

Process Governance & User Rights

Learn everything about the process, workflow and user rights in depth. In this course, you will learn how to define an Application process, set up Business cycle, Organization and Workflow, define a Process Data Model, set up Data Entry and Submission rules, enable Data processing and ultimately set User rights.

EXERCISE 1 - Business Workflow, Tasklist and Tasks

Objective

To define a Business Workflow and a Custom Task list.

Tasks

Perform the following tasks:

Define Process Steps

1. Log into the CCH Tagetik web application
    - Username: **wile**
    - Password: **tgk**
2. Reach the **Business Workflow** tile and create a new Business Workflow
    - Code: **002**
    - Description: **Training Workflow**
3. Go to Action menu and click **Steps**.
4. Create 4 steps
    - 01 - Revenue & COGS
    - 02 - IT & HR Costs
    - 03 - OPEX & CAPEX
    - 04 - Allocations
5. Save the new structure.

Need any help? Here are some hints

- To create a new Step drag the Phase box from the upper part of the window and join it with the previous step ("Start" icon)
- To link a Form to a task drag the icon "Form" from the list "Data Entry & Reporting" and insert the code in combo-box Parameters. Link the "Start" icon to the new step.

Tasks	Perform the following tasks:
Define Custom Task list and Tasks	1. Enter the definition window of the existing Business Workflow **001 - Budget Workflow.** 2. Access **Step 1** - Revenue & COGS. 3. Create a new Task list • Code: **TL4** • Description: **Production Tasklist** 4. Use the graphical interface to create the Task list. 5. Add a **Quick Data Loader (QDL)** Task • Code: **01** • Description: **Produced quantity** • This is a mandatory task. 6. Add in parallel a **Form** Task • Code: **02** • Description: **COGS** • Form: **AW_002_000002 - Costs of goods sold** • This is a mandatory task. 7. Join the branches by dragging the **Join node** icon. 8. Add a **DTP Calculation** Task • Code: **03** • Description: **Calculation** • Analytical Workspace: **Production** • Data Transformation Package: **Production Calculation** • This is a mandatory task. 9. Add a **Submission** Task • Code: **04**

- Description: **Submit**
- This is a mandatory task.

10. Save.

EXERCISE 2 - Business Cycle, Organization & Workflow

Objective	To create a Process with multiple Steps.
Tasks Create a new Process and define a Business cycle	Perform the following tasks: 1. Create a new Process • Code: **2059BDG** • Description: **2059 Budget** 2. Click **Process Definition** from Action menu. 3. In Business Cycles area select • Number of cycles: **Single** 4. Click **Define Cycles** and relate the entire **2059BDG** Scenario to the process.
Tasks Set an Organization hierarchy	Perform the following tasks: 1. Set **04 - Budget View** as Organization hierarchy.
Tasks Map a Business Workflow	Perform the following tasks: 1. Set item **001 - Budget Workflow** as Business Workflow. • A warning message will appear: you are modifying the current workflow and therefore the parameters of the detail defined in the workflow will be lost. • Click OK. 2. Map the Business Workflow to the Cost Centers so that 3. In Step 1

- **SLS - Sales** Cost Center performs **TL1 - Sales Tasklist**
- **MRK - Marketing** Cost Center performs **TL2 - Marketing Tasklist**
- **PRD - Production** Cost Center performs **TL4 - Production Tasklist**
- Assign the **Empty task flowchart** to all other Cost Centers belonging to **04 - Budget view** hierarchy

4. In Step 2
    - **IT - Information Technology** Cost Center performs **TL1 - IT Tasklist**
    - **HR - Human resources**Cost Center performs **TL2 - HR Tasklist**
    - **PRD - Production** Cost Center performs **TL2 - HR Tasklist**
    - Assign the **Empty task flowchart** to all other Cost Centers belonging to **04 - Budget view** hierarchy.
5. In Step 3
    - **ADM - Administration** Cost Center performs **TL1 - Administration Tasklist**
    - **PRD - Production** Cost Center performs **TL1 - Administration Tasklist**
    - Assign the **Default task flowchart** to all other Cost Centers belonging to **04 - Budget view** hierarchy.
6. **Deploy** the process.
7. Open **Definition results** to check results.

Need any help? Here are some hints

- To map the Business Workflow to Cost Centers click on Mapping hyperlink in the Organization & Workflow area.

- Remember that it is necessary to first define the general rule (affecting all cost centers) and then define the exceptions (affecting only those cost centers that have a specific tasklist assigned to).

EXERCISE 3 - Process Data Model by Account

Objective	To set up a Process Data Model by Account.
Tasks	Perform the following tasks:
Set up a Process data model by Account	1. Access Process **2059BDG - 2059 Budget.** 2. Check **Business Cycle** and **Organization & Workflow** settings. 3. Edit **Process Data Model.** 4. Set **By account** as Type. 5. Click  to access the Process Data Model **Definition** window. 6. In the Account tab click the **Add** button • Action: **Include** • Select from dimension: **01|Step_1 - Revenue & COGS** • Step: **1 - Revenue & COGS** 7. Relate the remaining Steps to the respective nodes of Accounts from **01|ROOT - Account by Step** hierarchy: • Relate Account node: **01|Step_2 - IT & HR Costs** to Step: **2 - IT & HR Costs** • Relate Account node: **01|Step_3 - Opex & Capex** to Step: **3 - Opex & Capex** • Relate Account node: **01|Step_4 - Allocation** to Step: **4 - Allocations** 8. Reach tab Analytical Workspace measures. 9. Enable measure **AMOUNT - Amount** of dataset **Costs of goods sold** (AW: Production) for each Step of the process. 10. Enable measure **QUANTITY - Produced quantity** of

dataset **Produced quantity** (AW: Production) for each Step of the process.

11. Access Form exceptions tab to check the forms enabled for Data Collection.
12. Enable form **AW_002_000002 - Costs of goods sold** and form **AW_002_000001 - Produced quantity.**
13. Deploy the process.
14. Click to check the enabled Analytical Workspace measures.
15. Switch to User interface.
16. Access **2059BDG - 2059 Budget** from Process tile.
17. Check the different tabs and Action menu.
18. Access **Step 01 - Revenue & COGS** tab.
19. Select **PDR - Production** entity to display the Task list.

EXERCISE 4 - Consolidation Business Workflow

Objective	To define a Consolidation Business Workflow.

Tasks Create a Consolidator Process Step	Perform the following tasks: 1. Reach the **Business Workflow** tile. 2. Access Business Workflow **004 - Consolidation Workflow.** 3. Go to the Action menu and click **Steps.** 4. Check the existing Steps. 5. Click Edit to create an additional Step - Code: **03** - Description: **Consolidation Journal** - Step type: **Consolidator** 6. Save the new structure.

Tasks Define Consolidator Task list and Tasks	Perform the following tasks: 1. Click on the **Step 03** to create a new Task list. - Code: **TL1** - Description: **Consolidation Journal** 2. Notice that the available tasks are different from before. 3. Create the Task list. 4. Add a **Consolidation Journals** Task - Code: **01** - Description: **Enter Conso journal**

5. Add an Excel Form Task
    - Code: **02**
    - Description: **Consolidated Statements**
    - Form: **PGUR_01 Consolidated Statements**
6. Add an **Excel Form** Task
    - Code: **03**
    - Description: **Segment reporting**

      Form: **PGUR_02 Segment Reporting**
7. Add a **Submission** Task
    - Code: **04**
    - Description: **Submit**
8. Save the Task list.

EXERCISE 5 - Business Cycle and Period Status Management

Objective	To set up Process Business cycle and manage Periods status.
Tasks	Perform the following tasks:
Set up a Process Business cycle and manage Period status	1. Create a new process • Code: **2059CONSO** • Description: **2059 Consolidation** 2. Access process **2059CONSO - 2059 Consolidation.** 3. Reach the **Business Cycle** area to select • Number of cycles: **Scenario/Period** 4. Click **Define Cycles** to relate the entire **2059ACT - 2059 Actual** Scenario to the Process. 5. Click **Manage status** and check the default values. 6. Click **Lock** to lock Original scenario/periods from January to June. 7. Click OK. 8. Switch to User interface. 9. Reach Process tile and select process **2059 CONSO.** 10. Notice that you can display only Periods from July to December. 11. Go back to Administrator home page. 12. Access process **2059 CONSO** definition. 13. In Business Cycle area select **Manage status**. 14. Click **Unlock** 15. Tick 2059ACT - 2059 Actual checkbox to unlock all Periods. 16. Click OK.

EXERCISE 6 - Contributor/Consolidator nodes, Organization & Workflow

Objective	To set up Contributor/Consolidator node types and define Process Organization & Workflow.
Tasks Set up Contributor/Consolidator node types	Perform the following tasks: 1. Access **Dimensions** tile from Administrator home page. 2. Reach the **Costs Center (Entity dimension)** tile. 3. Go to hierarchies table. 4. Check that **X00 - Actual View** hierarchy is set as Organizational. 5. Access **X00 - Actual View** hierarchy. 6. Click Subgroup A - Contributor node type: **To submit** - Consolidator node type: **To consolidate** 7. Perform the same actions for Subgroup B. 8. Access **General Deployment** tile from Administrator home page. 9. Select All and click **Run** to deploy the changes you made.
Tasks Define Organization & Workflow	Perform the following tasks: 1. Reach **2059CONSO - 2059 Consolidation** process definition window. 2. Reach the Organization and Workflow area. 3. Set **X00 - Actual View** as Organization hierarchy. 4. Save and deploy the process.

5. Click to access the Definition results.
6. Check the nodes to consolidate.
7. Go back to process definition window.
8. Set item 004 as Business Workflow and save.
9. Click **Mapping.**
10. Access the **Contributor nodes** tab.
11. Map Contributor nodes to the process Steps so that
12. In Step 01
    - All hierarchy nodes perform **Submission** only
13. In Step 02
    - All hierarchy nodes perform **Submission** only
14. Access the **Consolidator nodes** tab.
15. Map Consolidator nodes so that
16. In Step 03
    - **Subgroup A** performs **TL1 - Consolidation Journals**
    - **Subgroup B** performs **TL1 - Consolidation Journals**
    - Root **X00 - Actual View** performs **Submission** only
17. Access **Journals** tab.
18. Map Journals so that
19. In Step 01
    - Root **X00 - Actual View** performs **Submission** only
20. In Step 02
    - Root **X00 - Actual View** performs **Submission** only
21. Access **Journals of the consolidator** tab.

22. Map Journals of the consolidator so that
23. In Step 03
    - All hierarchy nodes perform **Submission** only
24. Deploy the process.
25. Click **Definition results** to check results.

EXERCISE 7 - Process Data Model by Account/category

Objective	To set up a Process Data Model by Account/category
Tasks	Perform the following tasks:
Map a Process data model by Account/category	1. Access Process **2059CONSO - 2059 Consolidation.** 2. Reach **Process Data Model** area. 3. Select **By account/category** as Type. 4. Save. 5. Click to access the Process Data Model **Mapping.** 6. In the **Account** tab click the **Add** button • Action: **Include** • Select from dimension: **$\|$ - Account - Default view** • Category: **$AMOUNT - Default Original Amount** • Step: **01 - Trial Balance** 7. Relate all Accounts to category **$|$PRECO - Entity journals** category for Step 02 - Supp. Info. and JE. 8. Relate all Accounts to category **CJ - Consolidation Journal** for Step 03 - Consolidation journals. 9. Save. 10. Access the other tabs and notice that these are empty. Note that the forms are not set but still deployed based on the accounts in the PDM. 11. Return to process definition window and deploy the process. 12. Click to check the Process Data Model **Definition Results.**

EXERCISE 8 - Data Entry & Submission Rules, Data Processing

Objective	To define Data Entry & Submission Rules and set up Data Processing.
Tasks	Perform the following tasks:
Define Data Entry & Submission Rules	1. Access **2059CONSO - 2059 Consolidation** process definition window. 2. Reach the **Data Entry & Submission Rules** area. 3. Click to edit **Gross amounts & IC.** 4. In Managed Dimensions enable **Product (Custom D2)** only. 5. Check that **Intercompany declaration towards same Cost Center (entity dimension)** is enabled. 6. Check that Transaction Currency is **Managed on IC amounts.** 7. Save. 8. Go back to Process definition window. 9. Click to edit **Journals.** 10. In Managed Dimensions enable **Product (Custom D2)** only. 11. Check that Transaction Currency is managed on **Entity journals.** 12. Save. 13. Go back to Process definition window. 14. Click to edit **Submission.** 15. In Submission enable **Run data processing on submission.** 16. Save. 17. Go back to Process definition window.

Tasks	Perform the following tasks:
Set up Data Processing	1. Reach the **Data Processing** area. 2. Unlock Data Processing. 3. Enable **Carry forward.** 4. Enable **Calculation Logics.** 5. Click  to define Calculation Logics. 6. Set **$|ACT - Actual calculation logics** as Calculation logics node. 7. Save. 8. Go back to Process definition window. 9. Unlock Data processing. 10. Enable **Consolidation.** 11. Click  to define Consolidation. 12. Set **OSR - Ownership Structure Register** as Event Scenario. 13. Save. 14. Go back to Process definition window. 15. Deploy the process. 16. Switch to User interface. 17. Access **2059CONSO - 2059 Consolidation** from Process tile. 18. Select Period **06 - June**. 19. Navigate Contributor **Process Cockpit.** 20. Switch to Consolidator view by clicking the related radio button on the top-right corner. 21. Reach **Consolidation Journals** tab.

22. Select **A - Subgroup A** to viewthe Task list.

EXERCISE 9 - Entity and Form Rights

Objective	To assign and test User Entity and Form rights .
Tasks Check existing Entity and Form rights	Perform the following tasks: 1. From **Admin** interface click the User Rights tile to access the User Rights table. • Select the user **WILE** on the left panel and the **Restrictions** tab on the right side. 2. View the restrictions assigned on the **Restrictions** and **Other restriction** tabs. • Notice all settings are unrestricted. Wile is an administrative user. 3. Switch to the **User** home page. 4. Click the **Process** tile and select **the 2059 Budget scenario.** • Tap the **Revenue & COGS** step. • View the Task List assigned to Marketing, Production and Sales Cost Centers (Entities). • Notice Wile has unrestricted access to all the nodes and entities. 5. Return to the **User** Home page and view the available forms in the Forms tile.
Tasks Assign Entity and Form rights	Perform the following tasks: 1. Select User Rights from the Admin interface. 2. Select **Harry Potter** and browse the Restrictions and Other restrictions tabs. • Note the Form restriction set on the Other Restrictions tab 3. Tap the **Restrictions** tab.

4. Set **Cost Center (Entity dimension) and Task** as Restricted.
5. Click Save.
6. Open the Define hyperlink.
7. In Cost Center (Entity dimension) tab click the Add button.
8. Set
    - Action: **Include**
    - Organization: **04 - Budget View**
    - Cost Center (Entity dimension): **04|SALES - Sales**
9. Tick the **Insert data** check box.
10. Retain the default settings for Run Submission tasks and Run operational tasks.
11. Click Save.
12. Click  to clone the newly added restriction.
13. Set
    - Action: **Exclude**
    - Organization: **04 - Budget View**
    - Cost Center (Entity dimension): **SLS_PRC - Sales China**
14. Retain the default settings for Run Submission tasks and Run operational tasks.
15. Save.
16. Access the **Visibility** tab.
17. Set
    - Action: **Include**
    - Cost Center (Entity dimension): **04|PRODUCTION - Production**
18. Save.
19. Click **Deploy** on the top-left corner to update the user

rights table.

20. Close **Definition** hyperlink to go back to User rights window.
21. From **Restrictions** tab open Cost Center (Entity dimension) **Definition results** to check results.
22. Close Definition results.
23. Select **User Rights** from the Setup & Admin page.
24. Select **Harry Potter** and browse the **Restrictions and Other Restrictions** tabs.
    - **Note:** Form restrictions are set on the Other Restrictions tab.
25. Tap the **Other restrictions** tab and locate the unrestricted Form setting.
    - Change the Form user restrictions to Restricted and Save the change.
26. Tap the **Define** hyperlink to specify a restriction using the Add button.
    - Click the Form drop-down, expand the Analytical Workspaces node, select the Production node, and Save.
27. Run a **General Deployment** from the Setup & Admin page.
    - For a quick deployment, only check the Form checkbox and click **Run**.

Tasks

Perform the following tasks:

Test Entity and Form rights

1. Log into the CCH Tagetik web application
   - Username: **Harry**
   - Password: **POTTER**
2. From User home page access the **Process** tile.

---

3. Select Process **2059BDG - 2059 Budget.**
4. Reach the **Revenue & COGS** step.
5. Notice that **SLS_PRC - Sales China** is not visible.
6. Open the Excel Add-in and login as Harry.
7. Enable **Data Entry** mode.
8. Set
    - Database: **TRAINING_DB_003 - Academy 2**
    - Process: **2059BDG - 2059 Budget**
    - Steps: **All steps**
9. Expand the $002 - Production node and run **AW _002_ 00001 - Produced Quantity**.
10. Click the Add button to add a row.
11. Insert
    - Scenario: **2059BDG**
    - Period: **12**
    - Costs Center: **SLS_UK**
    - Product element: **A01**
    - Quantity: **10**
12. Save.
13. Click the Add button to add a second row.
14. Insert
    - Scenario: **2059BDG**
    - Period: **12**
    - Cost Center: **PRD**
    - Product element: **A01**
    - Quantity: **20**
15. Save.
16. Notice that the system does not allow you to insert

data for Cost Center PDR due to visibility rights limitations.

17. Change Cost Center from PDR to **SLS**.
18. Save.
19. Notice that this time the system allows you to save the new data.
20. Go back to the CCH Tagetik web application.
21. Login as **wile**.
22. From Admin home page reach **User Rights** tile.
23. Select user **HARRY - Harry Potter**.
24. Reach the **Restrictions** tab.
25. Open **Definition results** window for Cost Centers (Entity dimension) and Task.
26. Access the Visibility tab.
27. Notice that Harry cannot insert data for Costs Center **PDR - Production**.

EXERCISE 10 - Reference Users

Objective	To apply and use Reference user settings.

Tasks	Perform the following tasks:
Set a Reference user and inherit Reference user rights	1. Log into the CCH Tagetik web application: • Username: **wile** • Password: **tgk** 2. Reach **User rights** tile. 3. Select user **HARRY - Harry Potter**. 4. On **Attributes** tab, tick **Reference user for other users** check box in **References management** area. 5. Save. 6. Select user **HAN - Han solo**. 7. Reach the **Reference users** tab to add a new reference user. 8. Click the **Add** button and select user **HARRY - Harry Potter.** 9. Save.

Tasks	Perform the following tasks:
Set Entity and Form rights	1. Select user **Han**. 2. Reach the **Restrictions** tab. 3. Set Cost Center (Entity dimension) and Task as **Restricted**. 4. Save. 5. Open **Define** hyperlink to assign Cost Center rights.

6. Click **Add** button.
7. Set
    - Action: **Include**
    - Organization: **04 - Budget View**
    - Cost Center (Entity dimension): **ADM - Administration**
8. Tick **Insert data** check box.
9. Retain the default settings for **Run Submission tasks and Run operational tasks.**
10. Save.
11. Click **Deploy** on the top-left corner.
12. Open **Definition results** hyperlink to view results.
13. Notice that Han has inherited Harry's rights on Cost Centers and Visibility.
14. Go back to **User rights** window.
15. Reach **Other restrictions** tab for user **HAN - Han Solo**.
16. Set Form as **Restricted**.
17. Save.
18. Open **Define** hyperlink to add form restrictions.
19. Click Add button.
20. Set
    - Action: **Include**
    - Form: **$|$002 - Production**
21. Save.
22. Open **Definition results** window to view Form restrictions.
23. Logout of the web application.

Tasks	Perform the following tasks:

Test Form rights

1. Log into CCH Tagetik web application
    - Username: **Han**
    - Password: **tgk**
2. From User home page click **Process** tile.
3. Select **2059BDG - 2059 Budget** process.
4. Reach **Revenue & COGS** step.
5. Select Cost Center (Entity dimension) **ADM - Administration**
6. From Actions menu on the right-side panel click **Form** tab.
7. Notice that forms under **$ 002 - Production** are available.
8. Logout of the web application.

EXERCISE 11 - Area Profile and User Preferences

Objective	To set and use Area Profile.
Tasks	Perform the following tasks:
Set an Area Profile	1. Log into CCH Tagetik web application • Username: **wile** • Password: **tgk** 2. From Admin home page access **User rights** tile. 3. Select user **ADMIN_BDG - Administrator Budget**. 4. In Attribute tab tick **Area Profile** check box. 5. Save. 6. Reach **Restrictions** tabs to assign restrictions. 7. Set **Cost Center (Entity dimension) and Task** as restricted. 8. Save. 9. Click **Define** hyperlink. 10. Set • Action: **Include** • Organization: **04 - Budget View** • Cost Center (Entity dimension): **04|SALES - Sales** 11. Tick **Insert Data** check box. 12. Retain the default settings for **Run Submission tasks and Run operational tasks.** 13. Save. 14. Click Deploy on the top-left corner. 15. Open **Definition results** hyperlink to view results. 16. Go back to **User rights** window. 17. Select user **LEIA - Princess Leia**.

18. In the **Attributes** tab check **Inherit Area Profile from another user** check box.
19. Select **ADMIN_BDG - Administrator Budget** from Area drop-down menu.
20. Reach **Restrictions** tab.
21. Set **Cost Center** (**Entity dimension**) **and Task** as restricted.
22. Save.
23. Click **Define** hyperlink.
24. Set
    - Action: **Include**
    - Organization: **04 - Budget View**
    - Cost Center (Entity dimension): **04|SALES - Sales**
25. Tick **Insert Data** check box.
26. Retain the default settings for **Run Submission tasks** and **Run operational tasks.**
27. Do the same for Cost Center **MRK - Marketing**
28. Retain the default settings for **Run Submission and Run operational tasks.**
29. Save.
30. Click **Deploy** on the top-left corner.
31. Open **Definition results** hyperlink to view results.
32. Notice that Leia has access to all elements under **SLS - Sales** node only.
33. Go back to **User rights** window.

Tasks	Perform the following tasks:
Clone User preferences	1. Select user **LEIA - Princess Leia.**

2. Click  and select **Copy user restrictions and settings from another user**.
3. Select **HAN** as Source user.
4. Leave all check boxes under Restrictions on dimensions ticked.
5. Under Other Restrictions untick
    - **ETL** check box.
    - **Collaborative office**check box.
    - **ETL jobs** check box.
    - **Allocation & Closing routines** check box.
    - **Datasets** check box.
    - **Stored procedures** check box.
    - **Collaborative office: Editing & Submission** check box.
    - **Process Steps** check box.
    - **Reference User** check box.
6. Leave all check boxes under Display and Filter options ticked.
7. Click **OK**.

Need some help?

Here you can find the solutions to the most frequent

technical issues you may get stuck with during the course.

I can't login to the training environment

Make sure you are using the access link provided by the trainer (with the proper 4 digits token if needed!). Events have a starting and ending date/time.

Make sure you are not trying to access the training course too early or too late!

My machine is slow

- Keep in mind that lab configuration may require up to 20 minutes to start from the moment you click on the CCH Tagetik Chrome icon! 

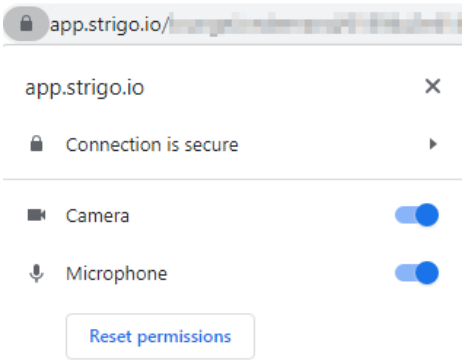

- The local connection's bandwidth is not sufficient for the number of connections currently in place (performance issues on the server side are very rare).

  Solution: ask the IT services to reboot the access point and prefer connection via cable if available.

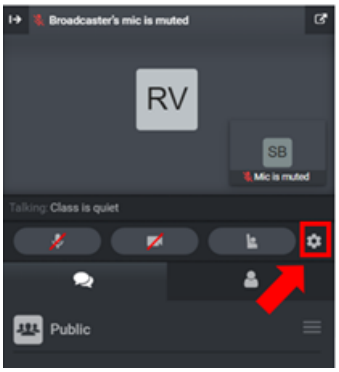

Audio/Video Troubleshooting

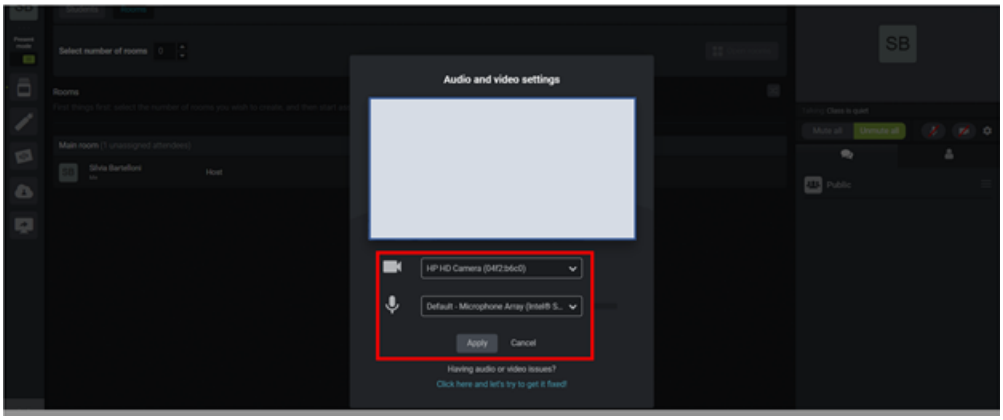

In case you are having problems with audio and video try the following:

1. Make sure you are running a compatible browser (Google Chrome, Mozilla Firefox).
2. Make sure your media devices are connected and are not muted or set to very low volume.
3. Make sure the browser you are in is allowed to use your laptop audio and video

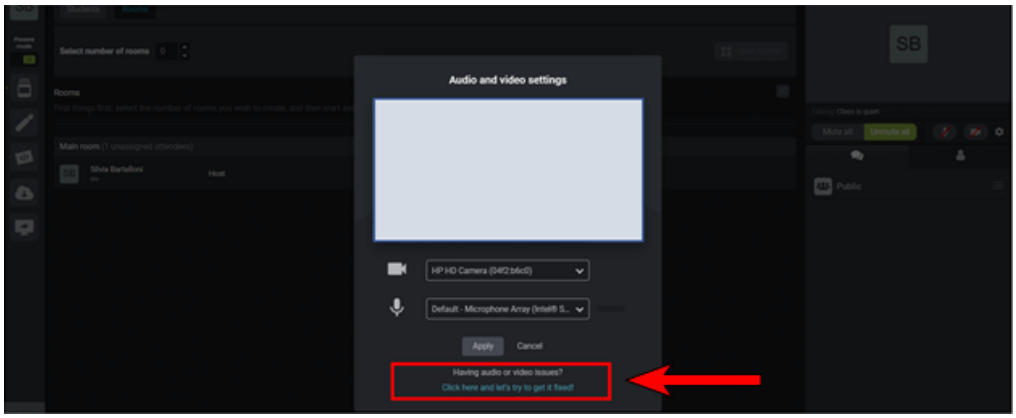

4. Make sure no other applications are running that use your media devices (microphone, camera or speakers).
5. Prevent any ad-blockers or script blockers running on the classroom's tab.
6. Refresh the page.
7. From the right communication panel, click on the settings icon and change the camera/video options selected

Check if there are any errors: if so, they will appear in red.

In addition, you can run a troubleshoot by clicking on: "Let's try and get it fixed" and then on "Run Troubleshoot"

If you still have problems, it could depend on network restrictions.

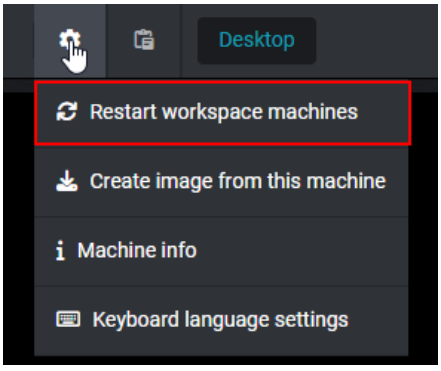

Resolution issues: if you see CCH Tagetik application masks too big in the machine even if I didn't change browser zoom.
Remember, Strigo adapts the machine to your computer resolution. Try to change your resolution or use a different monitor!

⚠ Important: Scaling setting recommended = 100% (max 125%).

Lab troubleshooting while practicing

If you are in your Virtual Machine and you are experiencing a black screen with your lab not starting:

1. Try restarting the machine by clicking on the wheel icon and then on "Restart workspace machine"

2. Try logging out and then log in again after few minutes

⚠ Important:

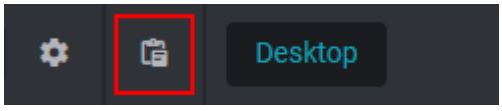

Your machine will be rebooted, but do not panic! No data will be lost. You will need to wait for the OS to restart and CCH® Tagetik to be reloaded though.

3. A pause > restart of the lab should work as well. The pause option is on the top right-hand corner of the screen. The workspace will switch to **Paused** mode, and then you want to really just give it around two minutes. This is usually enough time to let the lab machine be actually stopped, before you go and hit **Resume** again.
4. Try to open the browser in incognito/private mode.
5. Reach out to Strigo support through this link and then click start live chat

I can't copy/paste any content to the virtual machine

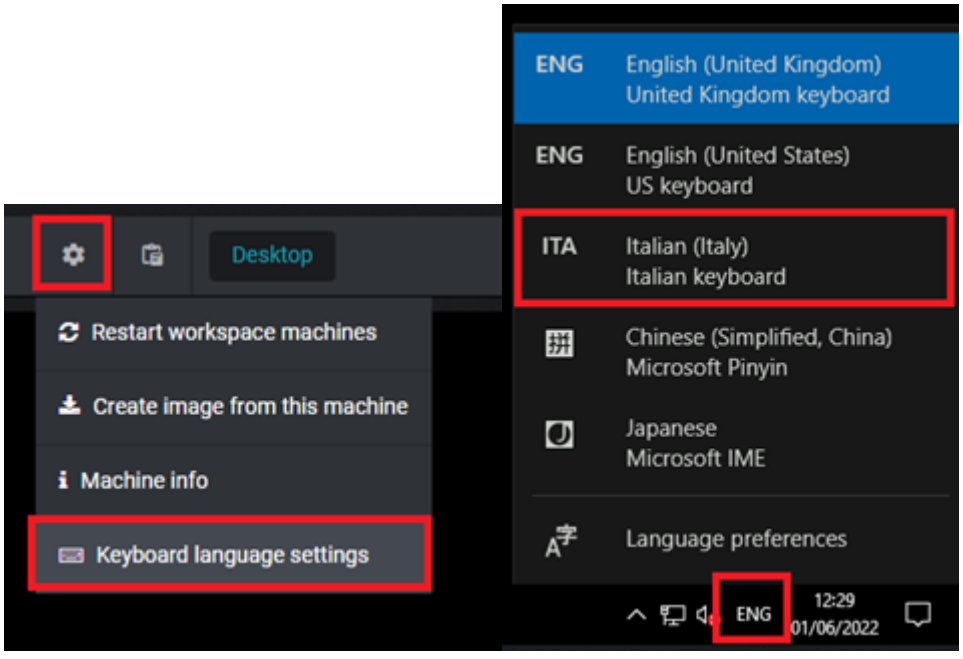

Direct copy/paste is not allowed.

Solution: Use the clipboard icon to copy and paste from the desktop to the virtual machine and viceversa.

I cannot change language in my machine

Solution: Change the language both by desktop bar and by Settings.

MS Excel: I can't select a given form or an object of a form.

This issue happens pretty often and is due to some wizard (e.g. Matrix Wizard, Cell Fields wizard) already open but not currently diplayed on the screen. **When any wizard is open and running, you can't work anywhere else**.

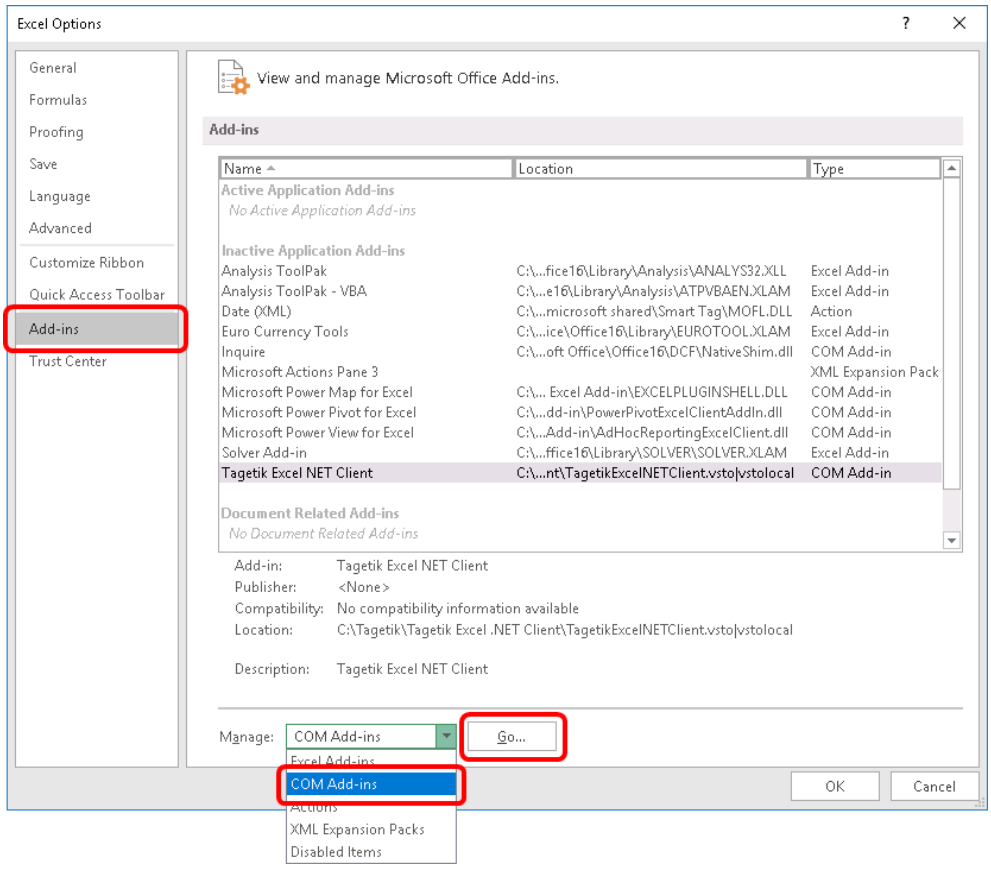

Solution: check if you have any of the wizard open and running (most common: Matrix Wizard, Tab Filters, Form Filters, Cell Fields wizards). If this is the case, be sure to have finished your work on that wizard and close it with OK to confirm. Then go on with your work.

MS Excel: the Tagetik menu is no longer available on the ribbon bar.

Solution1: this probably means the CCH Tagetik add-in has been disabled by MS Excel due to a crash or some errors and has to be enabled again.

Follow the path **File > Options**. Click "**Add-Ins**" on the "**Excel Options**" pane and expand the drop-down menu "**Manage**" on the bottom. Try to select:

1. "**COM Add-Ins**" > "**Go...**". If unticked, tick the "**Tagetik Excel NET Client**" Add-in and click OK
2. "**Disabled items**" > "**Go...**". If you find there the "**Tagetik Excel NET Client**" Add-in, enable it. Close and start Excel.

Solution2: should solution1 not solve the issue, disinstall and reinstall the CCH® Tagetik add-in. Ask the trainer for some help in case.

If you use a 4K resolution monitor, there's a chance you will see far too little

Solution: Low the resolution before the training, then set it back to the original value after the training

My problem is not listed here.

If even this can't solve your problem, please refer to your trainer (and if you are a trainer to your training manager).
