

Planning and Forecasting - Advanced

This training course focuses on the typical aspects of design for planning and forecasting, discussing the data model, the tools to use, the best practices and identifying a common framework of solutions for advanced implementations.

EXERCISE 1 - Dimensions and workflow

Objective	To be able to identify dimensions, processes and steps.
Tasks Examine the requirements and provide a solution design	Perform the following tasks: 1. Open the file **Exercise 1 - A Business case** under the folder **Workshops \ Planning and forecasting advanced \ Exercise 1**. 2. Read the instructions. 3. Refer to the Excel multi-sheet template file **Exercise 1 - B Report list** in the same folder. 4. For planning and forecast process, provide a solution design filling the file **Exercise 1 - C Design proposal**, stating: • dimensions and hierarchies • a sample of the list of elements • workflow by step and tasks.

EXERCISE 2 - Data model update and budget pre-population (1)

Objective	To be able to identify how to upload metadata and data.
Tasks Examine the requirements and provide a solution design	Perform the following tasks: 1. Open the file **Exercise 2 - A Business case** under the folder **Workshops \ Planning and forecasting advanced \ Exercise 2**. 2. Read the instructions 3. Refer to the Excel template in file **Exercise 2 - B Projects data** in the same folder. 4. Provide a solution design filling the file **Exercise 2 - C Design proposal**, stating: • datasets and their structure • the loading tools used • workflow by step and tasks.

EXERCISE 3 - Data model update and budget pre-population (2)

Objective	To upload data and metadata through DTP activity

Tasks
Define Data target mapping to update data model

Perform the following tasks:

Log in the web application:

- User: **HARRY**
- password: **POTTER**

1. Open Analytical Workspace **PFA - Planning advanced**
2. Check the structure of dataset **10 Project plan**
3. Check the Datasource mapping defined to populate dataset from and Excel file
4. Click on Actions and open Data Target Mapping: update data model
5. Add a new mapping:
    - Code: **2**
    - Description: **Upload projects**
    - Dimension type: **Analytical dimension**
    - Analytical dimension: **Project**
6. Map the following fields
    - Code: **Project code**
    - en description: **Project description**
    - Hierarchy: **Hierarchy (for projects)**
    - Node: **Hierarchy (for projects)**
    - Start date: **Start date**
    - End date: **End date**
7. Add a new mapping:
    - Code: **3**

- Description: **Upload singers**
- Dimension type: **Analytical dimension**
- Analytical dimension: **Singer**

8. Map the following fields
   - Code: **Singer**
   - en description: **Singer description**
   -

Tasks
Define DTP operation and loadings to upload metadata and data

Perform the following tasks:

1. Access the structure of DTP **1 Planning prepopulation**
2. Access the Activity **0 Prepopulation projects**
3. Add an operation:
   - Operation type: **Loading to Analytical Workspace**
   - Operation: **1**
   - Description: **Upload project plan**
   - Datasources mapping: **Prepopulation**
4. Add an operation
   - Operation type: **Enrichment with formula**
   - Operation: **2**
   - Description: **Add project code**
5. Access the matching fields:

Target field	SQL formula
PROJECT	PROJECT_CODE

6. Come back to the Activity **0 Prepopulation Projects**
7. Add loadings:
   - Loading type: **Update data model**
   - Loading: 0
   - en description: **Upload projects**

- Sorting: **0**
- Data model mapping: **Upload projects**

8. Add loadings
    - Loading type: **Update data model**
    - Loading: 1
    - en description: **Upload singers**
    - Sorting: **1**
    - Data model mapping: **Upload singers**

Tasks	Perform the following tasks:
Run the DTP to pre-populate planning and update data model	1. Access **PLN70 - Planning 2070** process cockpit from user interface 2. Select the node **00 - Project organization** in Planning step 3. Run **Pre-population** task 4. Select Excel file **Planning data** under the folder **Workshops \ Planning and forecasting advanced \ Exercise 3**. 5. Refresh the process cockpit to see new projects loaded 6. Perform a deployment to assign the workflow to new projects 7. Check the uploaded project plan data in Reporting layer partition of dataset 10 Project plan

EXERCISE 4 - Multi-year planning and unpivoting periods (1)

Objective	To be able to design a solution to manage a multi-year time frame
Tasks Examine the requirements and provide a solution design	Perform the following tasks: 1. Open the file **Exercise 4 - A Business case** under the folder **Workshops \ Planning and forecasting advanced \ Exercise 4**. 2. Read the instructions 3. Refer to the Excel template in file **Exercise 4 - B Data flow** in the same folder. 4. Provide a solution design filling the file **Exercise 4 - C Design proposal**, stating: • datasets and their structure • DTP activities and operations.

EXERCISE 5 - Multi-year planning and unpivoting periods (2)

Objective	To unpivot and make data available in reporting format

Tasks
Define DTP operations

Perform the following tasks:

1. Open Analytical Workspace **PFA - Planning advanced**
2. Add the tile for the dataset:
    - 00 Time management
    - 01 Map expense - account
3. Check the structures and data of the two datasets
4. Check the preview of the datasource:
    - 21 Country attribute
5. Access the structure of DTP **2 Reporting**
6. Access the Activity **0 Unpivot time**
7. Add an operation:
    - Operation type: **Insert with reference dataset**
    - Operation: **1**
    - Description: **Insert planning and open periods**
    - Source dataset: **10 Project plan**
    - Typology: **Reporting layer**
    - Reference dataset: **00 Time management**
8. Add an operation:
    - Operation type: **Enrichment with formula field**
    - Operation: **2**
    - Description: **Unpivot data**
    - Target field: **AMOUNT** - (for calculation)
    - Formula field: **PERIOD_FIELD** - (for calculation)

9. Access the Activity **1 Copy planning on reporting**
10. Add an operation
    - Operation type: **Insert with reference dataset**
    - Operation: **1**
    - Description: **Insert verticalized planning and account mapping**
    - Source dataset: **10 Project plan**
    - Typology: **Unpivot time**
    - Source filter: **AMOUNT<>0**
    - Reference dataset: **01 Map expense-account**
11. Add an operation:
    - Operation type: **Enrichment from other dataset**
    - Operation: **2**
    - Description: **Add currency and CC**
    - Source dataset: **21 Country attribute**
    - Typology: **Reporting layer**
12. Access the matching fields:

Target fields	Source	Relationship type
CC	'PRD'	Attribute
COUNTRY	COUNTRY	Condition
CURRENCY	CURRENCY	Attribute

Tasks	Perform the following tasks:
Run the DTP to move data in reporting dataset	1. Access **PLN70 - Planning 2070** process cockpit from user interface 2. Select the Project **P001 - Lucca Wave** in Planning step 3. Run **Reporting** task

4. Check the data in PLN70 - Planning 70 partition of dataset 20 Reporting.

EXERCISE 6 - Planning adjustment and forecast (1)

Objective	To be able to design a solution to manage adjustments to planning and a multi-year monthly forecast
Tasks Examine the requirements and provide a solution design	Perform the following tasks: 1. Open the file **Exercise 6 - A Business case** under the folder **Workshops \ Planning and forecasting advanced \ Exercise 6**. 2. Read the instructions 3. Refer to the Excel multi-sheet template in file **Exercise 6 - B Planning adj. and Forecast** in the same folder. 4. Provide a solution design filling the file **Exercise 6 - C Design proposal**, stating: • datasets and their structure • DTP activities and operations.

EXERCISE 7 - Planning adjustment and forecast (2)

Objective

To populate forecast scenario with the required calculations

Tasks

Perform the following tasks:

Define DTP Activity to calculate forecast

1. Open Analytical Workspace **PFA - Planning advanced**
2. Add the tile for the dataset:
   - 30 Forecast
   - 31 Inflation
3. Check the structures of the two datasets
4. Check the script of the two datasources:
   - 32 Actual data for forecast
   - 33 Planning data for forecast
5. Access the structure of DTP **3 Forecast**
6. Access the Activity **2 Calculation**
7. Add an operation:
   - Operation type: **Insert from other dataset**
   - Operation: **1**
   - Description: **Insert total actual to-date**
   - Source dataset: **32 Actual data for forecast**
   - Source filter: **PERIOD<${@PER_FCT.code}**
8. Access the matching fields:

Target field	Source	Grouping mode
ACCOUNT	ACCOUNT	GROUP BY
COUNTRY	COUNTRY	GROUP BY
PROJECT	PROJECT	GROUP BY
ACT_TD	AMOUNT	SUM

9. Add an operation:

- Operation type: **Enrichment from other dataset**
- Operation: **2**
- Description: **Planning data for forecast**
- Source dataset: **33 Insert total planning to-date**
- Source filter: **YYYY=left(${@SCE_ACT.code},4) and PERIOD<${@PER_FCT.code}**

10. Access the matching fields:

Target field	Source	Relationship type	Grouping mode
ACCOUNT	ACCOUNT	Condition	GROUP BY
COUNTRY	COUNTRY	Condition	GROUP BY
PROJECT	PROJECT	Condition	GROUP BY
PLN_TD	AMOUNT	Attribute	SUM

11. Add an operation:
    - Operation type: **Join from other dataset**
    - Operation: **3**
    - Description: **Join total full planning**
    - Source dataset: **33 Planning data for forecast**
12. Access the matching fields:

Target field	Source	Relationship type	Grouping mode
ACCOUNT	ACCOUNT	Condition	GROUP BY
COUNTRY	COUNTRY	Condition	GROUP BY
PROJECT	PROJECT	Condition	GROUP BY
TOTAL	AMOUNT	Attribute	SUM

13. Add an operation:
    - Operation type: **Enrichment with formula**
    - Operation: **4**
    - Description: **Coefficient calculation**
14. Access matching fields:

Target field	SQL formula
COEFFICIENT	(TOTAL- ACT_TD) / (TOTAL-PLN_TD)

15. Add an operation:
    - Operation type: **Join from other dataset**
    - Operation: **5**
    - Description: **Insert planning periods**
    - Source dataset: **33 Planning data for forecast**
    - Source filter: **(YYYY=left(${@SCE_ACT.code},4) and**

      PERIOD>=${@PER_FCT.code})

      or

      YYYY<>left(${@SCE_ACT.code},4)
    -
16. Access the matching fields:

Target field	Source	Relationship type
ACCOUNT	ACCOUNT	Condition
AMOUNT	AMOUNT	Attribute
CC	CC	Attribute
COUNTRY	COUNTRY	Condition
CURRENCY	CURRENCY	Attribute
EXPENSE	EXPENSE	Attribute
PERIOD	PERIOD	Attribute
PROCESS	PROCESS	Attribute
PROJECT	PROJECT	Condition
SCENARIO	SCENARIO	Attribute
SINGER	SINGER	Attribute
YYYY	YYYY	Attribute

17. Add an operation:
    - Operation type: **Enrichment with reference** dataset
    - Operation: **6**
    - Description: **Enrich with inflation**
    - Reference dataset: **31 Inflation**
18. Add an operation:

- Operation type: **Enrichment with formula**
- Operation: **7**
- Description: **Apply coefficient**

19. Access matching fields:

Target field	SQL formula
AMOUNT	AMOUNT*COEFFICIENT*COMPOUND_RATE

20. Add an operation:
    - Operation type: **Allocations**
    - Operation: **8**
    - Description: **Allocation of actuals**
    - Dataset to be allocated: **30 Forecast**
    - Typology: **Actuals to allocate**
    - Driver dataset: **30 Forecast**
    - Driver typology: **Planning drivers**
21. Access details and add a row:
    - Data to allocate:
        - Code: **0**
        - Description: **Allocation of actuals**
        - Measure: **AMOUNT**
    - Driver:
        - Driver measure: **AMOUNT**

Allocate on	Filters	Other filters based on data to allocate
Process		None
Year		Filter
Project		Filter
Singer: **flag**		None
Expense: **flag**		None

Country		Filter
Account		Filter

Tasks

Perform the following tasks:

Run the DTP to move data in reporting dataset

1. Access **F1070 - Forecast Oct 70** process cockpit from user interface
2. Select the Project **P001 - Lucca Wave** in Forecast step
3. Run **Forecast model** task
4. Select:
   - 1st forecast period: **10 - October**
   - Actual scenario: **2070ACT - 2070 Actual**
   - Forecast source: **PLN70 - Planning 2070**
5. Run the Forecast result task. Data in Calculated sheet should be equal to data in Check sheet.

EXERCISE 8 - Advanced allocations (optional)

Objective	To be able to correctly use the advanced features of the Allocation engine and understand the effect of changing filter and grouping settings

Tasks Open the Allocation Routine configured in the web interface	Perform the following tasks: 1. Select Data processing > Allocations & Closing > Routine 2. Choose the Routine ALL - Allocation example and select Actions > Rule

Tasks Modify the settings to achieve the correct result	Perform the following tasks: 1. Open the file **Exercise 8 - Advanced Allocation** under the folder **Workshops \ Planning and forecasting advanced \ Exercise 8**. This file contains a number of allocation result which must be achieved, expressed as Excel Formulas 2. For each of the examples in the Data Entry Form modify the settings in the tab **Driver** 3. Login to the Excel CCH Tagetik interface 4. Open the form **PFA_EX08 – Allocation** in Data Entry mode, choosing the process **DE – Data Entry** 5. Press the button **'Run Allocation'** 6. Once the allocations has run, if the setting has been configured correctly in 'Calculated Result' will be equal to 'CCH Tagetik Result'

Need some help?

Here you can find the solutions to the most frequent

technical issues you may get stuck with during the course.

I can't login to the training environment

Make sure you are using the access link provided by the trainer (with the proper 4 digits token if needed!). Events have a starting and ending date/time.

Make sure you are not trying to access the training course too early or too late!

My machine is slow

- Keep in mind that lab configuration may require up to 20 minutes to start from the moment you click on the CCH Tagetik Chrome icon! 

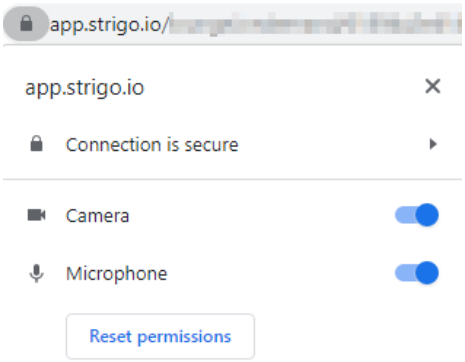

- The local connection's bandwidth is not sufficient for the number of connections currently in place (performance issues on the server side are very rare).

  Solution: ask the IT services to reboot the access point and prefer connection via cable if available.

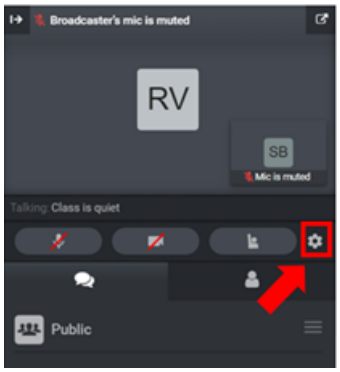

Audio/Video Troubleshooting

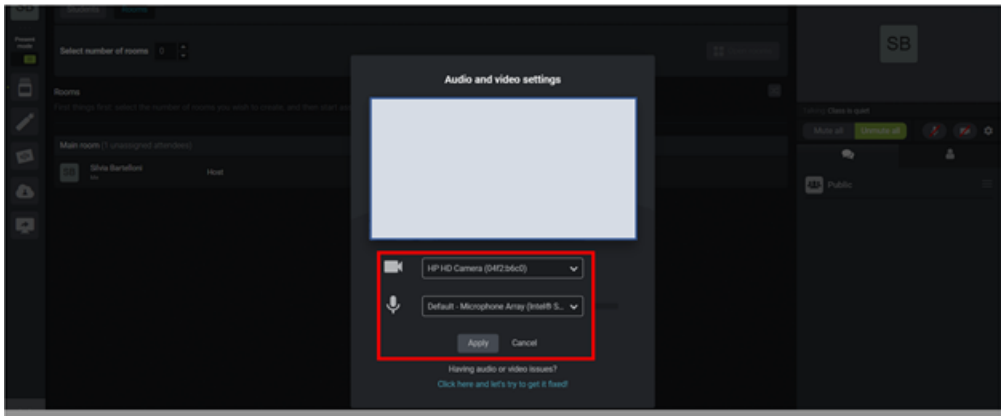

In case you are having problems with audio and video try the following:

1. Make sure you are running a compatible browser (Google Chrome, Mozilla Firefox).
2. Make sure your media devices are connected and are not muted or set to very low volume.
3. Make sure the browser you are in is allowed to use your laptop audio and video

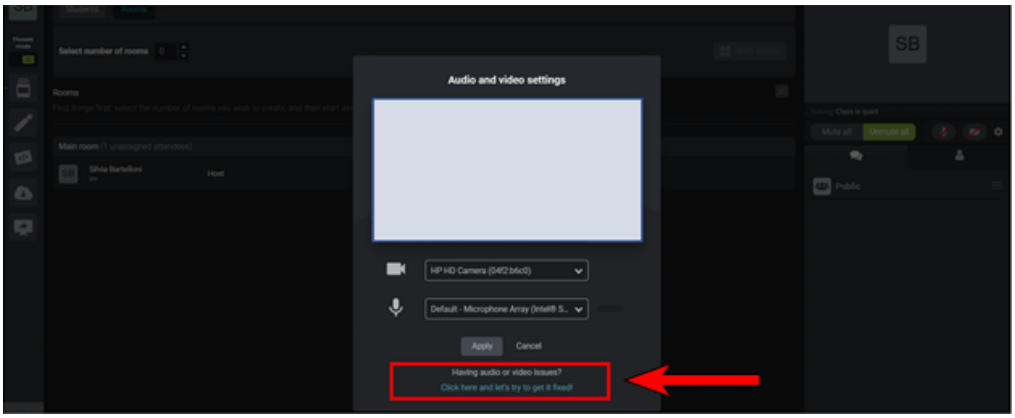

4. Make sure no other applications are running that use your media devices (microphone, camera or speakers).
5. Prevent any ad-blockers or script blockers running on the classroom's tab.
6. Refresh the page.
7. From the right communication panel, click on the settings icon and change the camera/video options selected

Check if there are any errors: if so, they will appear in red.

In addition, you can run a troubleshoot by clicking on: "Let's try and get it fixed" and then on "Run Troubleshoot"

If you still have problems, it could depend on network restrictions.

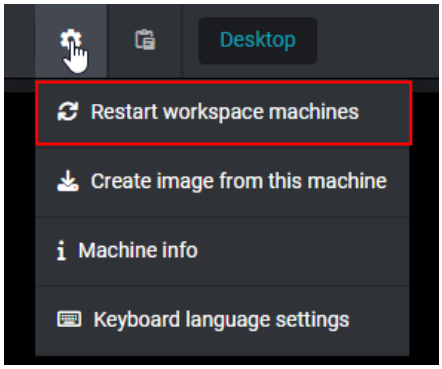

Resolution issues: if you see CCH Tagetik application masks too big in the machine even if I didn't change browser zoom.
Remember, Strigo adapts the machine to your computer resolution. Try to change your resolution or use a different monitor!

⚠ Important: Scaling setting recommended = 100% (max 125%).

Lab troubleshooting while practicing

If you are in your Virtual Machine and you are experiencing a black screen with your lab not starting:

1. Try restarting the machine by clicking on the wheel icon and then on "Restart workspace machine"

2. Try logging out and then log in again after few minutes

⚠ Important:

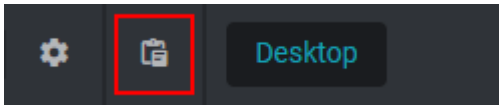

Your machine will be rebooted, but do not panic! No data will be lost. You will need to wait for the OS to restart and CCH® Tagetik to be reloaded though.

3. A pause > restart of the lab should work as well. The pause option is on the top right-hand corner of the screen. The workspace will switch to **Paused** mode, and then you want to really just give it around two minutes. This is usually enough time to let the lab machine be actually stopped, before you go and hit **Resume** again.
4. Try to open the browser in incognito/private mode.
5. Reach out to Strigo support through this link and then click start live chat

I can't copy/paste any content to the virtual machine

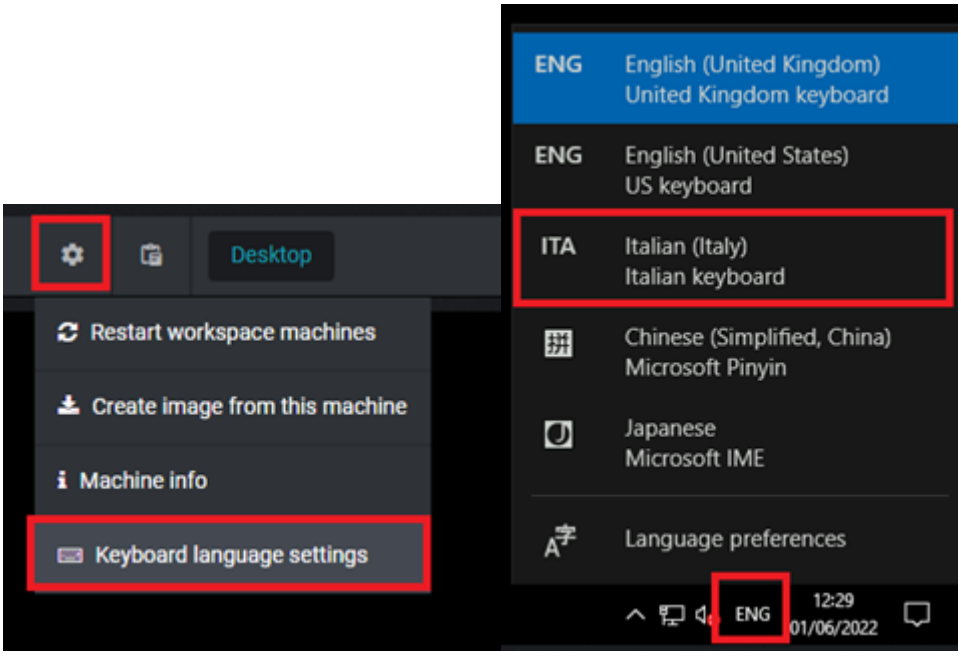

Direct copy/paste is not allowed.

Solution: Use the clipboard icon to copy and paste from the desktop to the virtual machine and viceversa.

I cannot change language in my machine

Solution: Change the language both by desktop bar and by Settings.

MS Excel: I can't select a given form or an object of a form.

This issue happens pretty often and is due to some wizard (e.g. Matrix Wizard, Cell Fields wizard) already open but not currently diplayed on the screen. **When any wizard is open and running, you can't work anywhere else**.

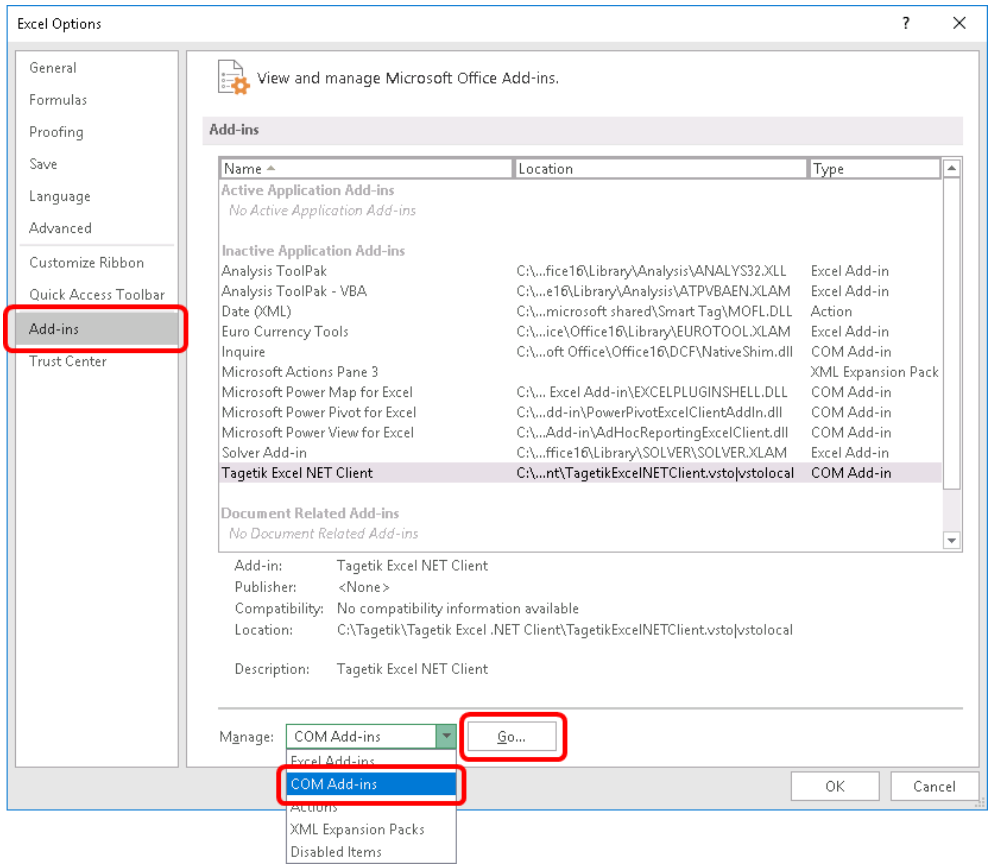

Solution: check if you have any of the wizard open and running (most common: Matrix Wizard, Tab Filters, Form Filters, Cell Fields wizards). If this is the case, be sure to have finished your work on that wizard and close it with OK to confirm. Then go on with your work.

MS Excel: the Tagetik menu is no longer available on the ribbon bar.

Solution1: this probably means the CCH Tagetik add-in has been disabled by MS Excel due to a crash or some errors and has to be enabled again.

Follow the path **File > Options**. Click "**Add-Ins**" on the "**Excel Options**" pane and expand the drop-down menu "**Manage**" on the bottom. Try to select:

1. "**COM Add-Ins**" > "**Go...**". If unticked, tick the "**Tagetik Excel NET Client**" Add-in and click OK
2. "**Disabled items**" > "**Go...**". If you find there the "**Tagetik Excel NET Client**" Add-in, enable it. Close and start Excel.

Solution2: should solution1 not solve the issue, disinstall and reinstall the CCH® Tagetik add-in. Ask the trainer for some help in case.

If you use a 4K resolution monitor, there's a chance you will see far too little

Solution: Low the resolution before the training, then set it back to the original value after the training

My problem is not listed here.

If even this can't solve your problem, please refer to your trainer (and if you are a trainer to your training manager).
