1 - How to create a Reverse using Consolidation Journal - (Consolidator Process)

Raymond Chabot Grant Thornton

Purpose of Document

• Use the following instructions to test and understand the reverse option in Consolidation Journals.

• Responsible for the test:
• Test Date:

Alert!

Area: Consolidation Journals
Scenario Description: Check that the data is correct when using the reverse option. It is necessary to take the example at the end of the year 2022ACT Period 12. When executing the CarryForward for the year 2023ACT Period 1, the carry forward with the reversal will be reflected.

Case Description:
• Verify that the reversion is executed correctly.

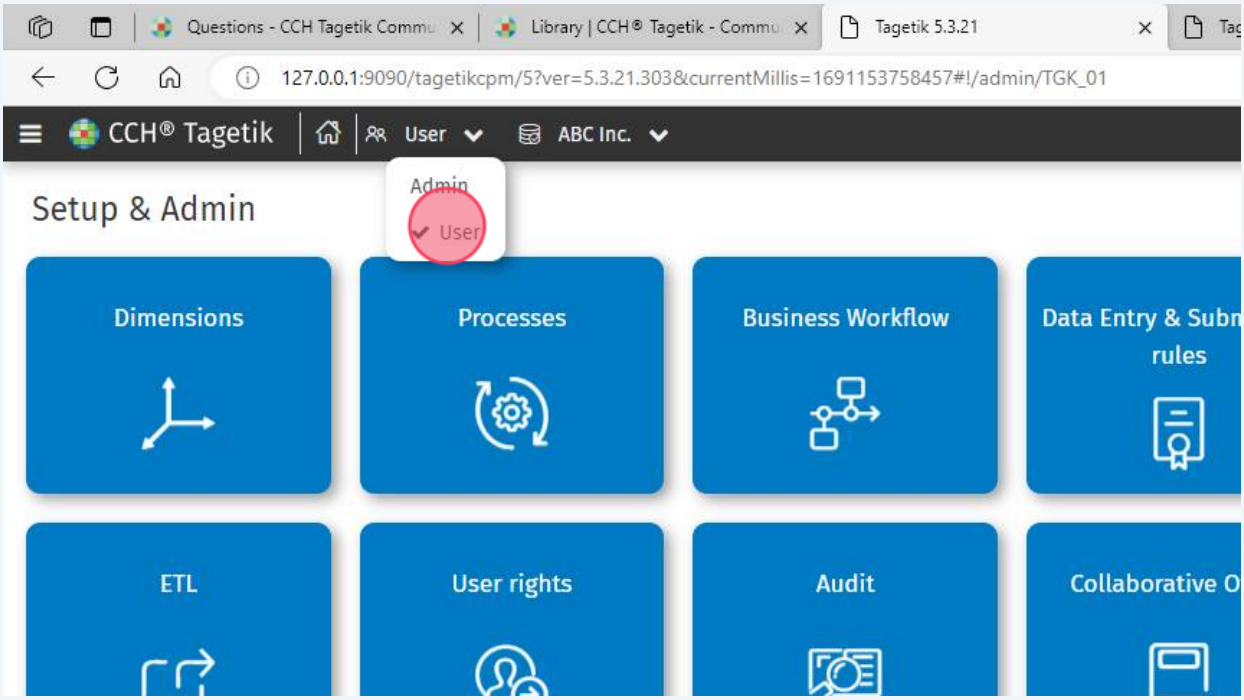

Pre-Requisite:
1. The reverse option (Method 1) has to be already set on the previous scenario journal header, max period (e.g. scenario 2022ACT period 12)
2. The preliminary data processing-reverse has to be enabled on the Process.
3. In the variation control groups you need to have set the Reverse variation.
4. It is necessary to run carry forwards/preliminary data processing on the analysis scenario (e.g. scenario 2023ACT period 1

Reverse Method 1 : "Set BS accounts to 0" Reverse journal type ("1")

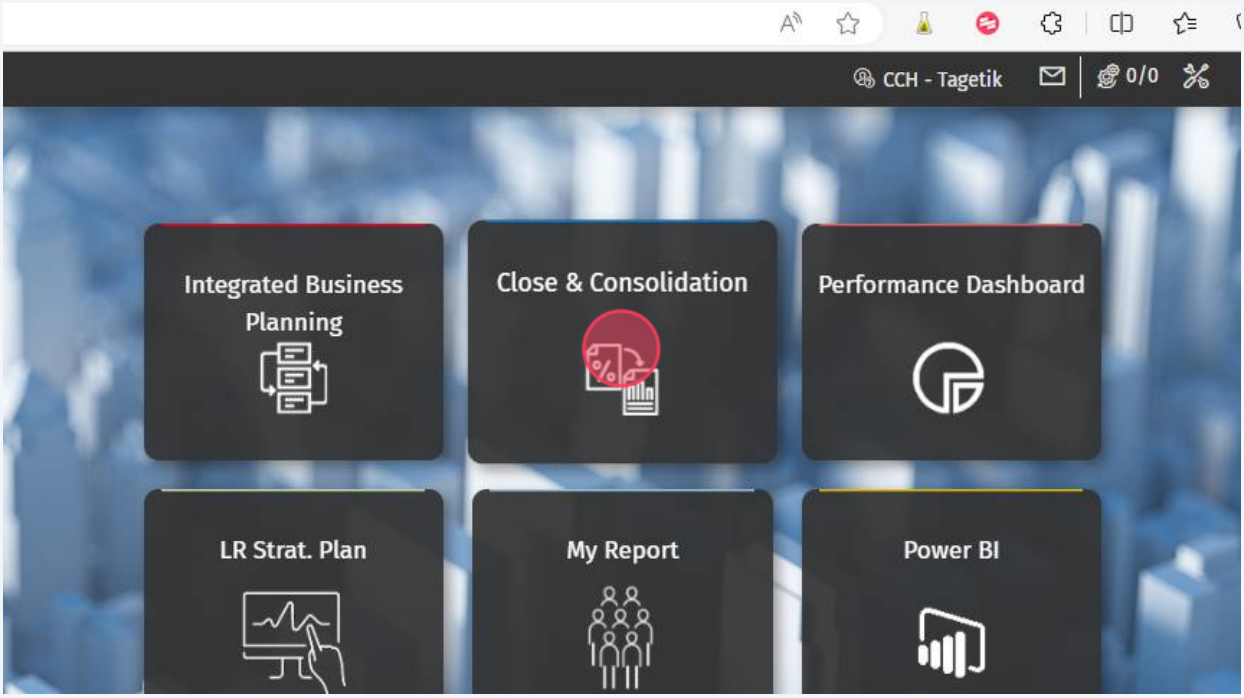

1 STEP-BY-STEP
Connect with your credentials.

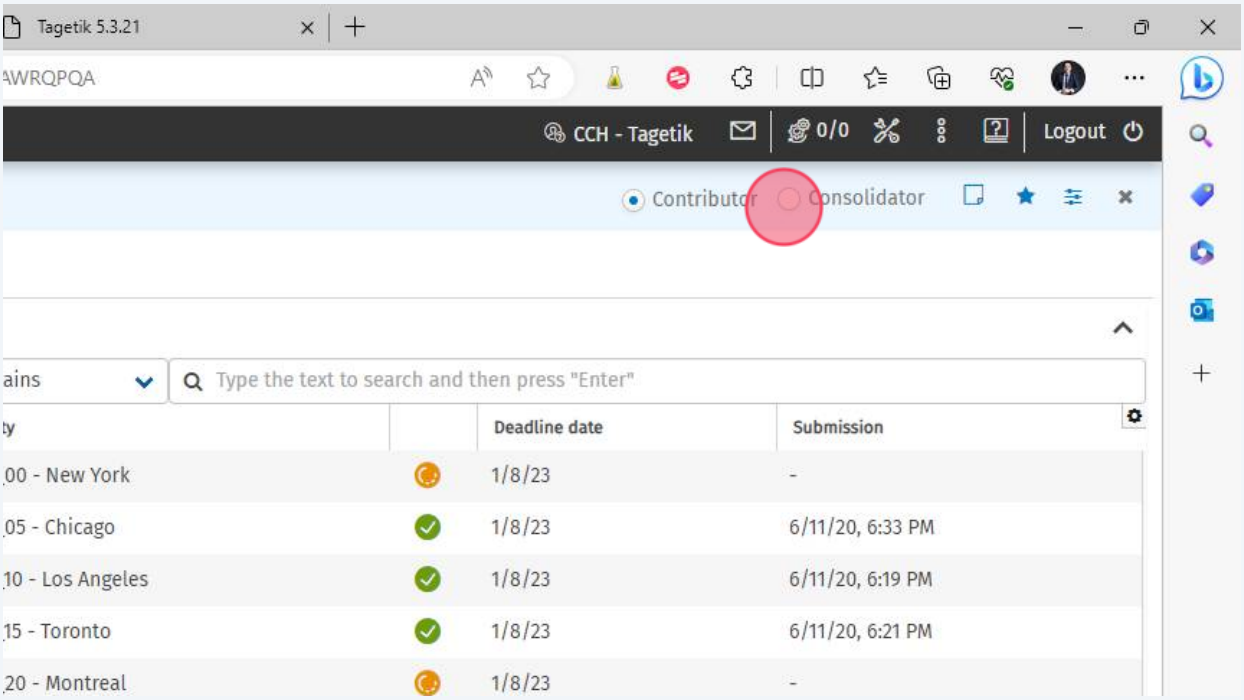

2 Go to "User" mode
