1. Introduction 1
2. CCH Tagetik download files 1
3. Import the Demo Environment and the Machine Learning Model Library 2

1. Introduction

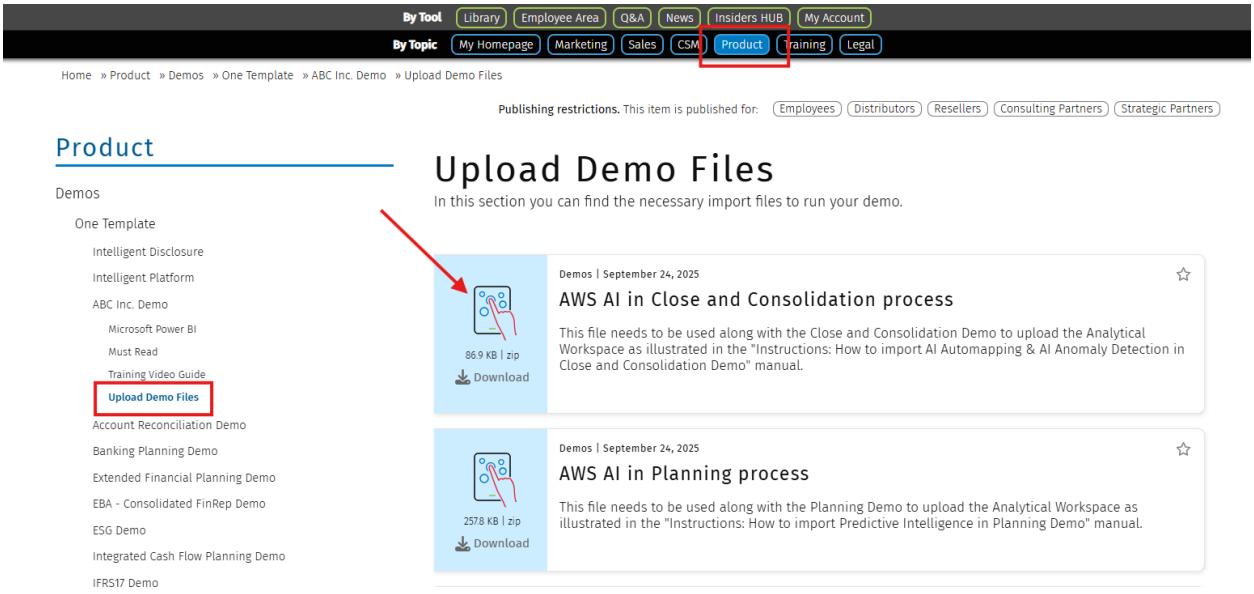

This User Guide describes how to import the Demo environment and the Machine Learning Model library into your Demo hub Machine, so you can use it to practice. This Guide assumes you have logged into the Demo hub with your credentials and created your own machine with the **One Template** Template.

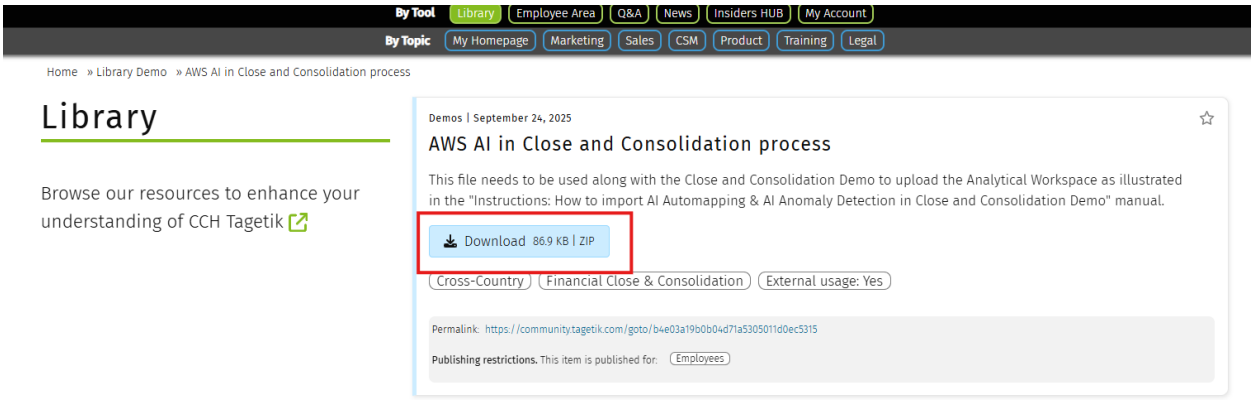

2. CCH Tagetik download files

To access the URL to download the files, go to the Tagetik community:

[Upload Demo Files | CCH Tagetik Community]

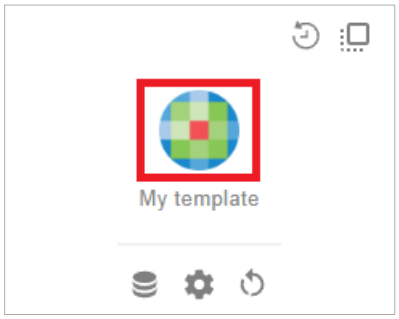

1. Click on “AWS AI in Close and Consolidation Process” and download the file

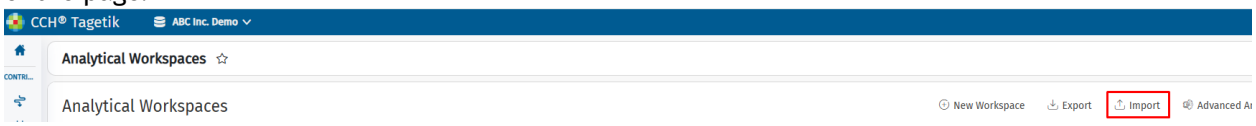

3. Import the Demo Environment and the Machine Learning Model Library

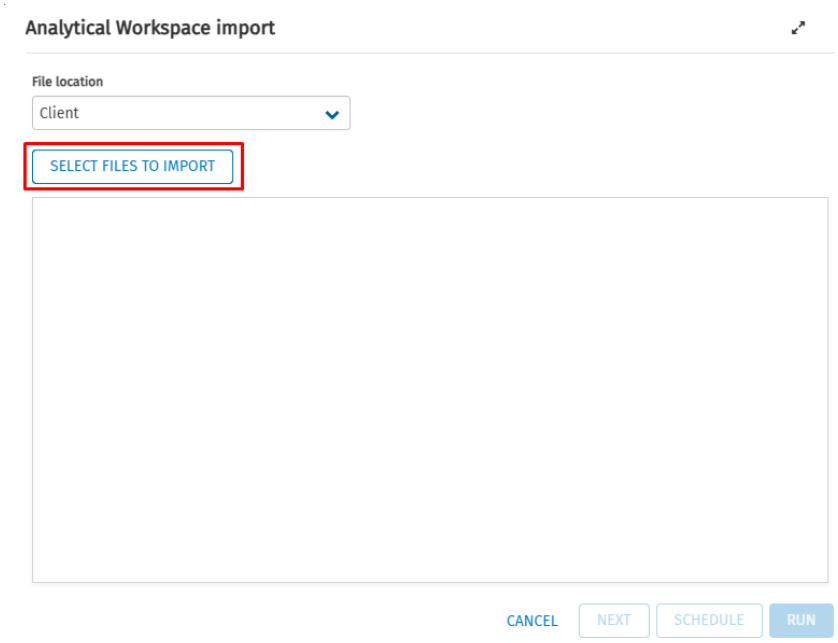

Log into **Tagetik**. The user is *cch@demohub.tagetik.com*;

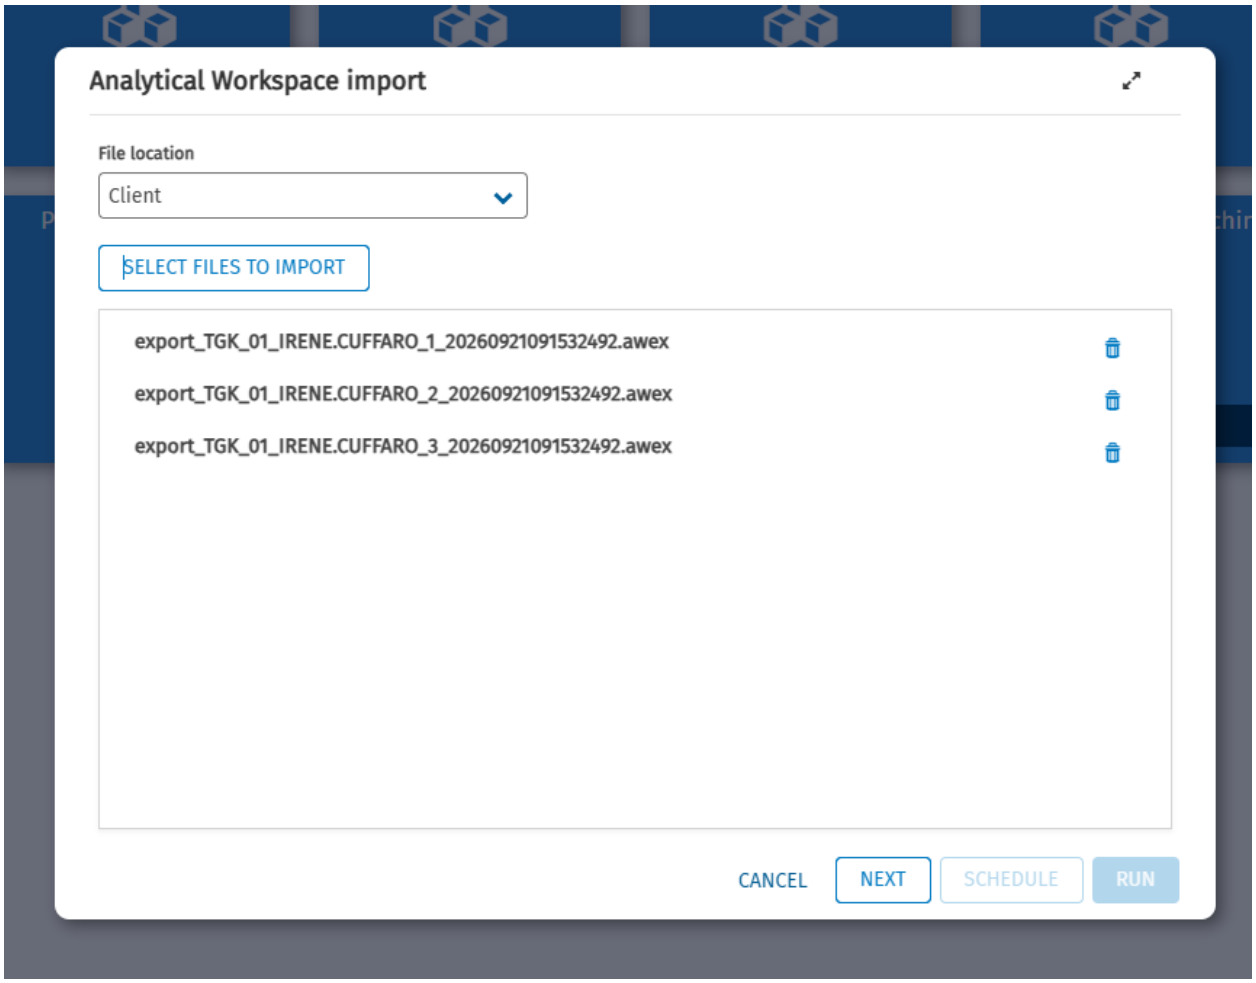

1. Choose the db “ABC Inc. Demo” from the list and switch to the new UI interface (if you see the old one), then go to the “Analytic Information Hub” section, click on the **import** button on the top right of the page.

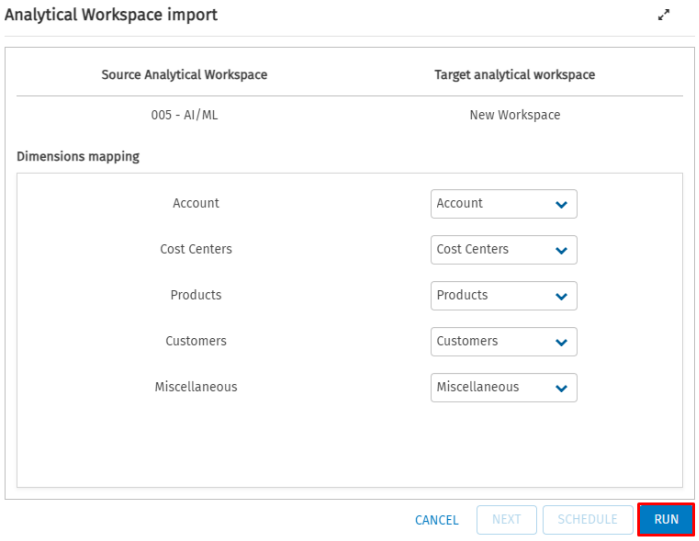

2. Unzip the file you downloaded from the Tagetik Community at the step 1 of the “CCH Tagetik download files” chapter, then click the button “SELECT FILES TO IMPORT” and choose all the files in your unzipped folder;

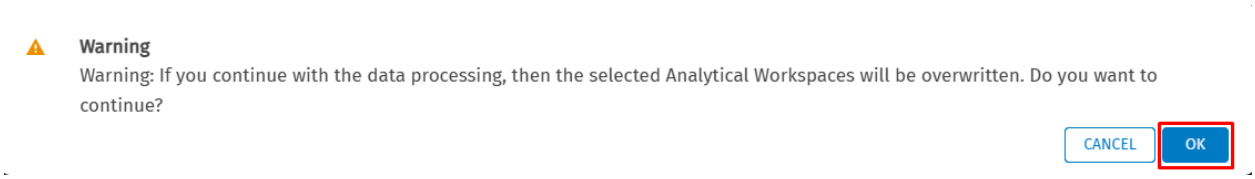

3. Click **Next**.

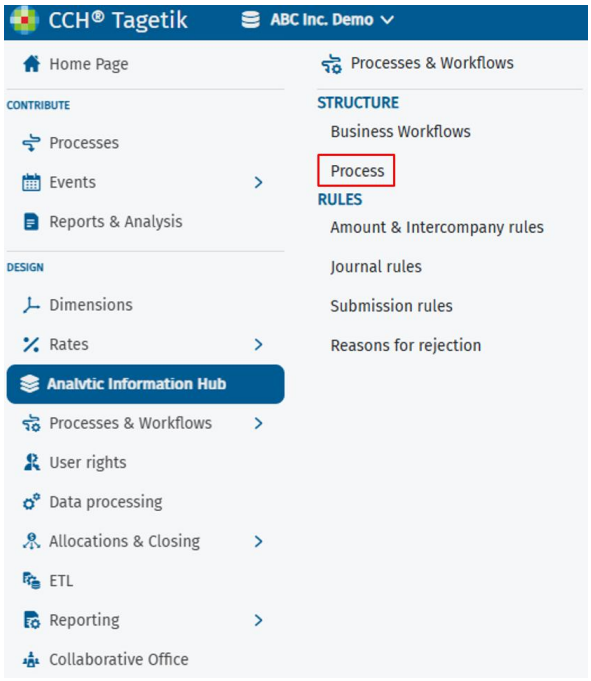

4. Click **Run** and proceed also if there is a warning (second screenshot).

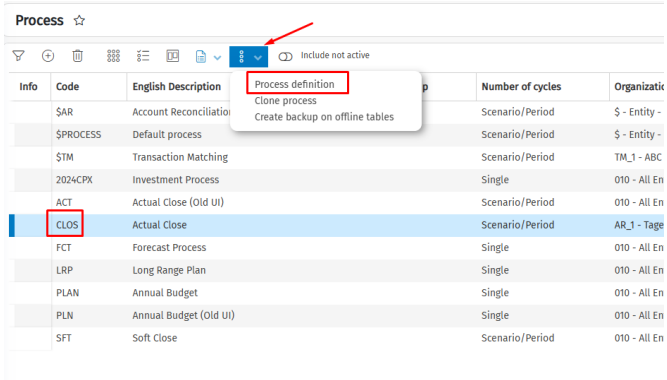

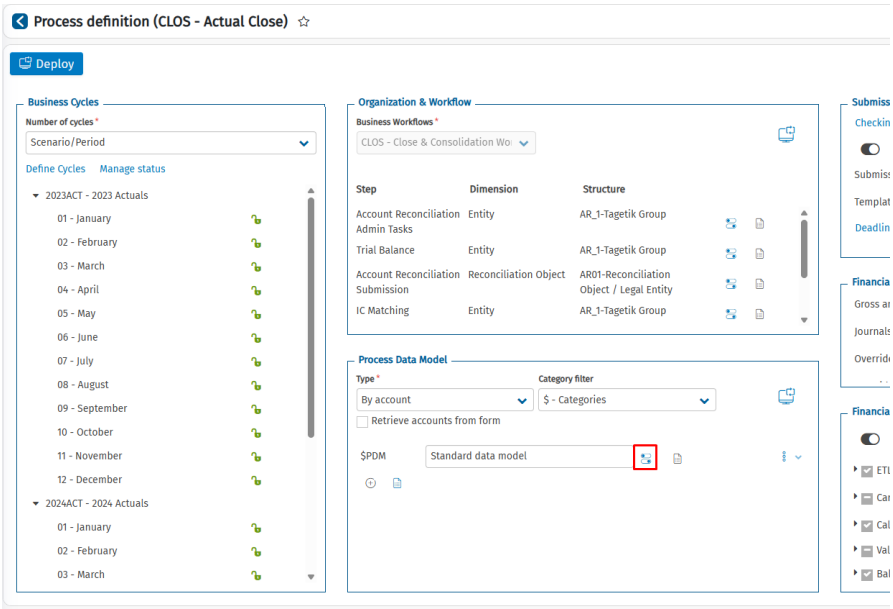

5. Click **Processes & Workflows**, then go into the Process structure.

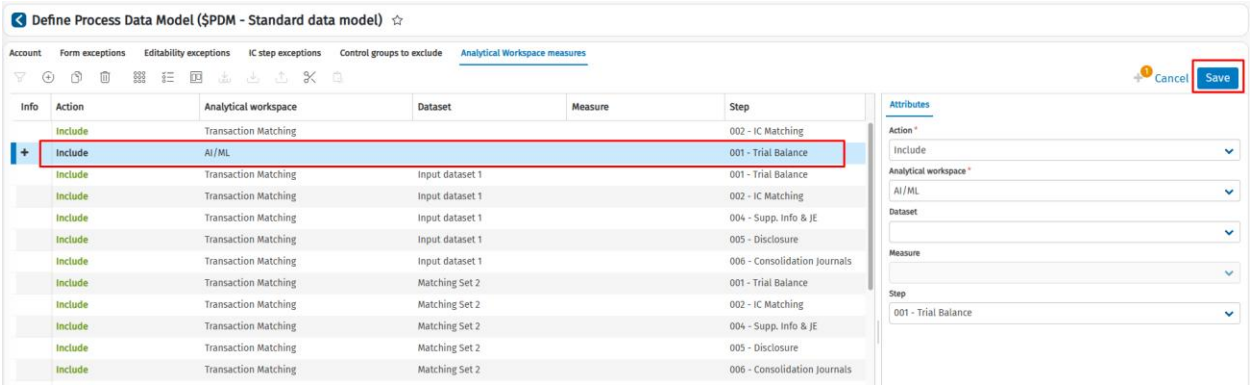

6. Select the **CLOS** code, click the three dots icon, and select **Process Definition**.

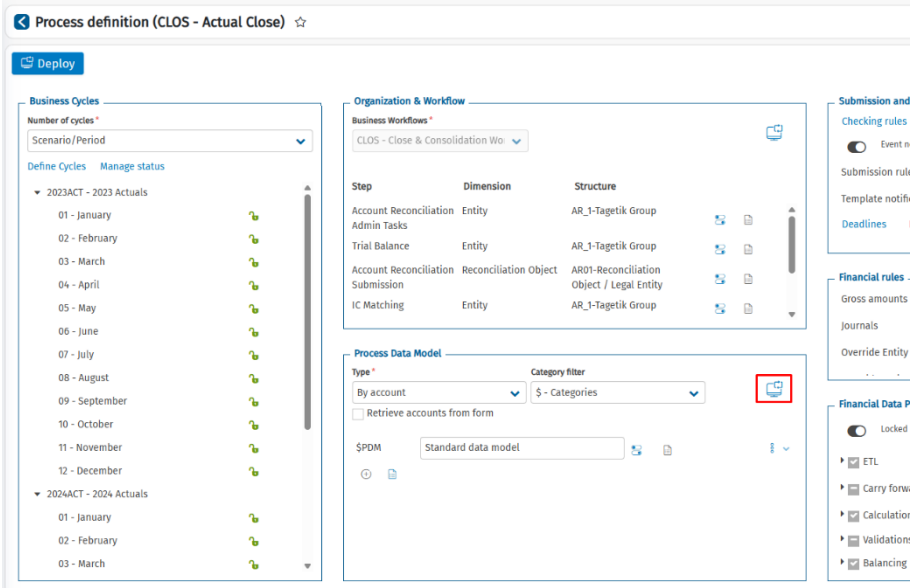

7. Click the $PDM Data Model definition icon.

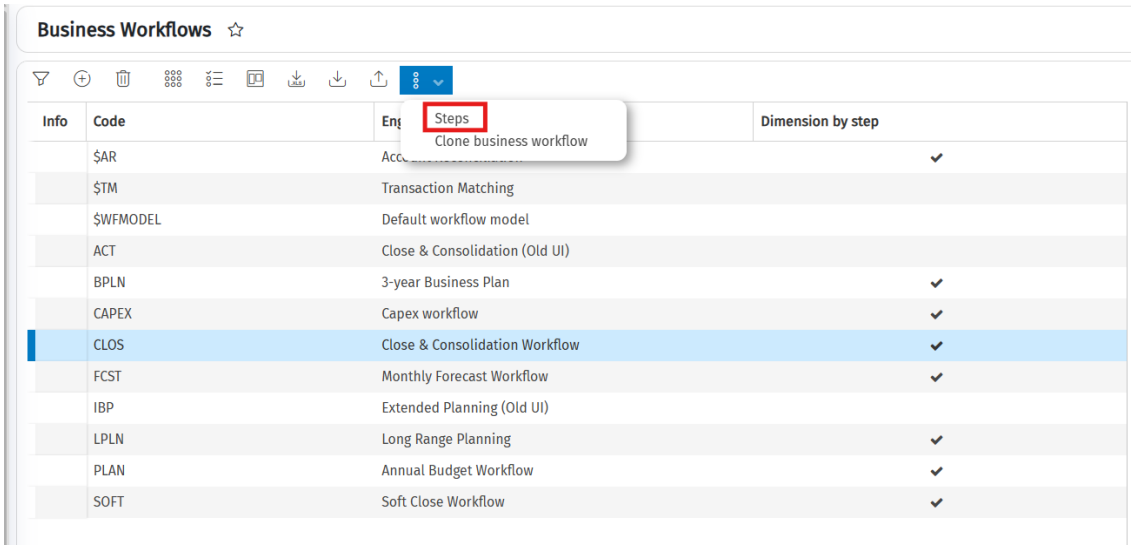

8. From the Analytical Workspace measures tab, add the following row then save.

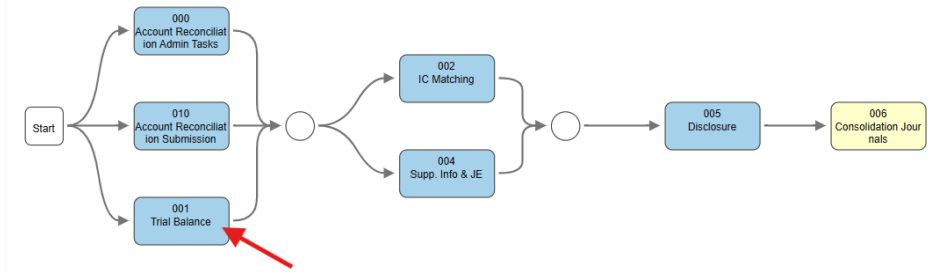

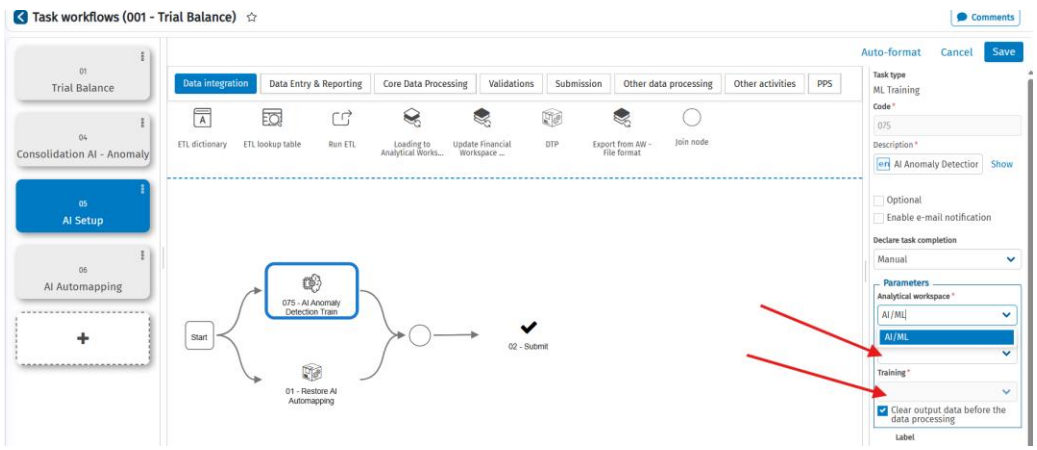

9. From the Process Definition screen, **deploy** the "Process Data Model" section if you added the row above.

10. Close the Process Tab.
11. Before running the Train and Execute tasks, check the Business Workflow to ensure that the fields related to the ML tasks are properly filled out and all required fields are completed correctly.

⚠ **WARNING:** For Demo purposes, no ML processes (Train and/or Execute) need to be executed. Attempting to run them will result in failure and generate an error. For proper execution, please contact the Innovation Team for immediate assistance.
