EXERCISE 10 - Data submission 24
EXERCISE 11 - Control groups 26

Need some help? 30

EXERCISE 1 - Upload original amounts by predefined ETL

Objective	Learn how to upload amounts using the predefined ETL.
Tasks	Perform the following tasks:

1. Log in the CCH Tagetik web application:
   - Username: **EMPEROR**
   - Password: **tgk**
2. Click the navigation bar where the username is displayed.
3. Click **Download**
4. Click the hyperlink **ETL template** among the utilities
5. The system will download the zip file **etl_template.zip**
6. Unzip it and open the **5324_Standardimport_xlsm** file
7. Click the hyperlink **Data original amounts** on row 83 from Index tab
8. Open the file Revenue_and_Cogs stored below Workshops\ Financial modelling and reporting
9. Copy and paste the values
10. Drag the values from columns G, H, I, J to J, K, L, M
11. Save the file
12. Reach Index tab and click on button **Set Areas**
13. Save the file on the desktop and close
14. Access the web interface
15. Access, from the User interface, the **2056ACT** Process cockpit for Scenario **2056 Actual** – Period **June.**
16. Click the step **Profit & Loss**
17. Select the entity **C00 - Gringotts**
18. Run the **ETL task** to upload the Revenue and Cogs
19. Select the routine **3110 - CPM_DATA** and set the Data

source type **Excel (xlsx)**

20. Access the tab **Uploads** in red and upload the file
21. Run the ETL
22. Select Continue
23. Check the ETL has uploaded 18 records
24. Close the window
25. Access the tile **System Reports** from the User interface
26. Expand **Gross and IC amounts** and select **Original gross amounts**
27. Set the following filters in the left pane:
    - Scenario: **2056ACT**
    - Period: **06**
    - Entity: **C00 - Gringotts**

      Be aware you can filter an element by using the three dots on the right
28. Click **Apply** on the top right
29. Check the system returns 18 records loaded by **ETL** with origin **MAP_CPM_DATA_FS_ETL**

EXERCISE 2 - Creation of an Output form

Objective

Learn how to:

- Create a simple Output Form based on Financial Workspace
- Use the row, column and matrix filters

Tasks

Perform the following tasks:

1. Log in to the Excel interface with user:
   - Username: **EMPEROR**
   - Password: **tgk**
2. Select the **Design** tab on the **CCH Tagetik** ribbon bar
3. Expand the folder Academy
4. Select the folder **FMR - Financial modelling & reporting**
5. Create a new form  and define the attributes:
   - Code: **FMR_EX02**
   - Description: **Revenues by product**
6. The form must have the same structure of the file **FMR_EX02.xlsx**, available in the Workshops > Financial modeling and reporting
7. Select cell C8
8. Add a new Matrix 
9. Select the Workspace **$CPM - Financial workspace** and click OK
10. Insert a new set of Accounts on the row filters as shown in the file **FMR_EX02.xlsx.** The Accounts can be picked from the **X00 - Management** hierarchy
11. Add a **formula**  that calculates the Total Revenues **{1}+{2}+{3}**

12. Set the dictionary **"Total revenues"** on the formula
13. Insert the product node on the columns as dynamic (Lowest level elements)
14. Select the Product node and set:
    - **Pruning: To zero**
    - **Subtotals: Yes**
15. Access the Matrix filters and select the following parameters:
    - **$SCE_P - Scenario**
    - **$PER_P - Period**
    - **$AZI_P - Entity**
16. Access **Form options** on the Design ribbon bar
17. Click Layout options tab and select **TGK - Simple Style** in the dropdown menu on the right of Tagetik style
18. Click OK
19. Access the Matrix options and tick **Apply Tagetik style** on the top right of the window
20. Click OK
21. Select cell B3
22. Access **Slicer** on the Design ribbon bar
23. Select the **Entity** parameter and click OK
24. Define the other cell fields displayed in the file **FMR_EX02.xlsx**
25. Run a preview selecting the parameters:

    Scenario: **2056ACT - 2056 Actual**

    Period: **06**

    Entity: **C00 - Gringotts**

EXERCISE 3 - Account sign class

Objective	Learn how to manage the sign of a set of Accounts with a centralized approach
Tasks	Perform the following tasks:

1. Access the Web interface
2. Access **Dimensions** menu
3. Click the popped up three-dots button on the top right of the **Account** tile
4. Click **Settings**
5. Click the negative red sign close to Revenues to change the Revenues class to positive
6. Click OK
7. Access the Excel interface
8. Open the Form **FMR_EX02 - Revenues by product** in Design mode
9. Double click to open the matrix
10. Click the **Refresh Dimension tree**  on the matrix wizard bar
11. Click the **Sync signs**  on the matrix wizard bar
12. Select the formula on the rows and delete the negative sign: **{1}+{2}+{3}**
13. Click OK
14. Run a preview selecting the parameters:
    - Scenario: **2056ACT - 2056 Actual**
    - Period: **06**
    - Entity: **C00 - Gringotts**
15. Check the behavior of Revenue Accounts after the application of the change sign

16. Access the web interface
17. Access the Original gross amounts from the User interface
18. Set the following filters in the left pane:
    - Scenario: **2056ACT**
    - Period: **06**
    - Entity: **C00 - Gringotts**
19. Click **Apply**
20. Check the behavior of Revenue Accounts: into the database the sign has not changed

Need any help? Here are some hints

- To reach the Original gross amounts select the System reports tile and expand the Gross and IC amounts
- To filter data into the Original gross amounts use the three dots and select the elements

EXERCISE 4 - Period length

Objective	Learn how to manage the data periodicity in an Output form
Tasks	Perform the following tasks:

1. Access the Excel interface
2. Run a preview of the form **FMR_EX04** and select the following parameters:
   - Scenario: **2056ACT - 2056 Actual**
   - Entity: **C00 - Gringotts**
3. Check the figures are displayed as cumulated
4. Close the form in Navigation
5. Reopen the matrix
6. Nest the following periods length in the node **001 - Revenues**:
   - **LUN_0 - Cumulated**
   - **LUN_1 - Monthly**
7. Access the Matrix options
8. Tick the **Don't repeat cloned headers on each row/column** option
9. Click OK
10. Run the form without changing the parameters
11. Check the behavior of the figures as the period length changes

Need any help? Here are some hints

- Use the hierarchy X00 - Management to recall the Accounts or the node of Accounts

EXERCISE 5 - Financial workspace mapping

Objective

Learn how to load data in Financial workspace by a Quick data loader from the Analytical workspace

Tasks

Perform the following tasks:

1. Access the web interface
2. Click the **Analytical workspaces** tile from the Administrator homepage
3. Click on **Personnel costs**
4. Access the dataset structure by clicking the related tile
5. Move the mouse to the top of the window to reach the actions menu  and click it
6. Select **Financial workspace mapping**
7. Perform the mapping in the right pane defining the following elements:
    - Period length: **Monthly**
    - Category, add the Default value: **$AMOUNT**
    - Currency, add the Formula: **${$Entity.currency.code}**
    - Map the amount columns with the related Accounts:
        - drag and drop the columns Wages, Contributions, Bonus, Benefits to the Amount
        - expand the Dimensions dropdown menu and select Account
        - click on  and map the accounts to the amount fields: **Wages - 50300, Contribution - 50310, Bonus - 50325, Benefit - 50326**

- Activate the toggle  on the dimensions:
  - Scenario
  - Period
  - Entity
  - Account

8. Click Save
9. Access the Business Workflow **FMR - Financial modeling and reporting** - from Business Workflow tile of the Administrator homepage
10. Select the **Profit & Loss** step
11. Click **Edit** on the top right
12. Right-click the arrow between the **ETL** task and Submission
13. Click Delete to remove the link
14. Drag and drop a **Update Financial Workspace from Analytical Workspace** task from the Data integration list
15. Define the following attributes:
    - Code: **20**
    - Description: **Load personnel costs**
    - Declare task completion: **Manual**
    - Analytical workspace: **Personnel costs**
    - Analytical workspace Dataset: **Personnel costs**
16. Join the tasks
17. Save
18. Access the Process cockpit **2056ACT - 2056 Actual**
19. Select **Profit & Loss** step
20. Click **C00 - Gringotts entity**
21. Run the task **Load personnel costs** just created to upload the data

22. Access **System Reports tile** from the User interface
23. Expand Gross and IC amounts and select **Original gross amounts**
24. Define the following filters in the left pane:
    - Scenario: **2056ACT**
    - Period: **06**
    - Entity: **C00 - Gringotts**
    - Accounts: **50300, 50325, 50310, 50326**
25. Click Apply
26. Check the figures just uploaded with the Financial Workspace mapping

Need any help? Here are some hints

- In a Dataset the action menu is identified by the three dots
- To map an element with a default value, select "show advanced options" and select the default value from the dropdown menu
- To map an element with a formula, select "show advanced options" and write the formula in the panel below
- To filter more accounts simultaneously, insert the accounts code separated by comma

EXERCISE 6 - Data entry form

Objective	Learn how to create a data entry form to collect data in the Financial workspace
Tasks	Perform the following tasks:

1. Access the Excel interface
2. Select the Design tab on the **CCH Tagetik** ribbon bar
3. Clone the form **FMR_EX04 - Revenues by period** and define the attributes:
    - Code: **FMR_EX06**
    - Description: **Data entry overhead**
4. The form must have the same structure of the file **FMR_EX06.xlsx**, available in the Workshops > Financial modelling and reporting
5. Access the matrix and delete all the rows
6. Insert a new set of Accounts on the row filters as shown in the file **FMR_EX06.xlsx**. The Accounts can be picked from the **X00 - Management** hierarchy
7. Select the Accounts and set editability as **Editable**
8. Add a formula that calculates the total of Revenues **SUM({1}:{4})**
9. Set the dictionary **"Total"** on the formula
10. Add the periods on the columns following the excel provided
11. Access the Form filters tab and add the following dimensions:
    - Product: **GEN_P - Generic Product**
    - Category: **$AMOUNT**
    - Period length: **LUN_1-Monthly**
12. Click Ok
13. Access the **Tab filters** and add **$DEST1_DPT_P - Departments**

14. Select the parameter and set advanced selection **Insert lowest level elements**
15. Click OK
16. Save and close the form
17. Access the Web interface and deploy the process **2056ACT -2056 Actual**
18. Run the form **FMR_EX06** in Data entry mode for process **2056 Actual** into the excel interface
19. Select the following parameters:
    - Scenario: **2056ACT - 2056 Actual**
    - Entity: **C00 - Gringotts**
    - Department: **X01 - Marketing and sales**
20. Enter random amounts on the cells available for the data entry
21. Save
22. Enable **Cell properties** on Data entry ribbon bar
23. Select some matrix cells and check that the currency and the amount type are not defined. Logically the figures are stored in the Entity currency (GBP) and in the original amount type
24. Close the form
25. Access the Design and reach the **Form filters** tab
26. Add the following elements:
    - Currency: **$VAL_P - Currency** (set as **Don't Convert** by default)
    - Amount type: **TIP_OV - Original in Transaction currency**
27. Add the cell field **$Currency.code**
28. Save and close
29. Run the form in Data entry with the following parameters:
    - Scenario: **2056ACT - 2056 Actual**

- Entity: **C00 - Gringotts**
- Department: **CC02 - Marketing**
- Currency: **AUD - Australian Dollar**

30. Enter random amounts on the cells available for the data entry
31. Save
32. Enable **Cell properties** on Data entry ribbon bar
33. Select some matrix cells and check the currency and the amount type on which the figures are stored: AUD and transactional amount type

EXERCISE 7 - Creation of a Financial Statement Template

Objective

To create a Financial Statement template with the following characteristics:

- formulas
- parent item
- formatting type

Tasks

Perform the following tasks:

1. Access the web interface
2. Access Dimensions tile from homepage
3. Click the popped up three-dots button on the top right of the Account dimension
4. Select **FST & KPI**
5. Clone  the **FST 015 - Synthetic P&L**
6. Define the following attributes for the new FST:
    - Code: **030**
    - Description: **Profit & Loss**
7. Save
8. Click the three-dots button on the top, to access the Actions menu
9. Select **FST items**
10. Add the following FST items:
    - Code: 010
    - Description: Revenue
    - Item type: Parent Item
    - Class: Revenue

    - Code: 020
    - Description: Cost of sales

- Item type: Formula Standard
- Class: Cost
- Add item from: Account

  Formula: [50110]
- Save

- Code: 030
- Description: Gross margin
- Item type: Formula Standard
- Class: Revenue
- Formula: [030|010]+[030|020]

- Code: 040
- Description: Cost of personnel
- Item type: Parent Item
- Class: Cost

- Code: 050
- Description: Other costs
- Item type: Parent Item
- Class: Cost

  Save

- Code: 060
- Description: Operating income
- Item type: Formula Standard
- Class: Revenue
- Formula: [030|030]+[030|040]+[030|050]

Save

- Code: 070
- Description: Operating margin%
- Item type: Formula Standard
- Class: None
- Formatting type: 2
- Formula: [030|060]/[030|010]
- Save

11. Click Relationships at the top of the window
12. Click on export for import  and open the file
13. Access the file **Relationships** available in the Workshops > Financial modelling and reporting
14. Copy the values from E3:H8
15. Paste the elements into the Import-Export file in the correct columns. **Paste values** is the suggested option to avoid formatting issues
16. **Save**
17. Import the file  into the Relationships
18. Click **Deploy** on the top right to store the changes
19. Click **Definition result** at the top of the window to check the Fst relationships stored in the system

Need any help? Here are some hints

- To insert a standard formula you can copy the formula from the excel provided or you can try to write it manually.

EXERCISE 8 - Financial Statement Template on reporting

Objective	Learn the purposes of different Financial Statement templates and their application on reporting
Tasks	Perform the following tasks:

1. Access the excel interface
2. Select the Design tab on the **CCH Tagetik** ribbon bar
3. Create a new form below the folder **FMR - Financial modelling & reporting** with:
    - Code: **FMR_EX08**
    - Description: **Profit & Loss**
4. The form must have the same structure of the file **FMR_EX08.xlsx**, available in the Workshops > Financial modelling and reporting
5. Select cell **C8**
6. Add a **new Matrix and select $CPM - Financial workspace**
7. Expand the Fst folder below the Account dimension in the left pane
8. Expand the Standard FST folder
9. Click the **030 - Profit & Loss** and add synthetic FST  to the rows
10. Add 2 periods as parameter **$PER_P** on the columns.

    The first parameter should show the previous period of the second one.
11. Add a formula to display the difference between the two periods
12. Set the Dictionary **"Difference"** on the formula
13. Access the Form filters tab and add the following dimensions:
    - Scenario: **$SCE_P - Scenario**

- Entity: C00 - Gringotts

14. Click OK
15. Enable the Open item feature 
16. Clone template 1 using the copy and paste feature
17. Access the matrix on the new template
18. Delete all the rows
19. Click the 030 - Profit & Loss and add analytic FST  to the rows
20. Click Ok
21. Clone template 2using the copy and paste feature
22. Access the matrix and delete all the rows
23. Click the 030 - Profit & Loss and add a dynamic FST to the rows (Synthetic Financial Statement Template)
24. Click OK
25. Run the form and select the following parameters:

    Scenario: 2056ACT - 2056 Actual

    Period: 06 - June

Need any help? Here are some hints

- To retrieve the previous parametric period, open the drop down menu Period Difference in the property grid
- To add the dynamic FST, define the Selection type as Synthetic Financial Statement Template , below the Advanced selection menu in the property grid

EXERCISE 9 - Drill down

Objective	Learn how to use the Drill down utility to analyze the single parts of a given amount
Tasks	Perform the following tasks:

1. Access the excel interface
2. Run the form **FMR_EX08** in Navigation and select the parameters:
   - Scenario: **2056ACT - 2056 Actual**
   - Period: **06 - June**
3. Double Click cell:

   Account: Cost of sales

   Period: June
4. In the left pane scroll the menu to select the dimensions to Drill down and select **Cost center**
5. Click on Lowest level 
6. Run the drill down 
7. Check how the amounts are split according to the drill down selected
8. Close the drill down sheet
9. Double click cell:

   Account: Cost of sales

   Period: May
10. In the left pane expand the dropdown menu and select **Lowest level: rows**
11. Run the drill down 
12. Check how the amounts are split according to the drill down selected

EXERCISE 10 - Data submission

Objective	Learn how to certify data and lock the data entry for a given entity
Submission	Perform the following tasks:

1. Access the web interface
2. Click the Processes tile and open the **2056ACT** Process definition
3. Access the **$PDM - Standard data model** definition 
4. Check the mapping between Accounts and Steps
5. Access the process cockpit **2056ACT**
6. Click the Profit & Loss tab
7. Select **C00 - Gringotts** in the left pane
8. Click the tasks created and select **"Task is complete"**
9. Click **Submit** below the Actions menu
10. Check the task **Submission** is green colored
11. Access the Excel interface
12. Activate the Data entry modality by selecting the Process: **2056ACT**
13. Run the form **FMR_EX06** - Data entry overhead and select the following parameters:
    - Scenario: 2056ACT
    - Entity: **C00 - Gringotts**
    - Departments: **CC02 - Marketing**
    - Currency: **AUD - Australian Dollar**
14. Select a random cell for the month of June and use the cell properties button to check the editability value

Need any help? Here are some hints

- To reach the process cockpit from the Admin user, click the three rows on the top left and expand **Processes**

EXERCISE 11 - Control groups

Objective

Learn how to :

- Create and setup variation types and how to link them in a control group
- Create a Data entry form with Control groups and Variation types

Control groups creation

Perform the following tasks:

1. Access the web application
2. Click Dimensions menu
3. Access the Grouping of Variation/Detail types
4. Select the node **01_X00 - Variations** below **$ - All casuals**
5. Click "add node" and give it:

   Code: **FW_TAS**

   Description: **Tangible assets**
6. Save
7. Click Switch view on the top left and select element/node relationships
8. Add the following Variations type related to the Variation type node **$|FW_TAS - Tangible assets** :

   Var - Det. type: **010 - Initial Balance**

   Var - Det. type: **020 - Investments**

   Var - Det. type: **030 - Disinvestments**

   Var - Det. type: **060 - Other variations**
9. Save
10. Access the **Account** list
11. Filter the following Accounts code : 10021,10022, 10023, 10024, 10025

12. Click Multiple edit and select the accounts
13. Click the menu **Actions** and select **Create Variations**
14. Open the dropdown menu Type nodes of variation accounts and select the node **FW_TAS - Tangible assets**
15. Click OK to create the Control groups
16. Access the **Control group** list and check the new automatically created Control groups

Need any help? Here are some hints

- To filter many accounts code at the same time, select "equals" in the dropdown menu near the code and write the codes divided by comma

---

Creation of a form with Control groups

Perform the following tasks:

1. Access the Excel interface
2. Create a new form below the folder **FMR - Financial modeling & reporting** and define the attributes:

   Code: **FMR_EX11**

   Description: **Asset management**
3. The form must have the same outcome as the file FMR_EX11.xlsx, available in the Workshops > Financial modelling and reporting
4. Select cell C8 and add a **new Matrix**
5. Select the Workspace **$CPM - Financial workspace** and click OK
6. Insert a new set of:
   - Variations type on the row filters
   - Control groups on the column filters

   as shown in the file FMR_EX11.xlsx.

---

7. Add the Formula **SUM({1} :{4})** on the Ending Balance variation type
8. Inside the matrix, set the Initial and the Ending Balance as **Protected** and the other Variations type as **Editable**
9. Insert the following matrix filters:
    - Entity: **C00 - Gringotts**
    - Cost center: **GEN_CC - Generic Cost Center**
    - Product: **GEN_P - Generic Product**
    - Category: **$AMOUNT**
    - Scenario: **$SCE_P - Scenario**
    - Period: **$PER_P - Period**
    - Period length: **LUN_1-Monthly**
10. Link the Tagetik style: **TGK - Simple Style**
11. Save the form
12. Access the web application and deploy the process **2056ACT**
13. Access the Excel in Data entry modality by selecting:
    - Process: **2056ACT**
14. Run the form and select the following parameters:
    - Scenario: **2056ACT**
    - Period: **06**
15. Check the outcome
16. Enter random amounts on the cells available for the data entry
17. Save

Need any help? Here are some hints

- The Variations type can be picked from the FW_TAS

grouping; be aware the $EB - Ending Balance is already present in the system, pick it below the root $ - All casuals

- The Control Groups can be picked from **Variation** folder

Need some help?

Here you can find the solutions to the most frequent

technical issues you may get stuck with during the course.

I can't login to the training environment

Make sure you are using the access link provided by the trainer (with the proper 4 digits token if needed!). Events have a starting and ending date/time.

Make sure you are not trying to access the training course too early or too late!

My machine is slow

- Keep in mind that lab configuration may require up to 20 minutes to start from the moment you click on the CCH Tagetik Chrome icon! 

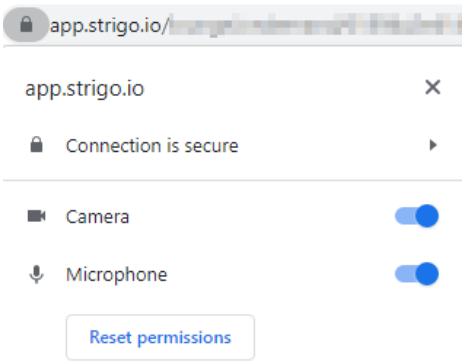

- The local connection's bandwidth is not sufficient for the number of connections currently in place (performance issues on the server side are very rare).

  Solution: ask the IT services to reboot the access point and prefer connection via cable if available.

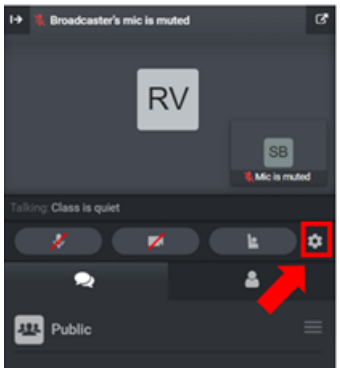

Audio/Video Troubleshooting

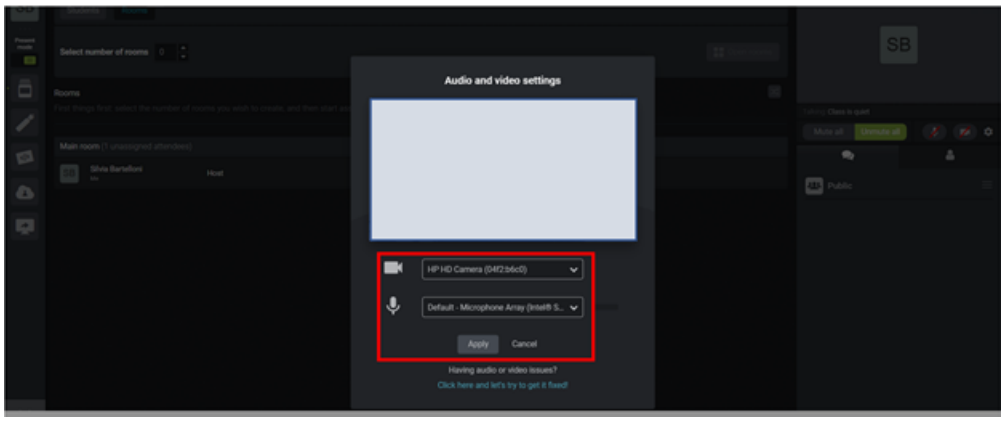

In case you are having problems with audio and video try the following:

1. Make sure you are running a compatible browser (Google Chrome, Mozilla Firefox).
2. Make sure your media devices are connected and are not muted or set to very low volume.
3. Make sure the browser you are in is allowed to use your laptop audio and video

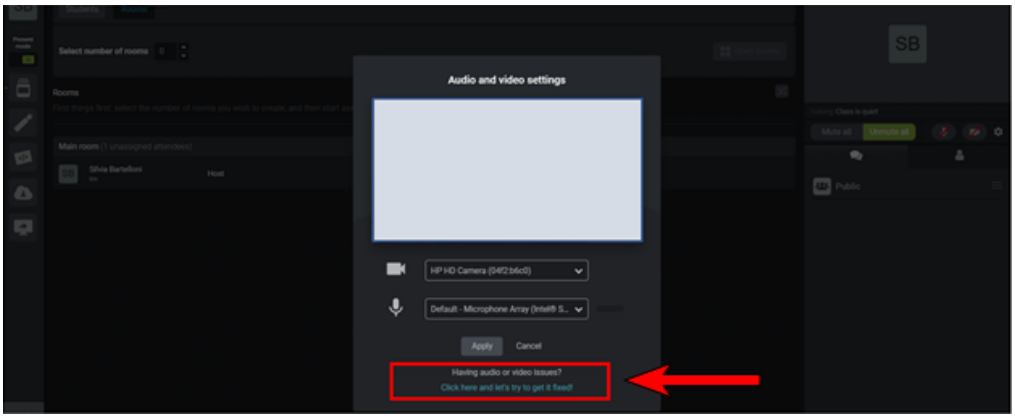

4. Make sure no other applications are running that use your media devices (microphone, camera or speakers).
5. Prevent any ad-blockers or script blockers running on the classroom's tab.
6. Refresh the page.
7. From the right communication panel, click on the settings icon and change the camera/video options selected

Check if there are any errors: if so, they will appear in red.

In addition, you can run a troubleshoot by clicking on: "Let's try and get it fixed" and then on "Run Troubleshoot"

If you still have problems, it could depend on network restrictions.

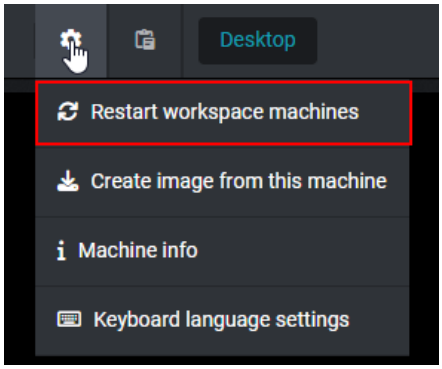

Resolution issues: if you see CCH Tagetik application masks too big in the machine even if I didn't change browser zoom.
Remember, Strigo adapts the machine to your computer resolution. Try to change your resolution or use a different monitor!

⚠ Important: Scaling setting recommended = 100% (max 125%).

Lab troubleshooting while practicing

If you are in your Virtual Machine and you are experiencing a black screen with your lab not starting:

1. Try restarting the machine by clicking on the wheel icon and then on "Restart workspace machine"

2. Try logging out and then log in again after few minutes

⚠ Important:

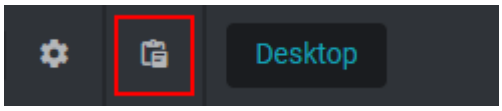

Your machine will be rebooted, but do not panic! No data will be lost. You will need to wait for the OS to restart and CCH® Tagetik to be reloaded though.

3. A pause > restart of the lab should work as well. The pause option is on the top right-hand corner of the screen. The workspace will switch to **Paused** mode, and then you want to really just give it around two minutes. This is usually enough time to let the lab machine be actually stopped, before you go and hit **Resume** again.
4. Try to open the browser in incognito/private mode.
5. Reach out to Strigo support through this link and then click start live chat

I can't copy/paste any content to the virtual machine

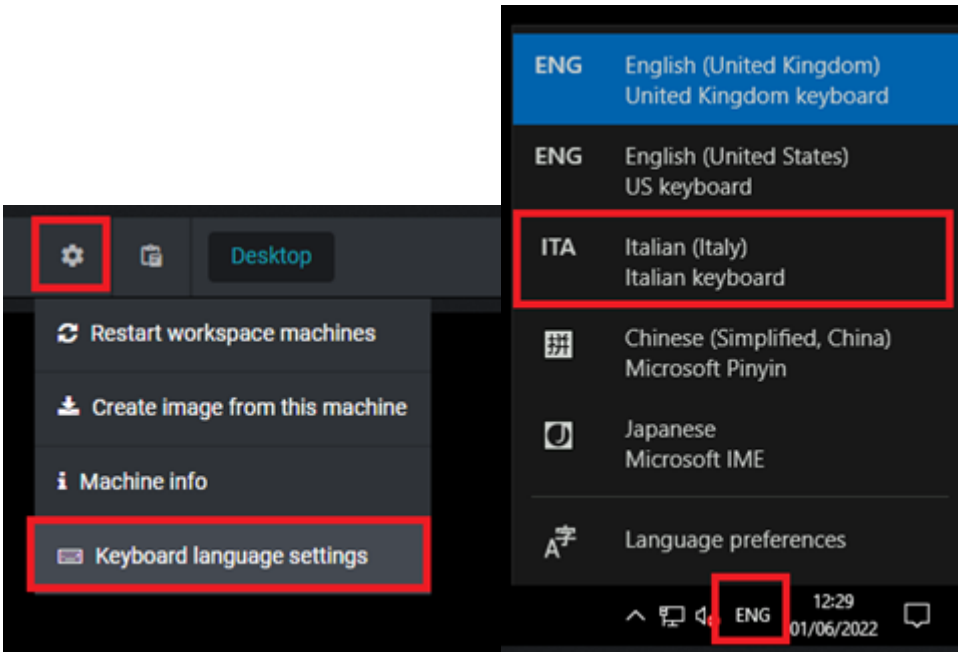

Direct copy/paste is not allowed.

Solution: Use the clipboard icon to copy and paste from the desktop to the virtual machine and viceversa.

I cannot change language in my machine

Solution: Change the language both by desktop bar and by Settings.

MS Excel: I can't select a given form or an object of a form.

This issue happens pretty often and is due to some wizard (e.g. Matrix Wizard, Cell Fields wizard) already open but not currently diplayed on the screen. **When any wizard is open and running, you can't work anywhere else**.

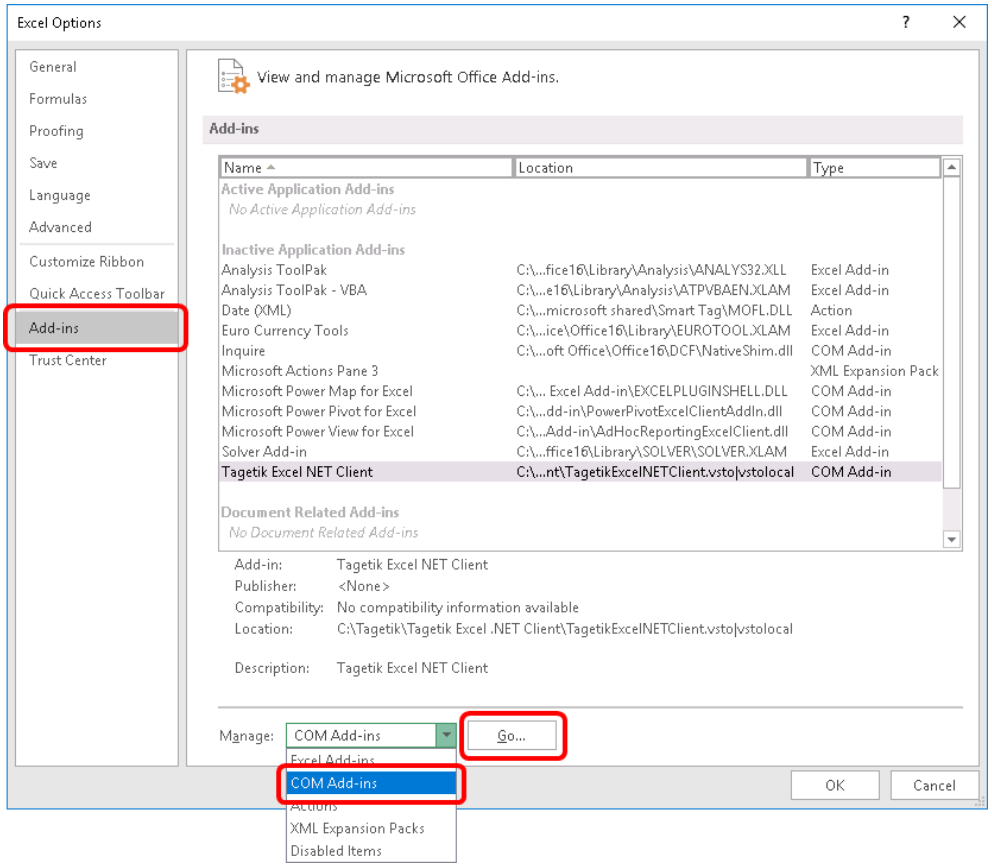

Solution: check if you have any of the wizard open and running (most common: Matrix Wizard, Tab Filters, Form Filters, Cell Fields wizards). If this is the case, be sure to have finished your work on that wizard and close it with OK to confirm. Then go on with your work.

MS Excel: the Tagetik menu is no longer available on the ribbon bar.

Solution1: this probably means the CCH Tagetik add-in has been disabled by MS Excel due to a crash or some errors and has to be enabled again.

Follow the path **File > Options**. Click "**Add-Ins**" on the "**Excel Options**" pane and expand the drop-down menu "**Manage**" on the bottom. Try to select:

1. "**COM Add-Ins**" > "**Go...**". If unticked, tick the "**Tagetik Excel NET Client**" Add-in and click OK
2. "**Disabled items**" > "**Go...**". If you find there the "**Tagetik Excel NET Client**" Add-in, enable it. Close and start Excel.

Solution2: should solution1 not solve the issue, disinstall and reinstall the CCH® Tagetik add-in. Ask the trainer for some help in case.

If you use a 4K resolution monitor, there's a chance you will see far too little

Solution: Low the resolution before the training, then set it back to the original value after the training

My problem is not listed here.

If even this can't solve your problem, please refer to your trainer (and if you are a trainer to your training manager).
