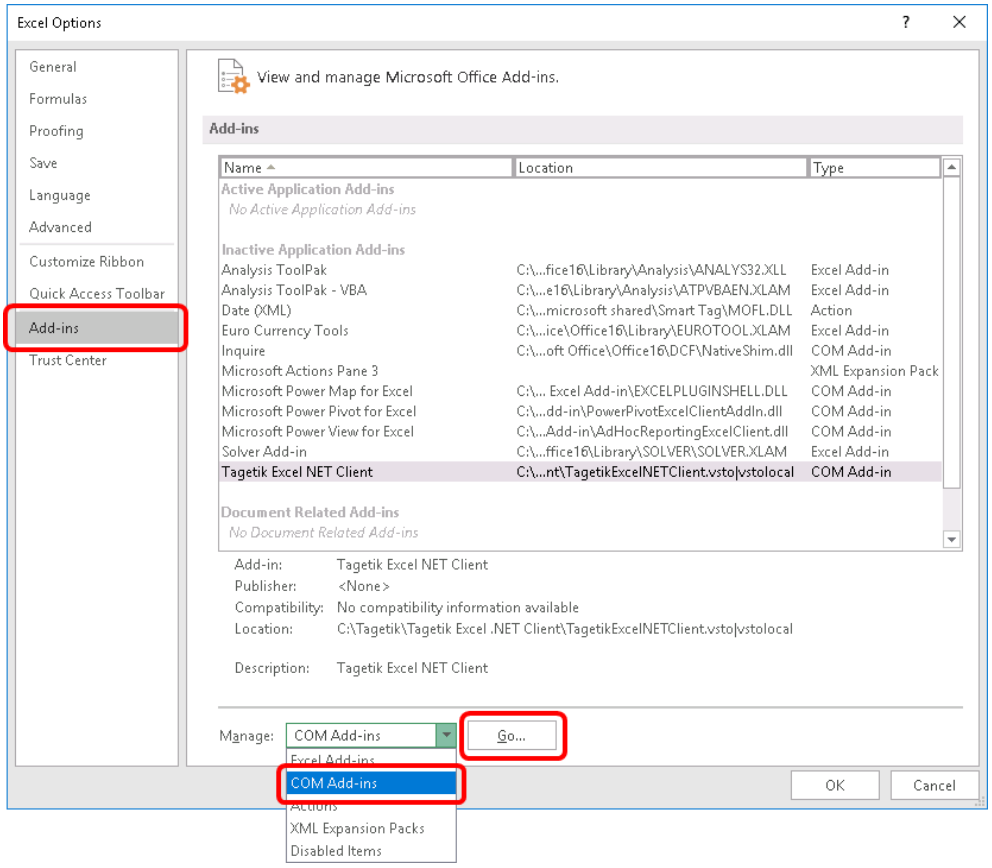

Solution: check if you have any of the wizard open and running (most common: Matrix Wizard, Tab Filters, Form Filters, Cell Fields wizards). If this is the case, be sure to have finished your work on that wizard and close it with OK to confirm. Then go on with your work.

MS Excel: the Tagetik menu is no longer available on the ribbon bar.

Solution1: this probably means the CCH Tagetik add-in has been disabled by MS Excel due to a crash or some errors and has to be enabled again.

Follow the path **File > Options**. Click "**Add-Ins**" on the "**Excel Options**" pane and expand the drop-down menu "**Manage**" on the bottom. Try to select:

1. "**COM Add-Ins**" > "**Go...**". If unticked, tick the "**Tagetik Excel NET Client**" Add-in and click OK
2. "**Disabled items**" > "**Go...**". If you find there the "**Tagetik Excel NET Client**" Add-in, enable it. Close and start Excel.

Solution2: should solution1 not solve the issue, disinstall and reinstall the CCH® Tagetik add-in. Ask the trainer for some help in case.

If you use a 4K resolution monitor, there's a chance you will see far too little

Solution: Low the resolution before the training, then set it back to the original value after the training

My problem is not listed here.

If even this can't solve your problem, please refer to your trainer (and if you are a trainer to your training manager).
