Carry Forward: How To

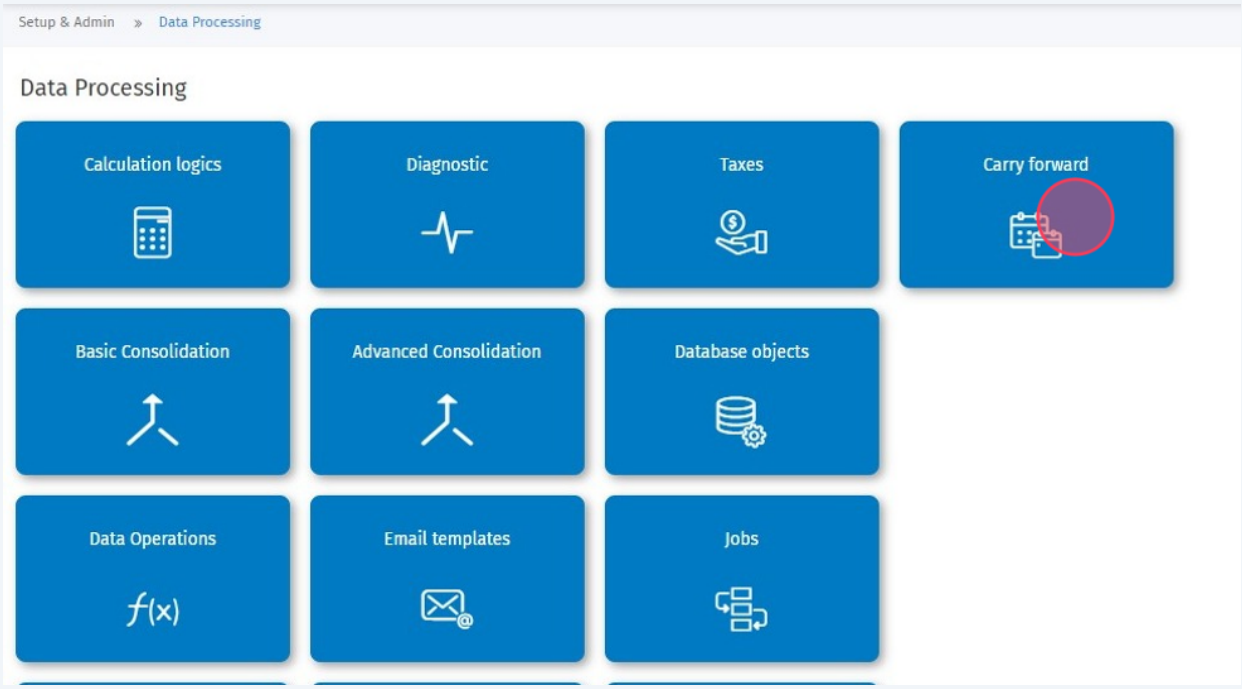

This document explains how to run a carry forward on the original and/or consolidation scenario. It also explains how to correct the common errors.

The carry forward is needed on both the original scenarios and consolidation scenarios. Both the contributor and the consolidator should be able to run the carry forward on the original scenarios. However, only the consolidator should be able to run the carry forward on the consolidation scenarios.

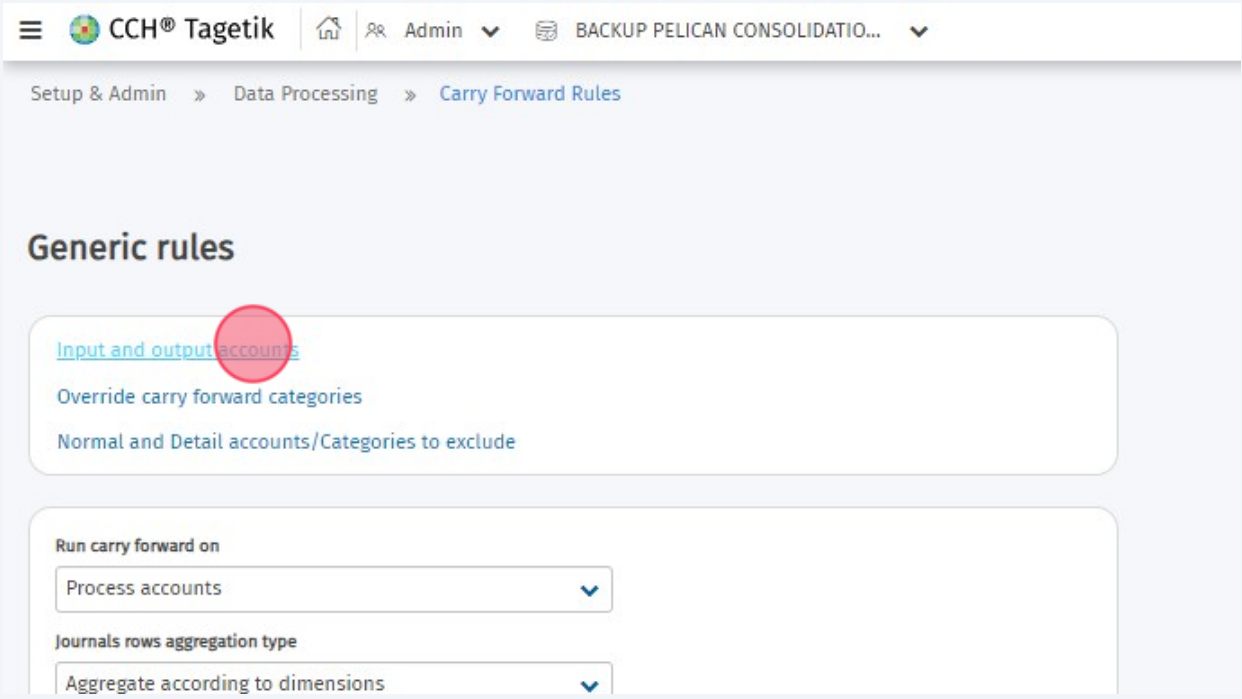

1 To view the carry forward rules, go to the "Admin" page, click on "Data Processing"

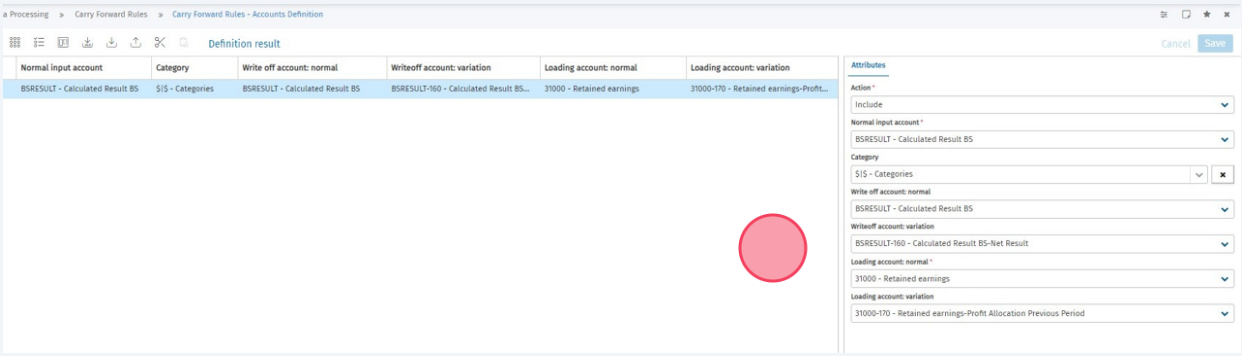

2 Click on "Carry forward"

3 Click on "Input and output accounts".

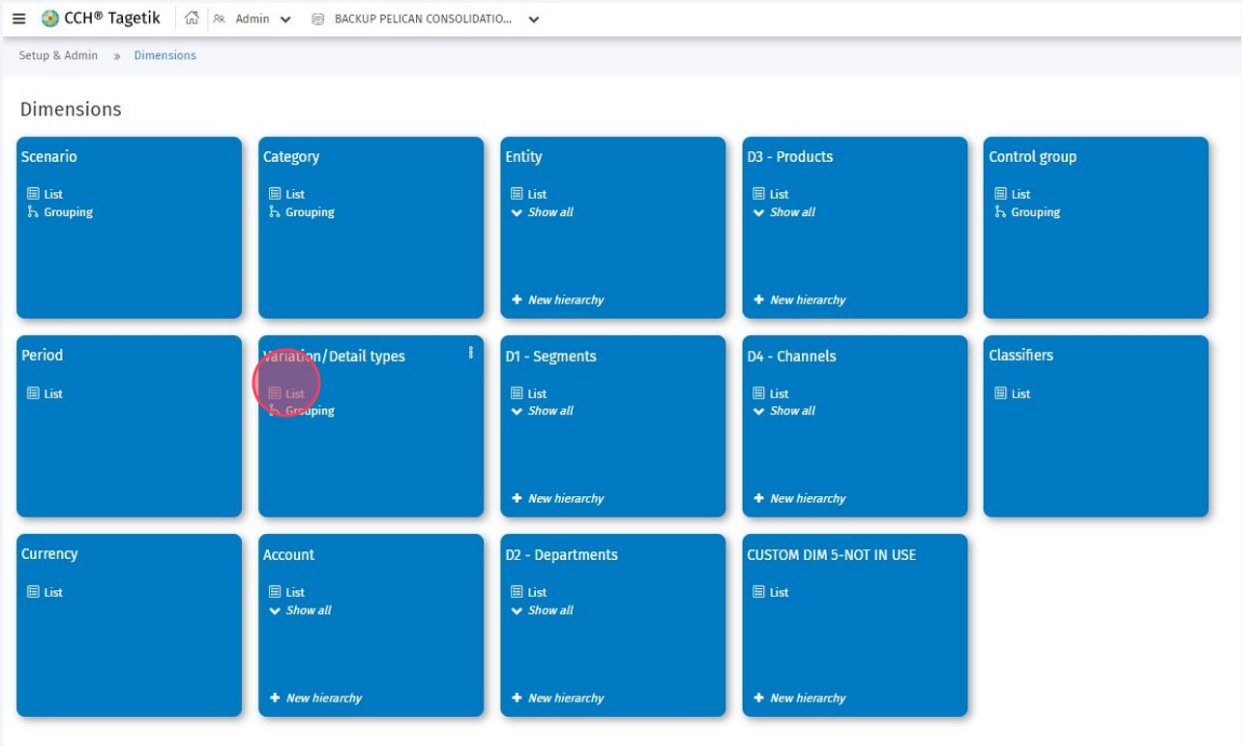

4 The rules of how the Profit for the period is allocated to the retained earnings and any other rules of reallocation will be set up here.

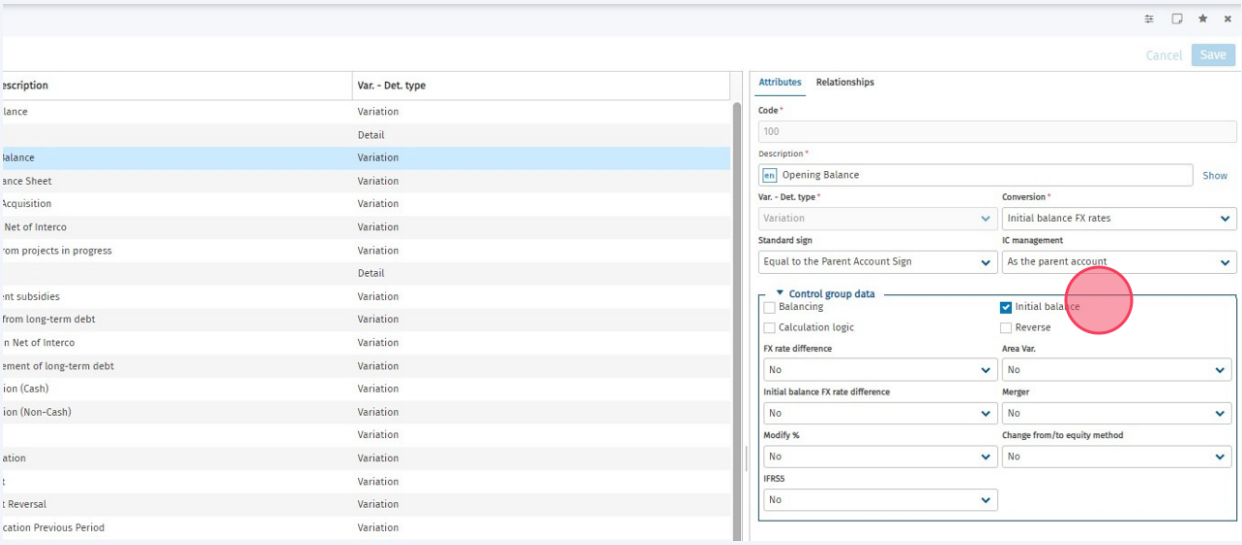

Additionally, all balance sheet accounts are expected to have an initial balance that is carried forward from the previous scenario. The set up is summarised below.

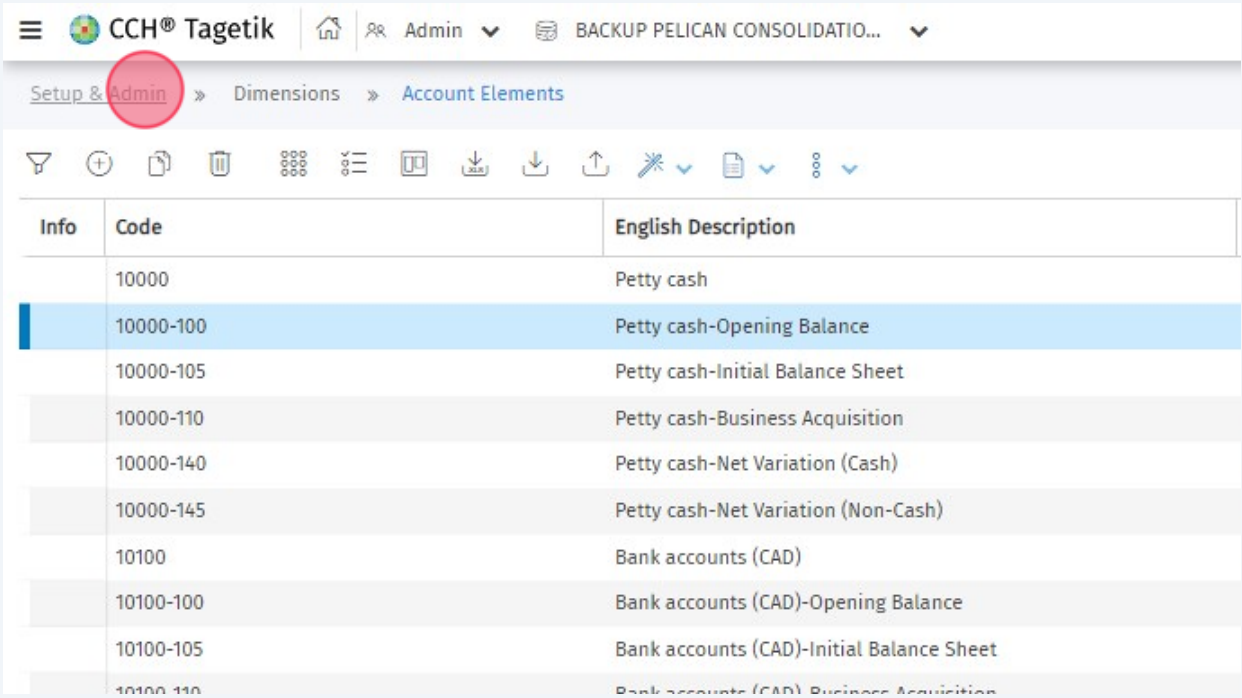

5 There is an "Variation/Detail types" element dedicated to "Initial Balance". To view this , go the "Dimensions" and "Variation/Detail types".

6 Select the code "100".

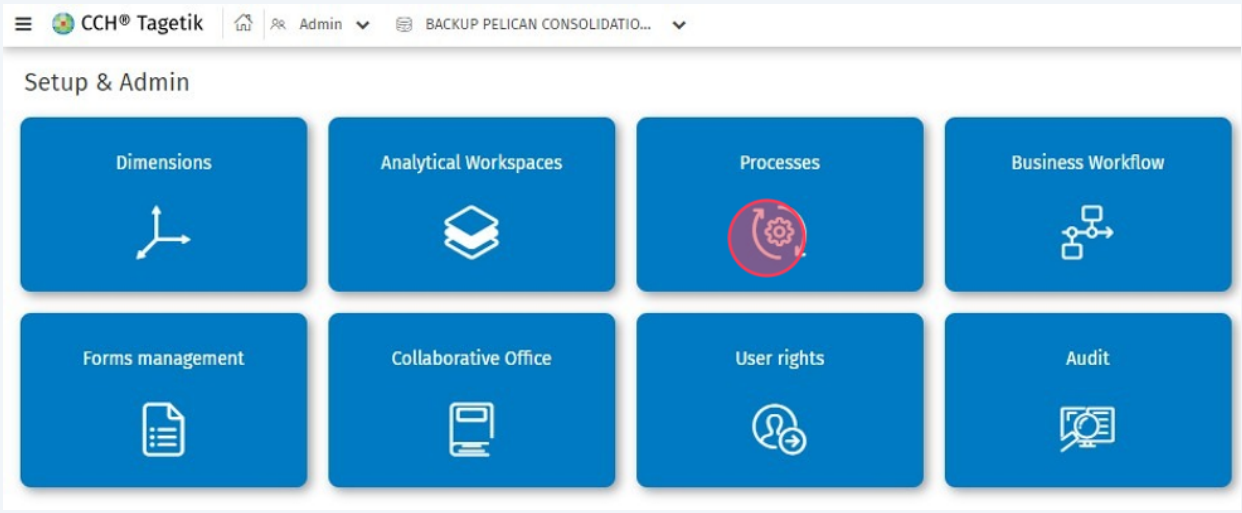

7 On the account dimension, all balance sheet accounts should have an initial balance variation.

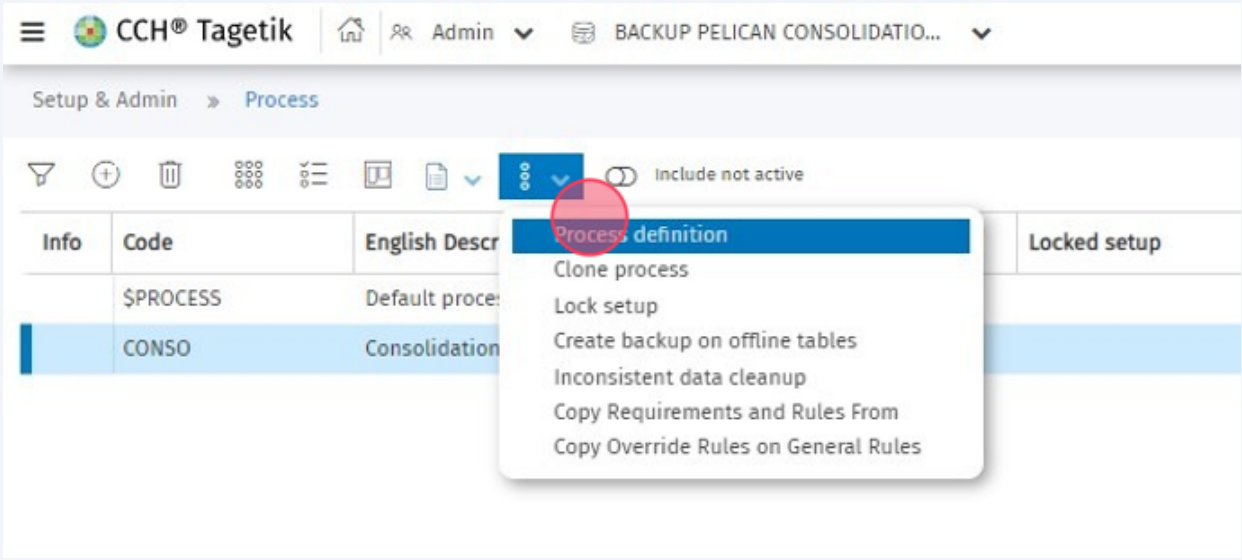

Info	Code	English Description
	10000	Petty cash
	10000-100	Petty cash-Opening Balance
	10000-105	Petty cash-Initial Balance Sheet
	10000-110	Petty cash-Business Acquisition
	10000-140	Petty cash-Net Variation (Cash)
	10000-145	Petty cash-Net Variation (Non-Cash)
	10100	Bank accounts (CAD)
	10100-100	Bank accounts (CAD)-Opening Balance
	10100-105	Bank accounts (CAD)-Initial Balance Sheet

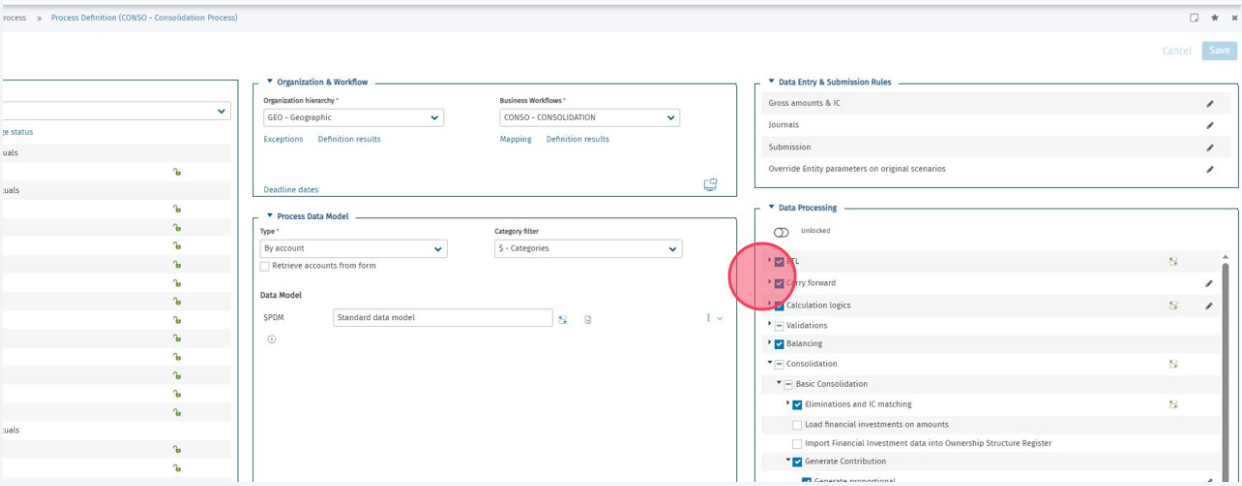

8 On the "Process", the "Carry Forward" elaboration should be enabled. To view this, click on "Process".

9 Click "Process definition"

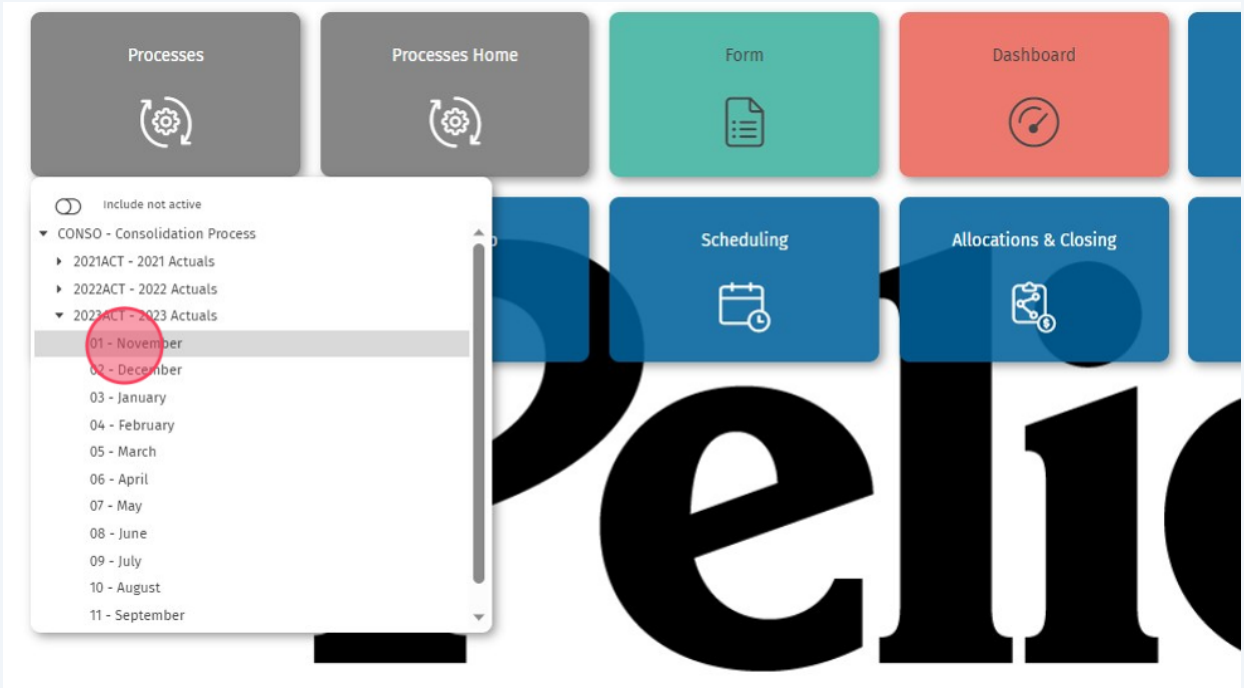

10 View the "Data Processing" and check if the "Carry Forward" is correctly enabled.

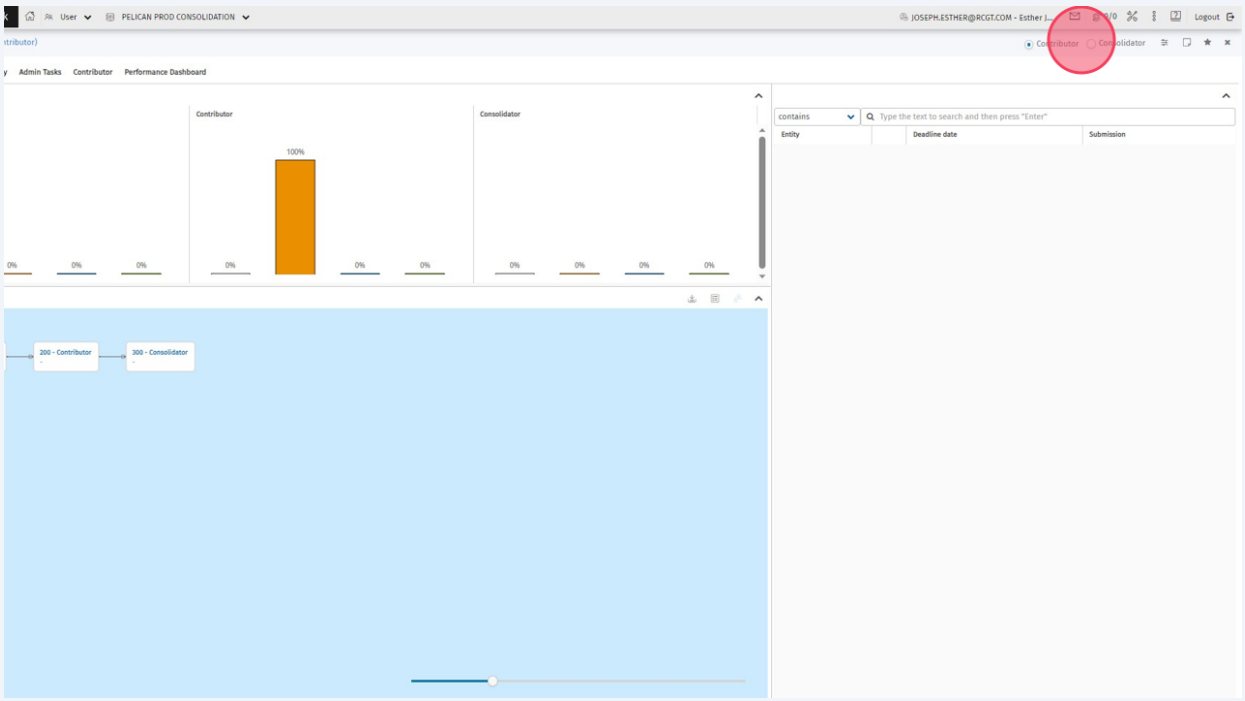

The following steps show how the consolidator can run the carry forward on both the original and consolidation scenarios

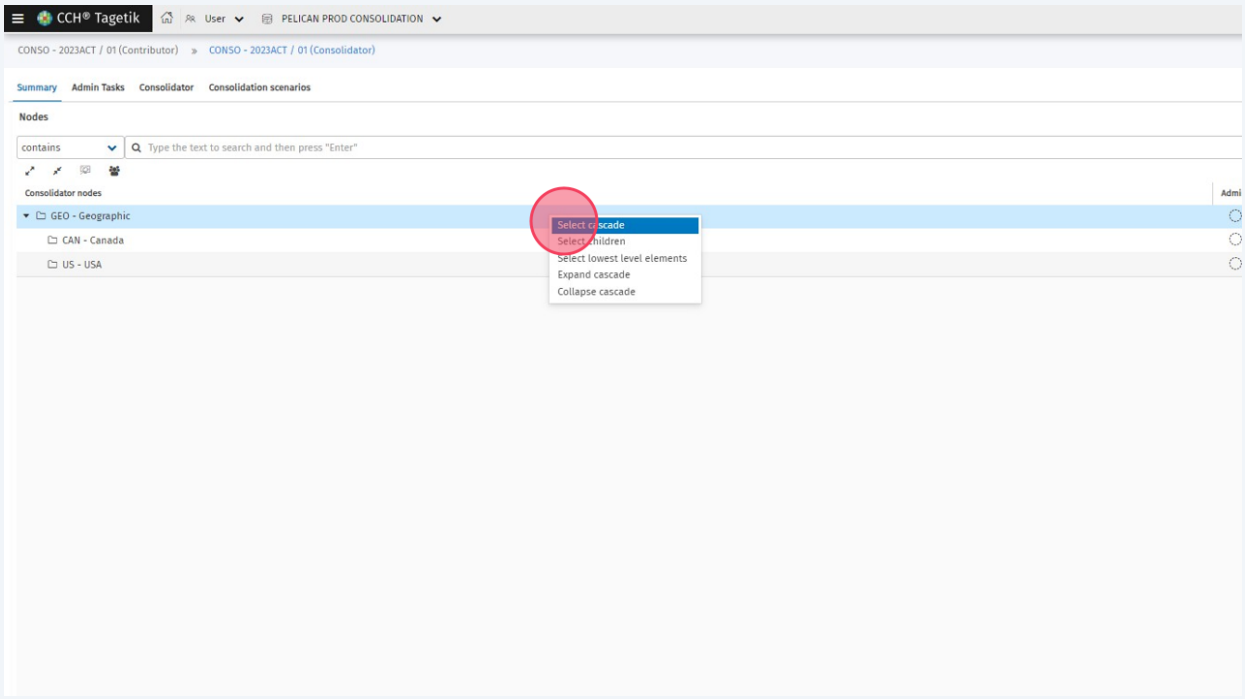

11 Click "Processes" and select the target scenario. In this case we are selecting 2023, P1. We will run the carry forward where the ending balances of 2022,P12 will be carried forward on the "Initial Balances" of 2023, P1.

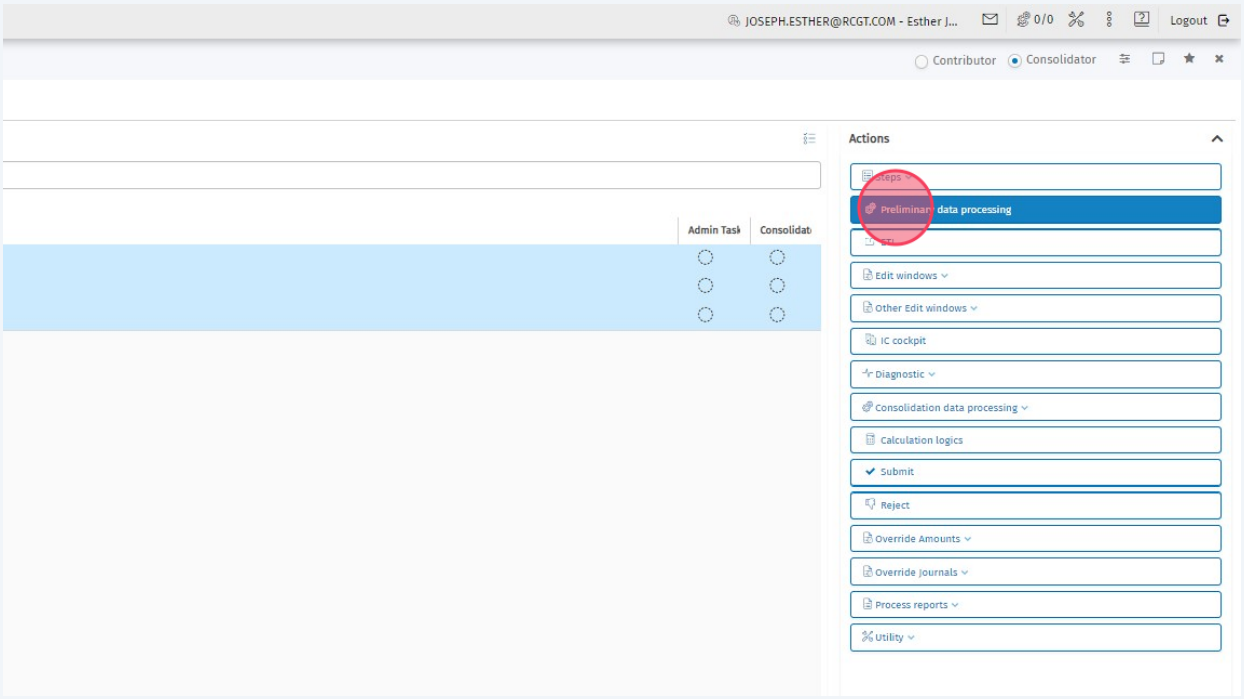

12 Click "Consolidator"

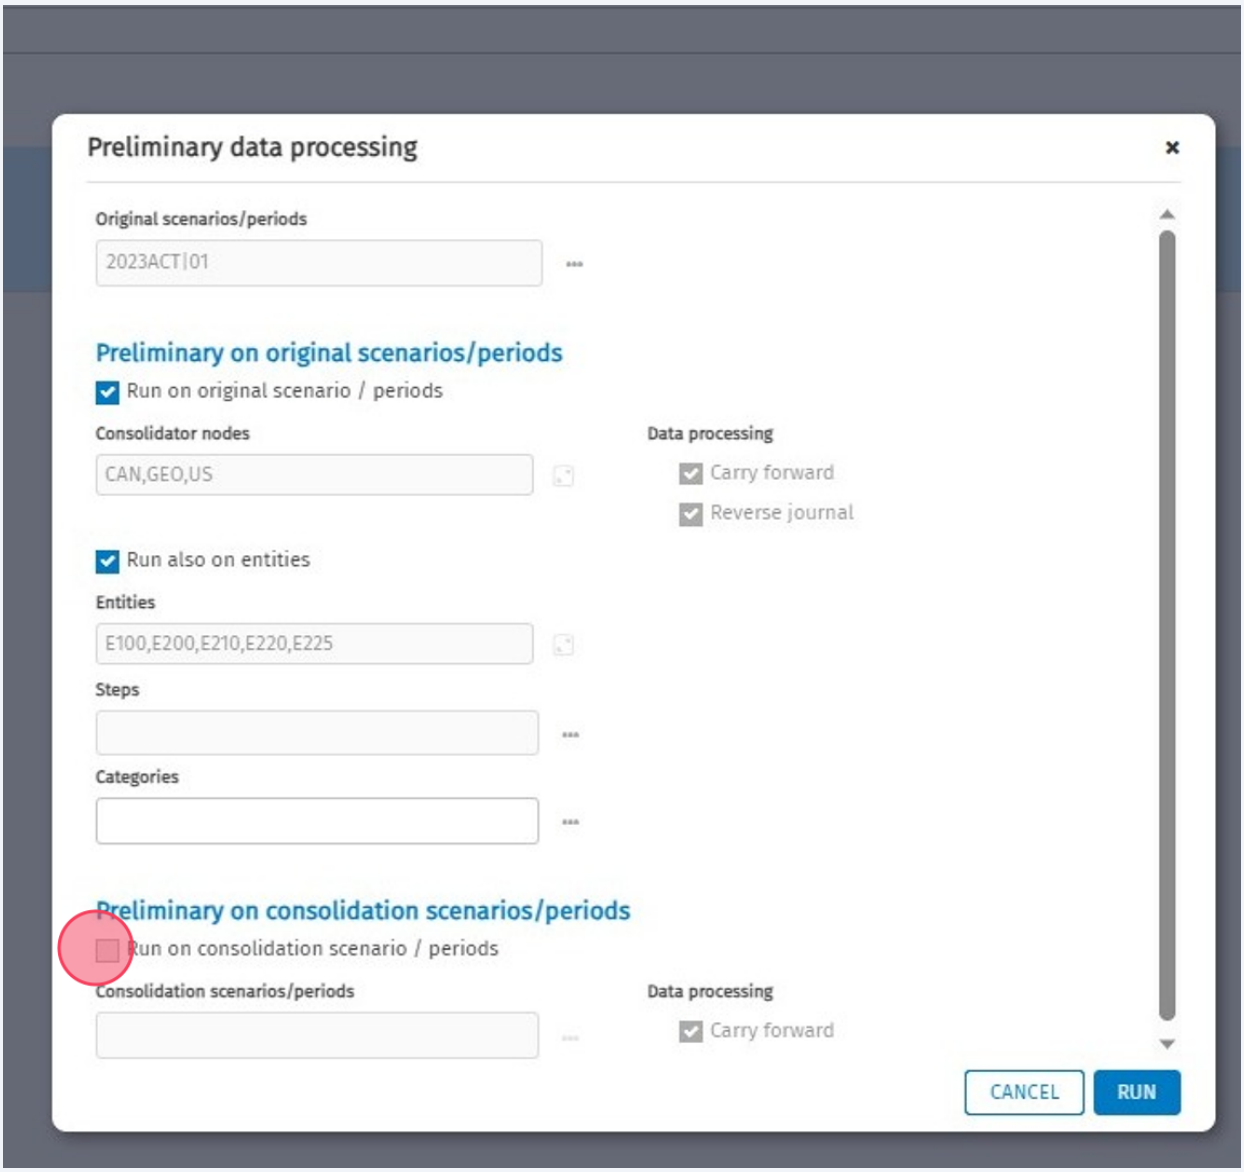

13 Click "Select cascade"

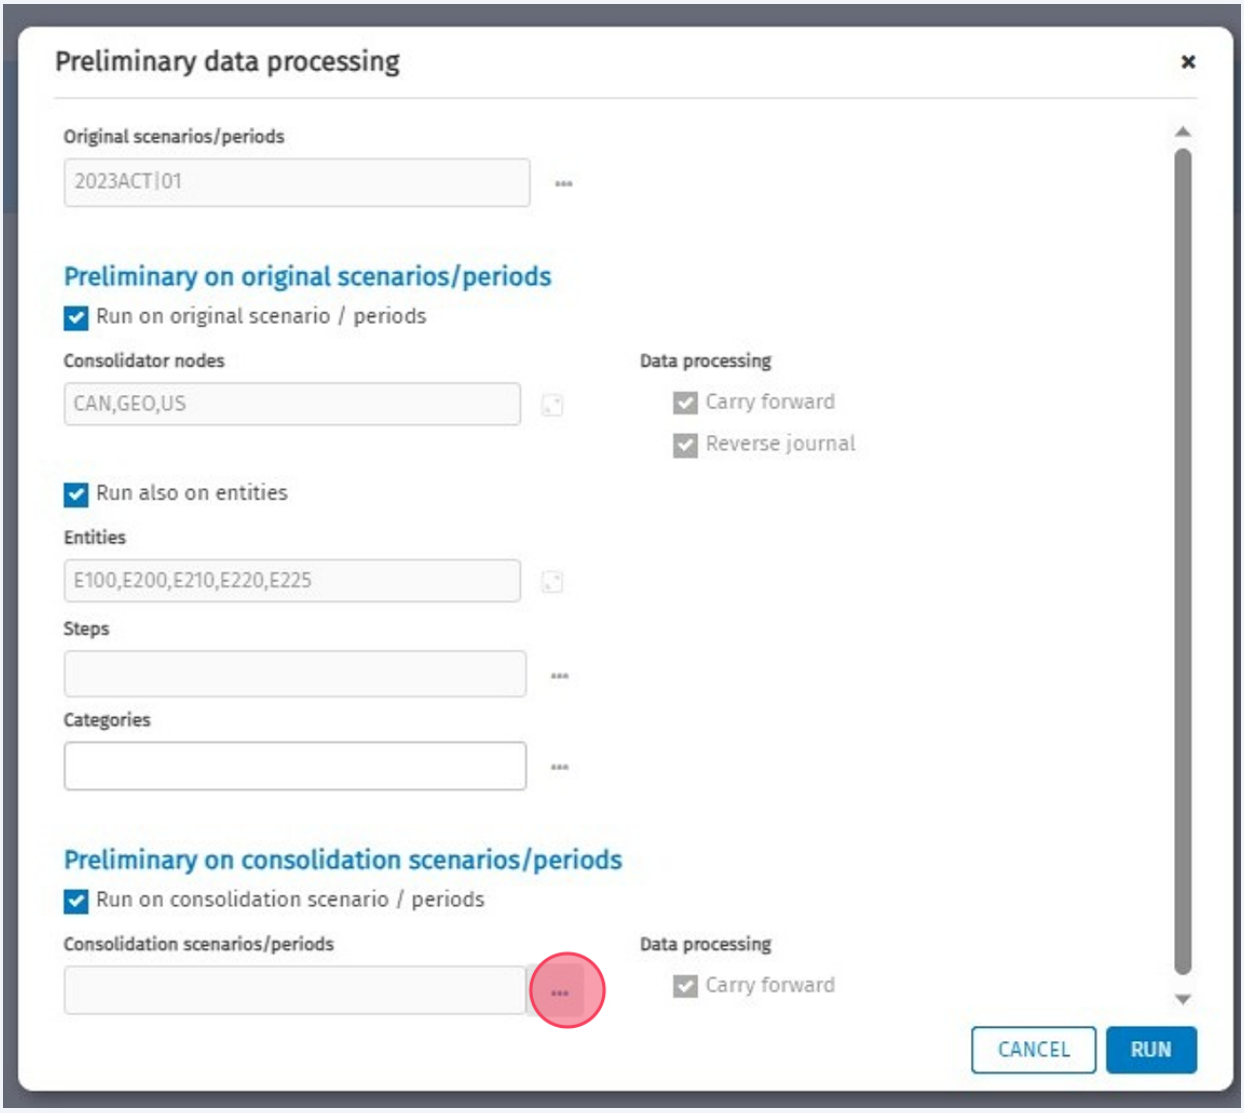

14 On the right-hand side, click on "Preliminary data processing"

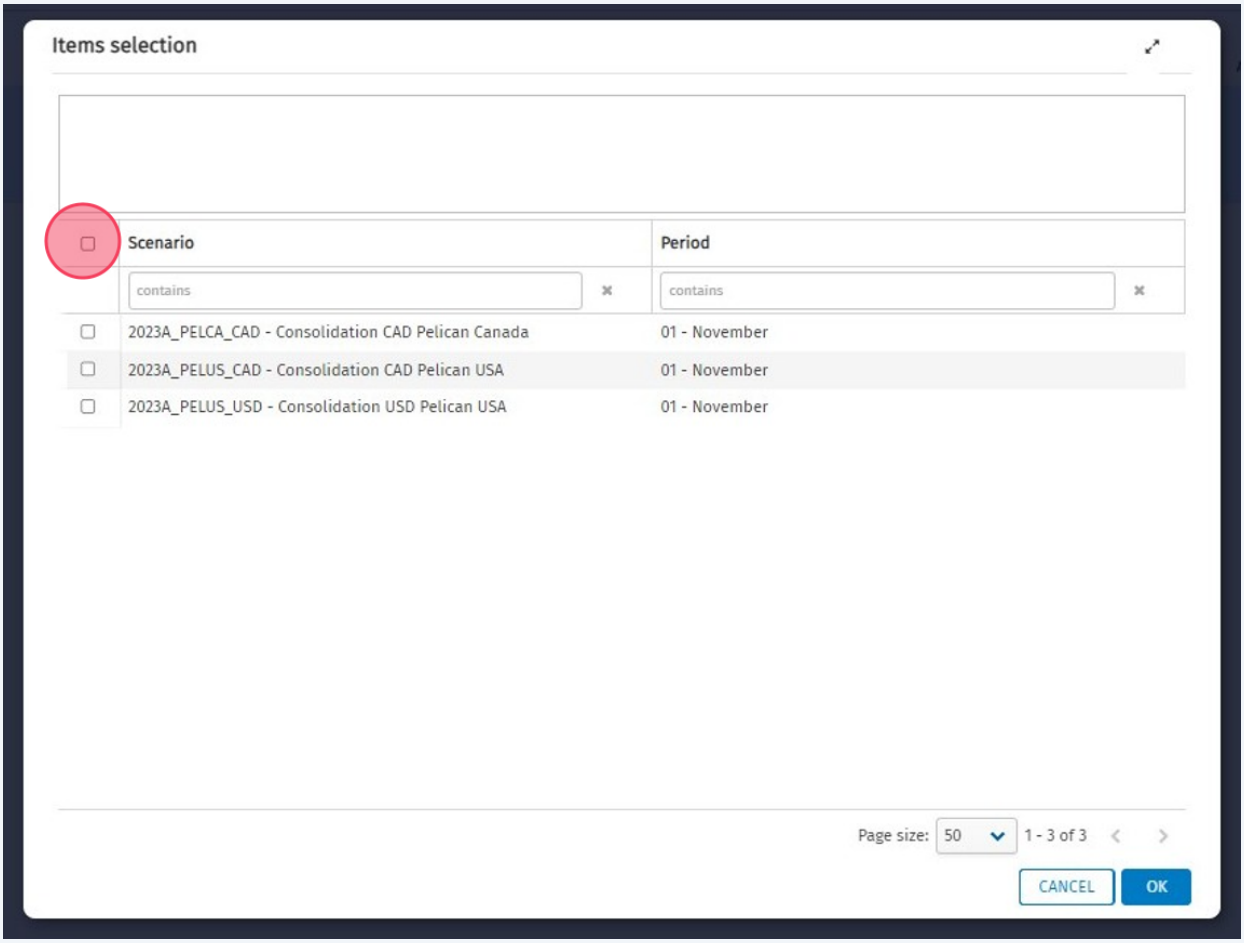

15 The orignal scenario is selected by default, it is necessary that the consolidator select the consolidation scenarios. To do so, click "Run on consolidation scenario / periods"

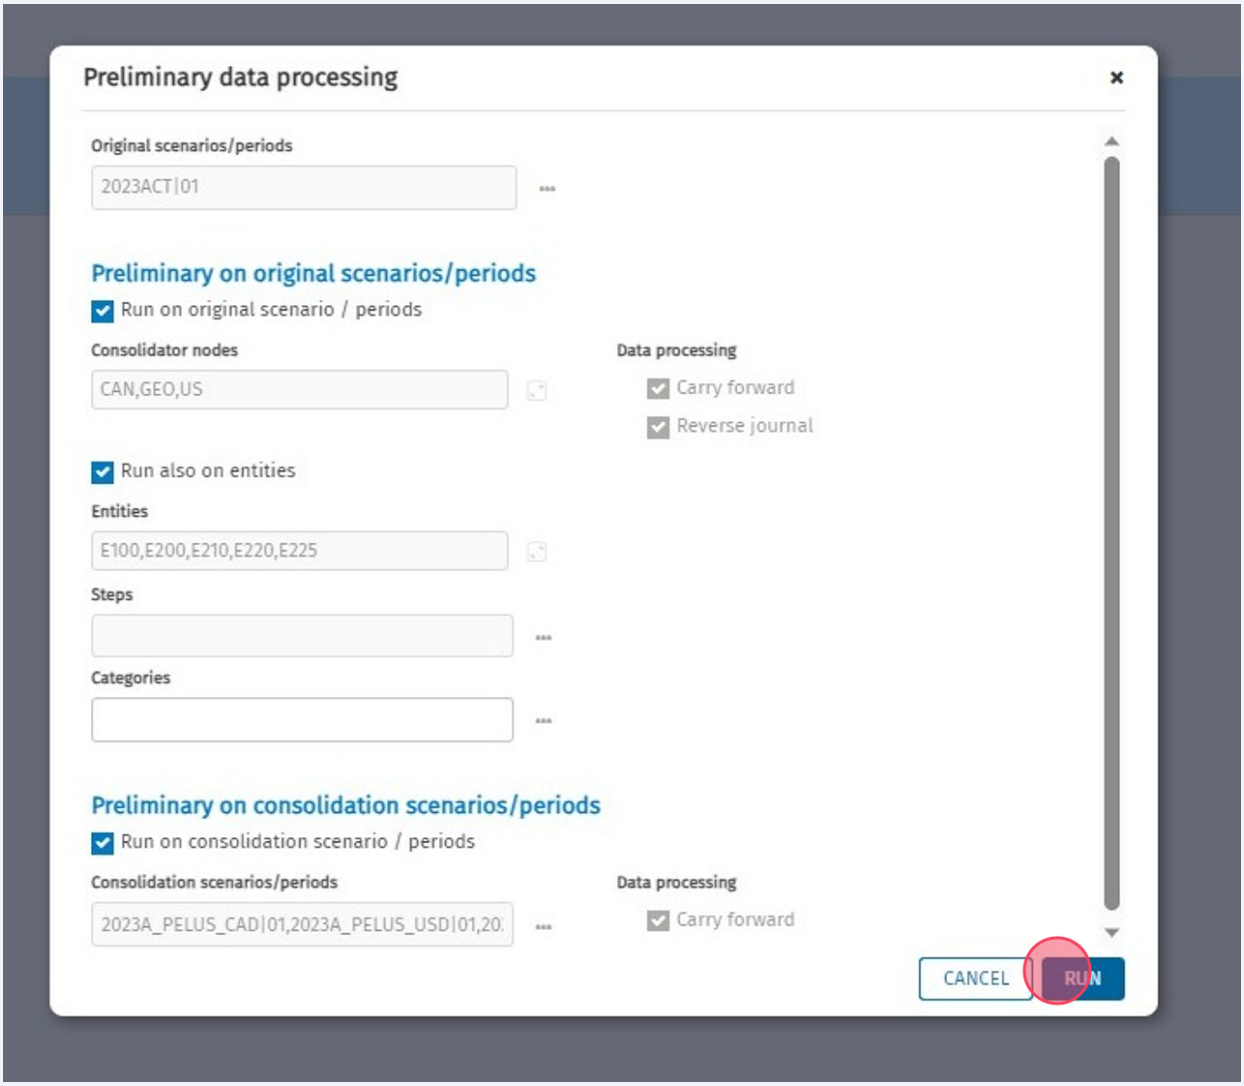

16 Click on the three dots to select the consolidation scenarios.

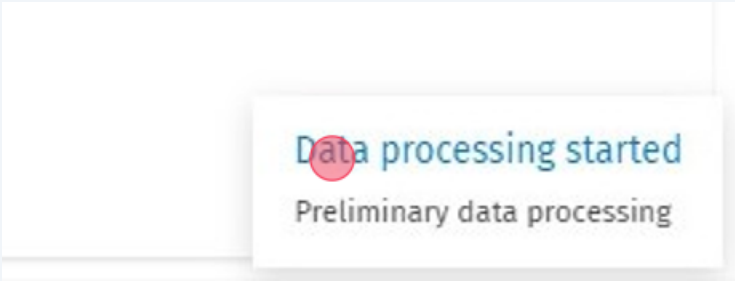

17 Select the consolidation scenarios and click on "OK"

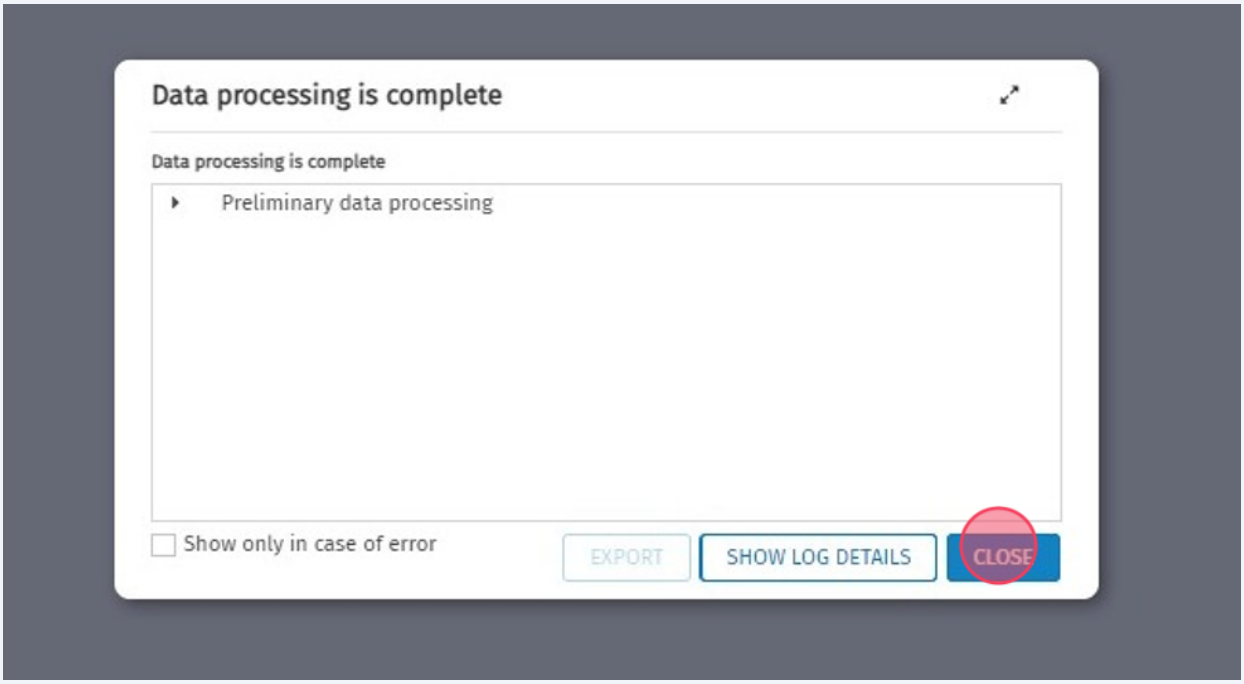

18 The consolidator can then click on "Run"

19 The pop-up "Data processing started" will indicate that the carry forward has begun.

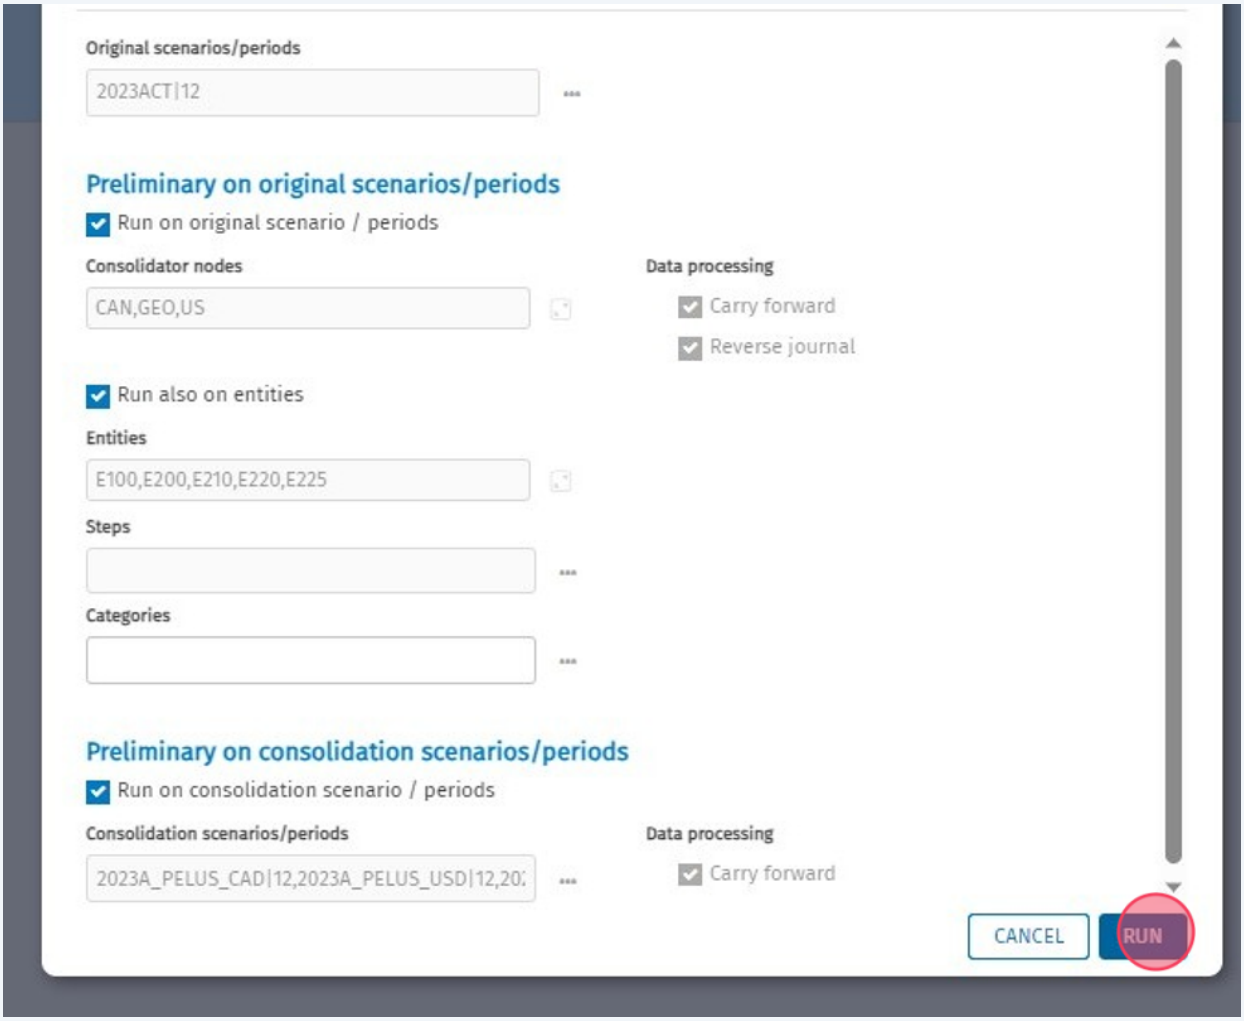

20 If it is completed without errors, the following pop-up will appear.

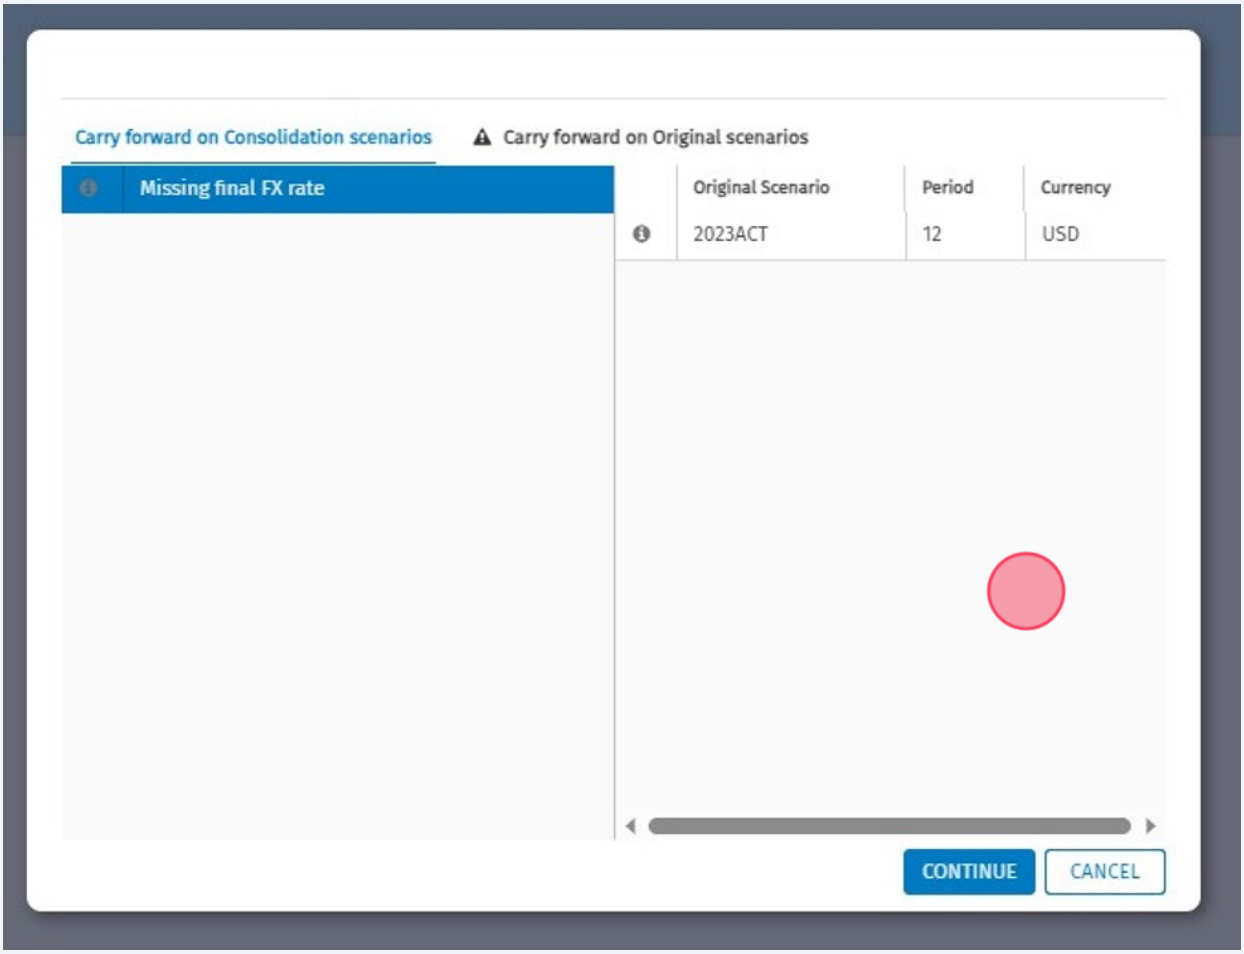

⚠ The following errors can occur:
- The FX rates for the period is not set
- The scenarios are not set up correctly where the "Next" and "Previous" scenario are concerned

⚠ The following sections display the warning messages when the FX rates are missing.

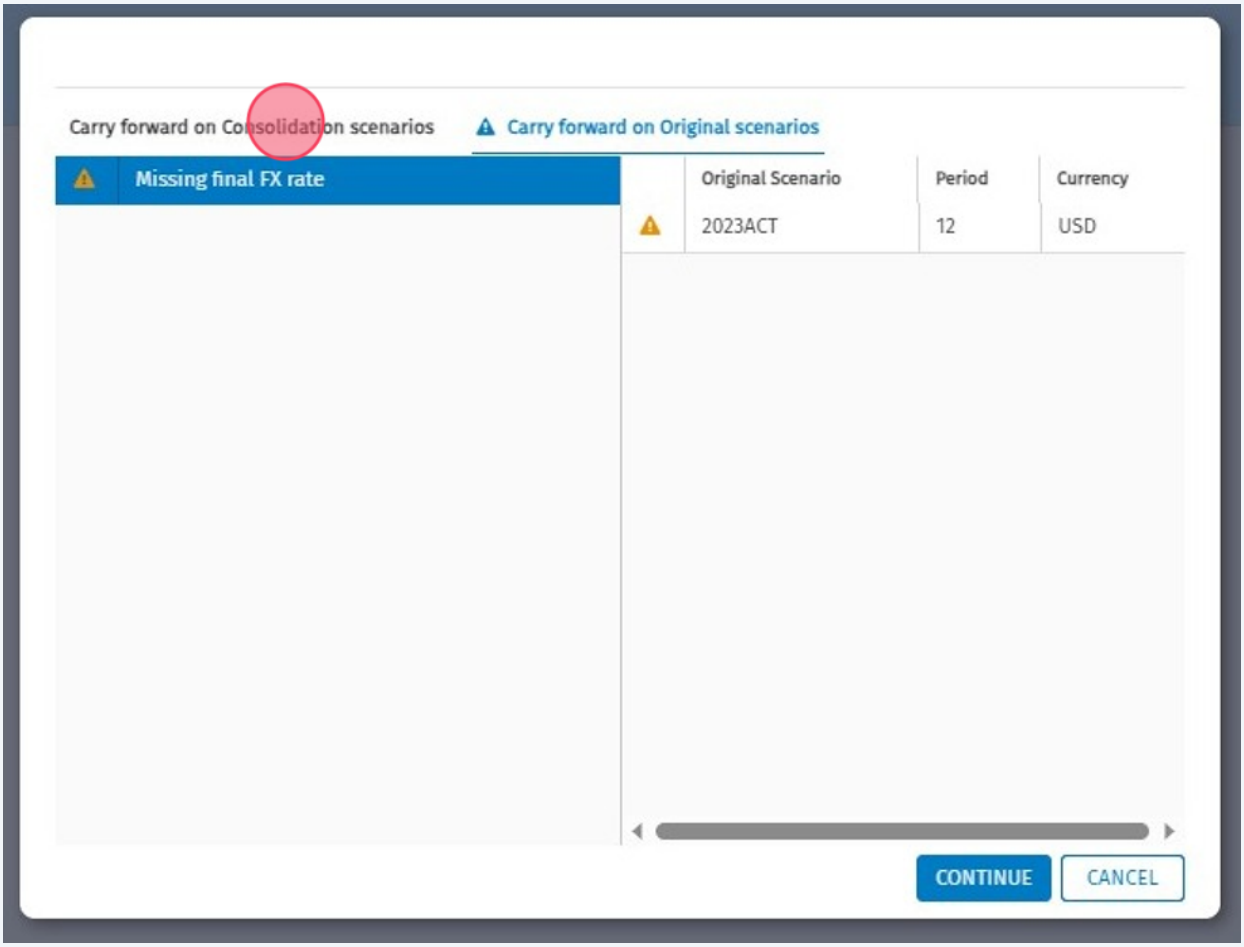

21 For example, if we try to run the carry forward on 2023, P12, we would have a warning that about the FX rate missing.

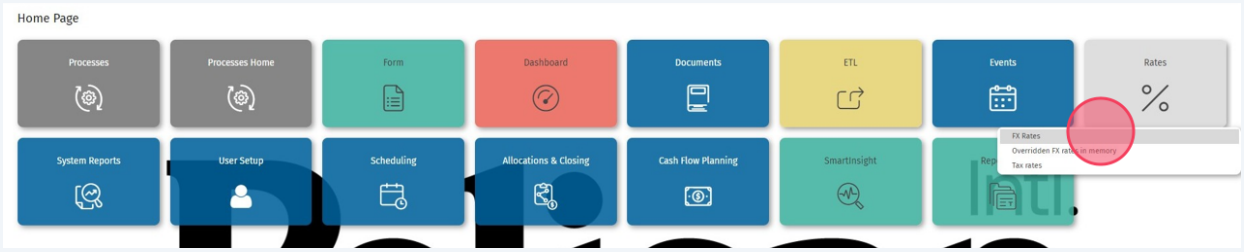

22 Errors on the carry forward on the consolidation scenarios.

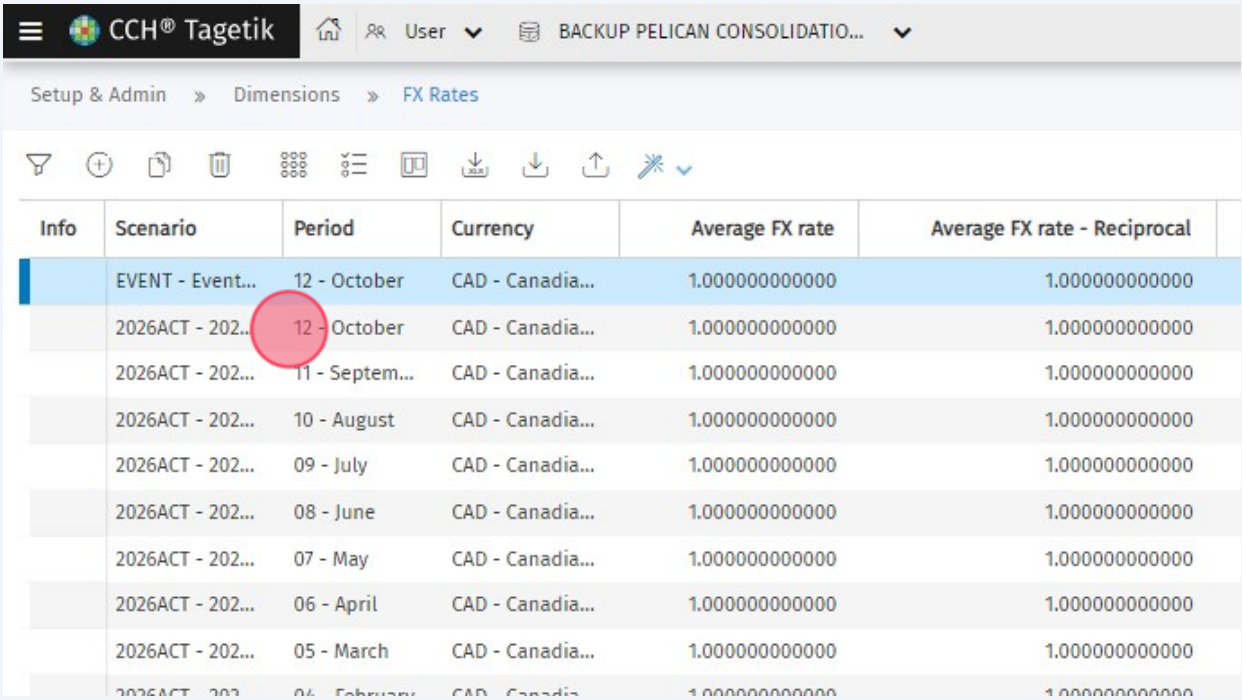

23 Errors on the carry forward on the original scenarios.

24 On the "User" Homepage, go to the tile "Rates" and select "FX rates".

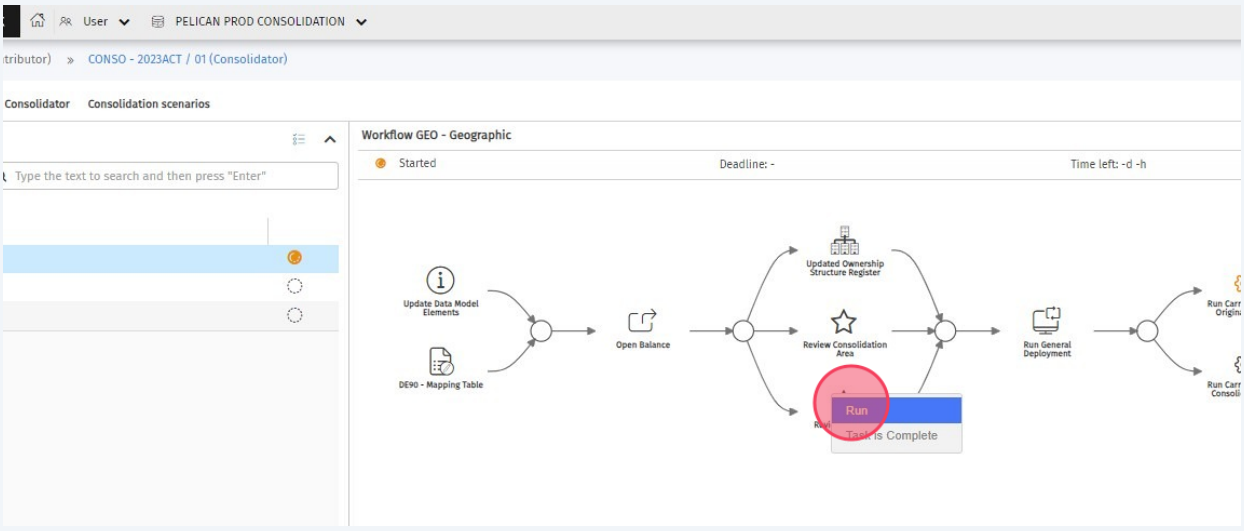

25 On this page, add the FX rates for all currencies that are not the preferred currency.

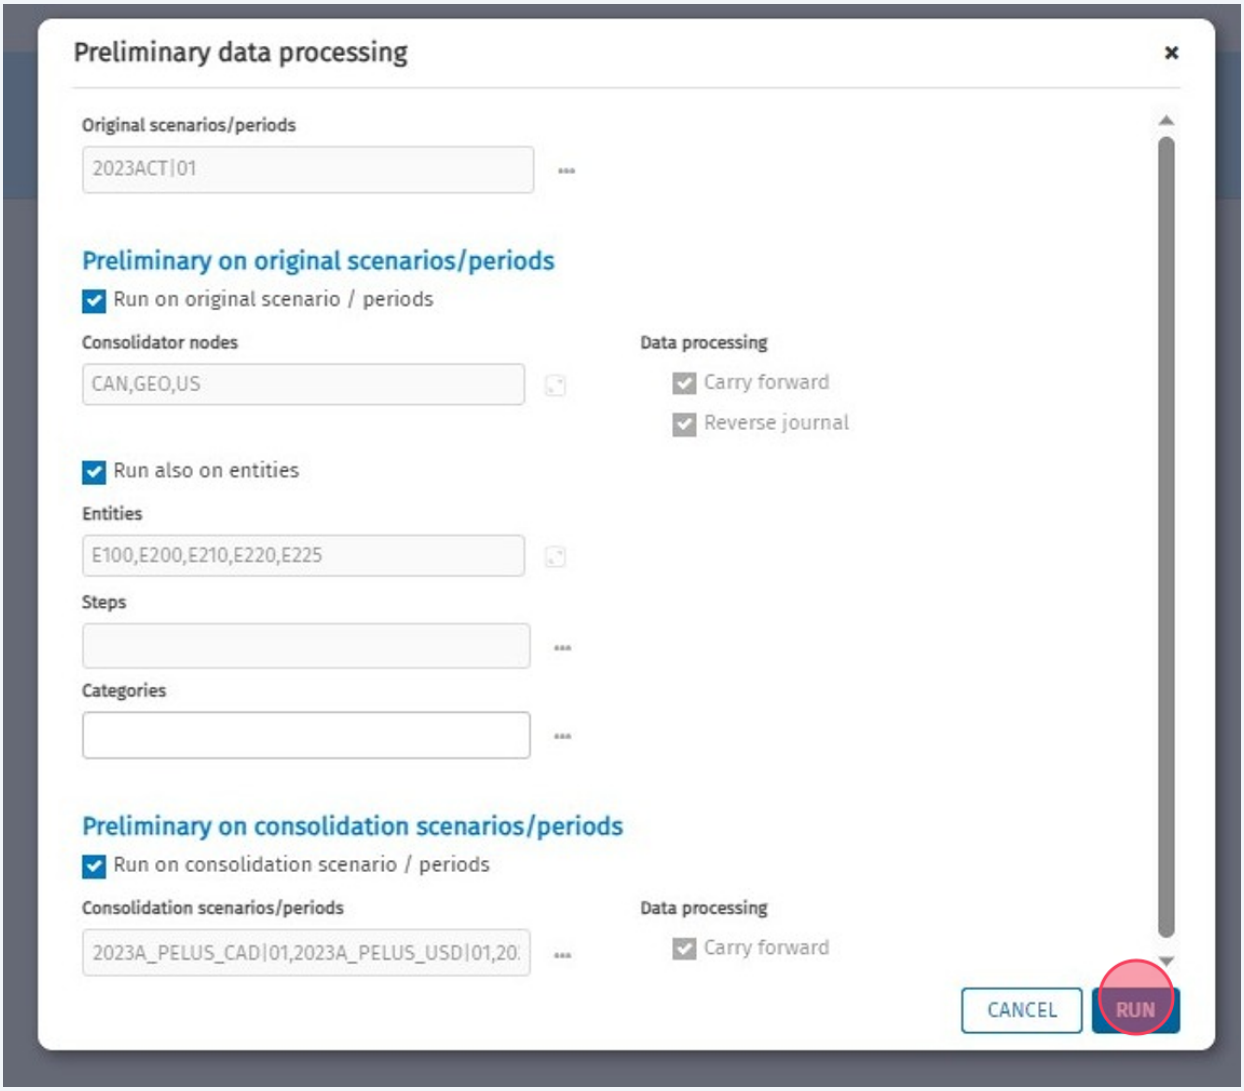

Info	Scenario	Period	Currency	Average FX rate	Average FX rate - Reciprocal
	EVENT - Event...	12 - October	CAD - Canadia...	1.000000000000	1.000000000000
	2026ACT - 202...	12 - October	CAD - Canadia...	1.000000000000	1.000000000000
	2026ACT - 202...	11 - Septem...	CAD - Canadia...	1.000000000000	1.000000000000
	2026ACT - 202...	10 - August	CAD - Canadia...	1.000000000000	1.000000000000
	2026ACT - 202...	09 - July	CAD - Canadia...	1.000000000000	1.000000000000
	2026ACT - 202...	08 - June	CAD - Canadia...	1.000000000000	1.000000000000
	2026ACT - 202...	07 - May	CAD - Canadia...	1.000000000000	1.000000000000
	2026ACT - 202...	06 - April	CAD - Canadia...	1.000000000000	1.000000000000
	2026ACT - 202...	05 - March	CAD - Canadia...	1.000000000000	1.000000000000

26 Alternatively, on the Admin Task workflow, the user can use the bookmark that will redirect him/her to the FX rate page.

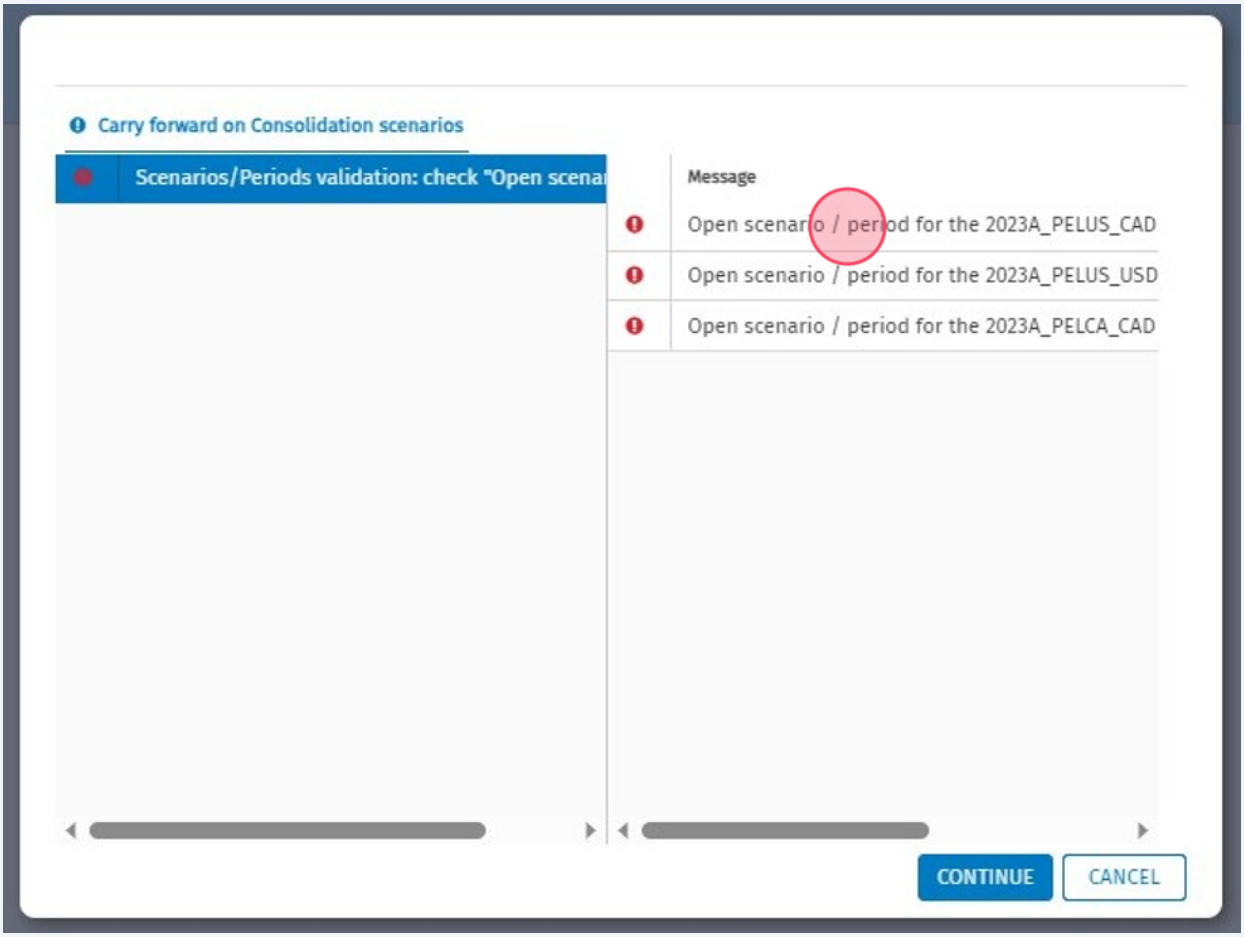

⚠ The following section showcases the error messages when the scenarios are not set up correctly where the "Next" and "Previous" scenario are concerned. The steps to correct this error is also documented in the following sections.

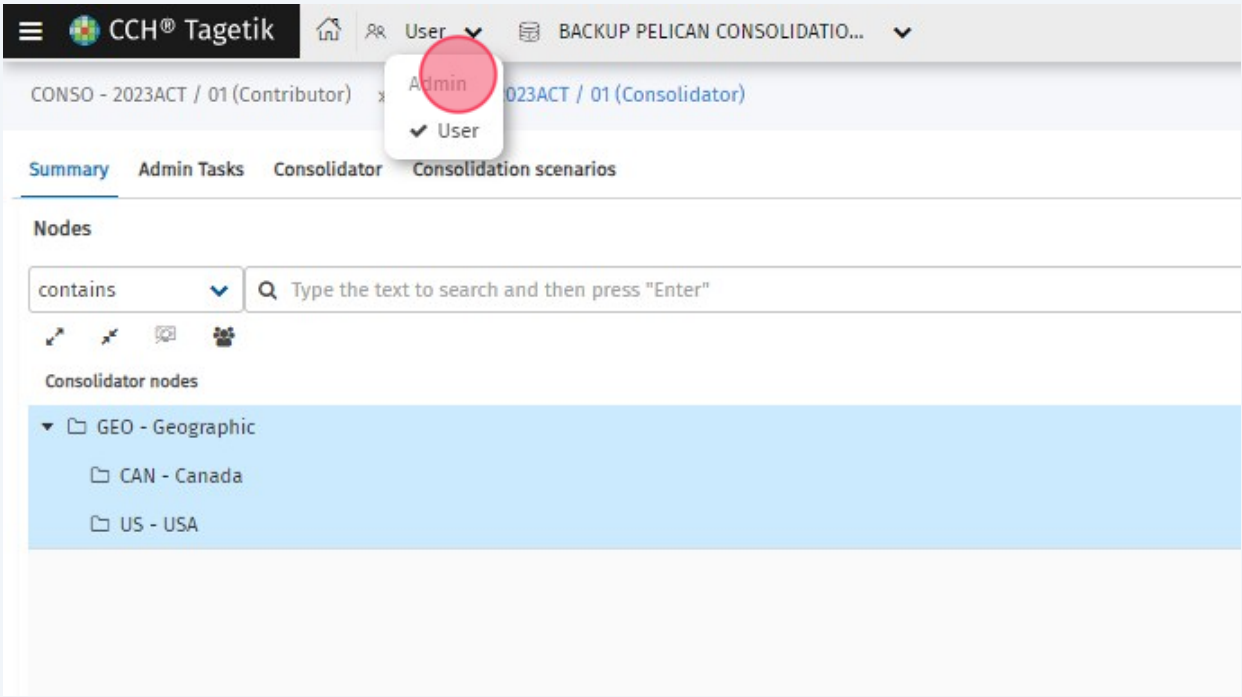

27 In this example, the scenario is not properly set up.

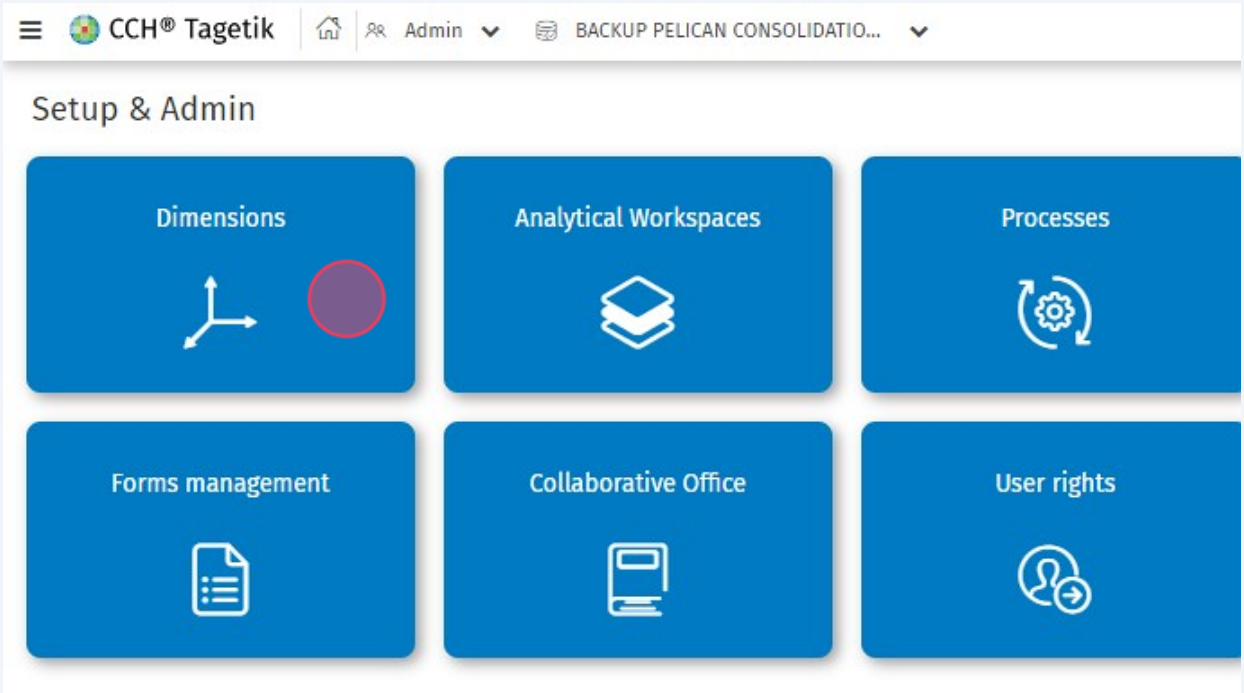

28 We can expect the following error messages: "Open scenario / period for the 2023A_PELUS_CAD scenario, 01 period isn't set correctly"

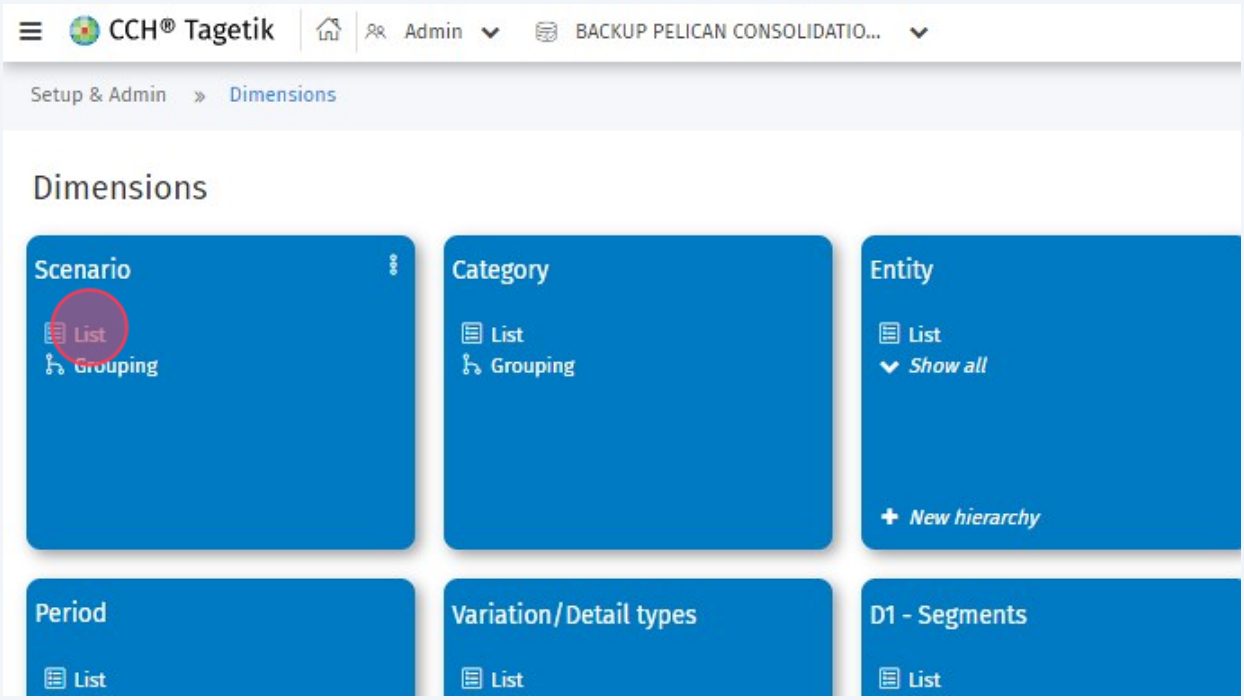

29 To correct this, go the "Admin" page.

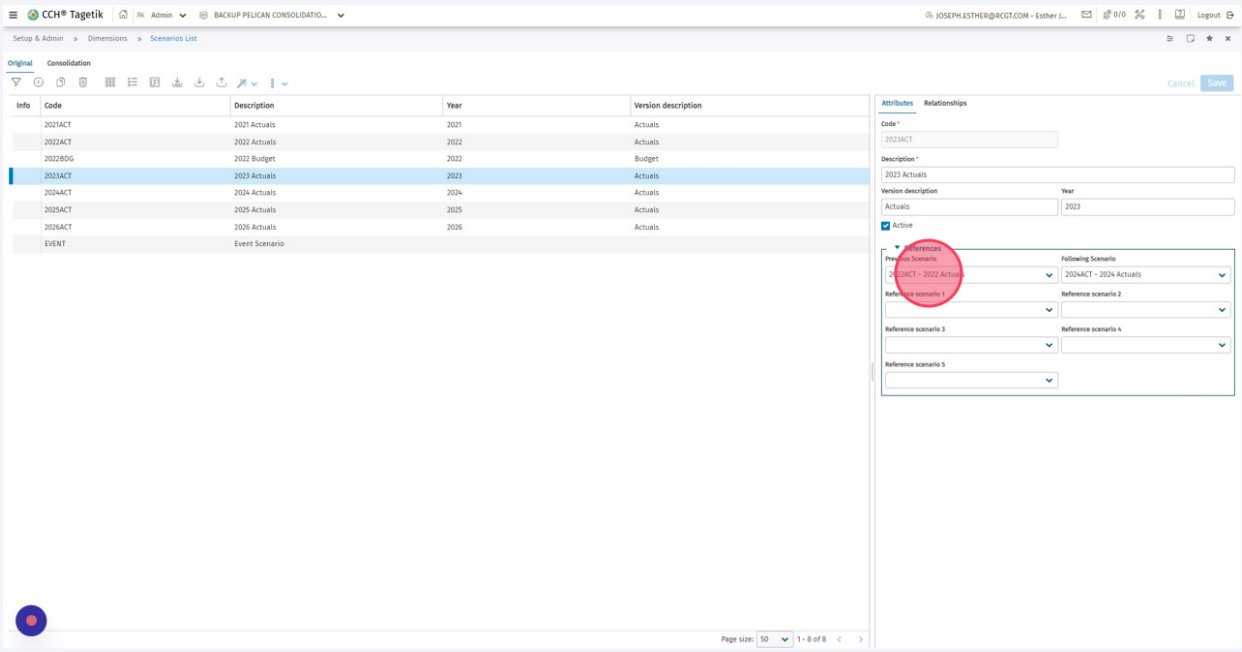

30 Click on "Dimensions"

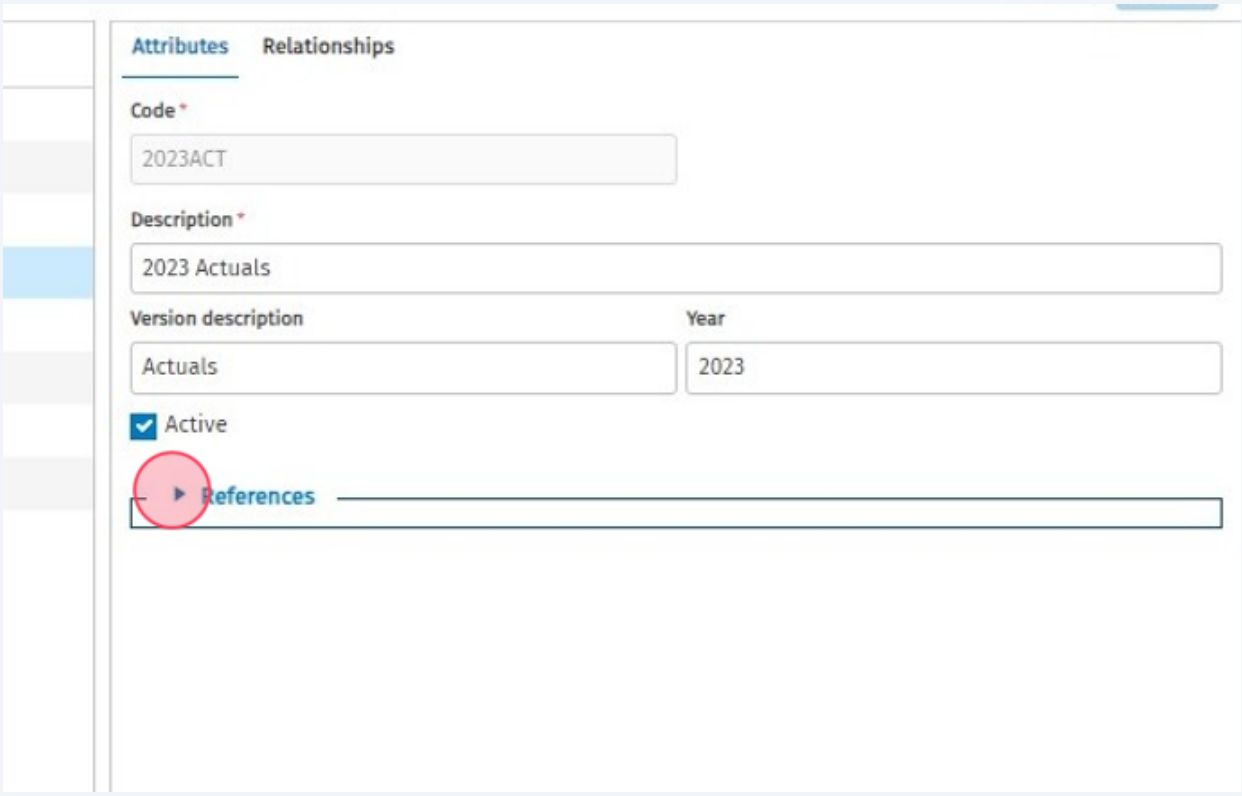

31 Click on "Scenario" list.

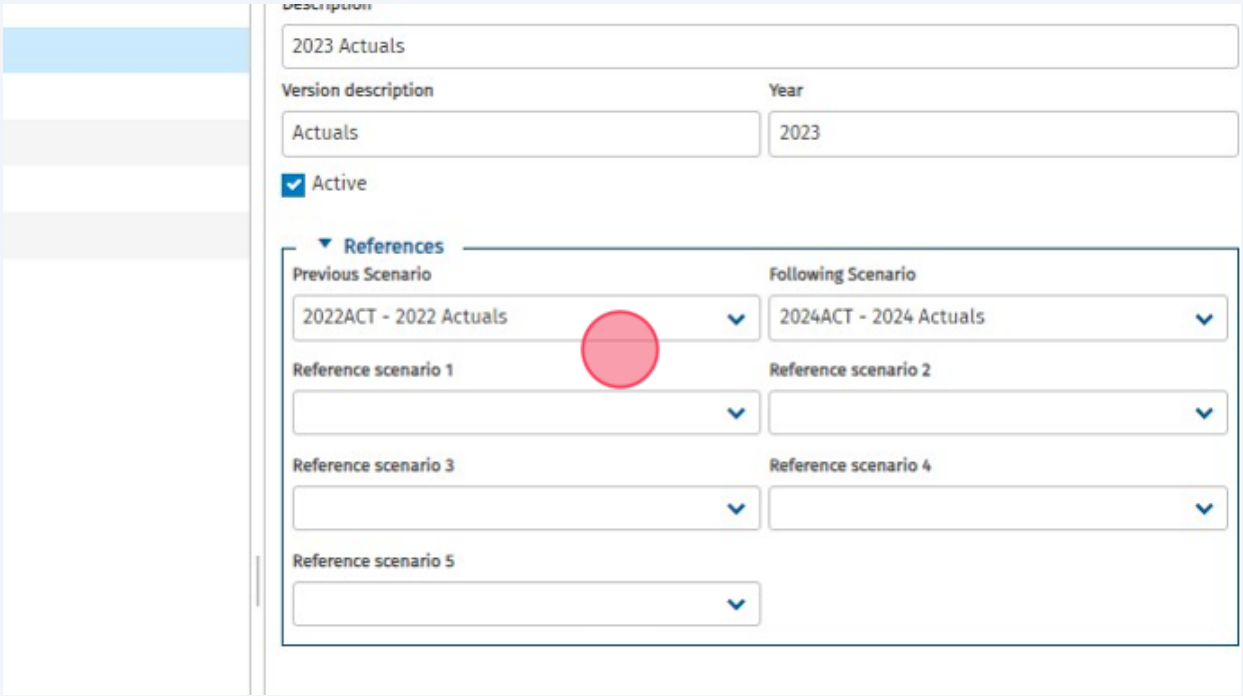

32 On the 2023ACT (original) scenario, go to references and ensure that the "Previous" and "Following" scenarios are correctly set up.

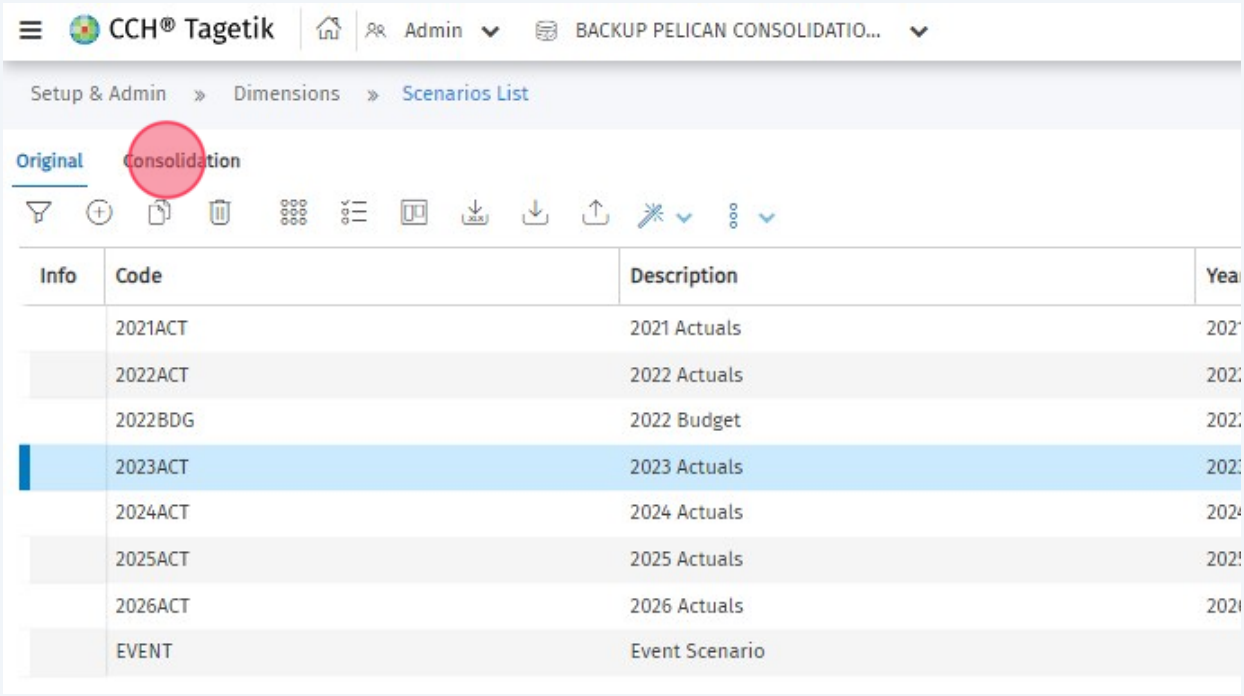

33 Clicking on "References"

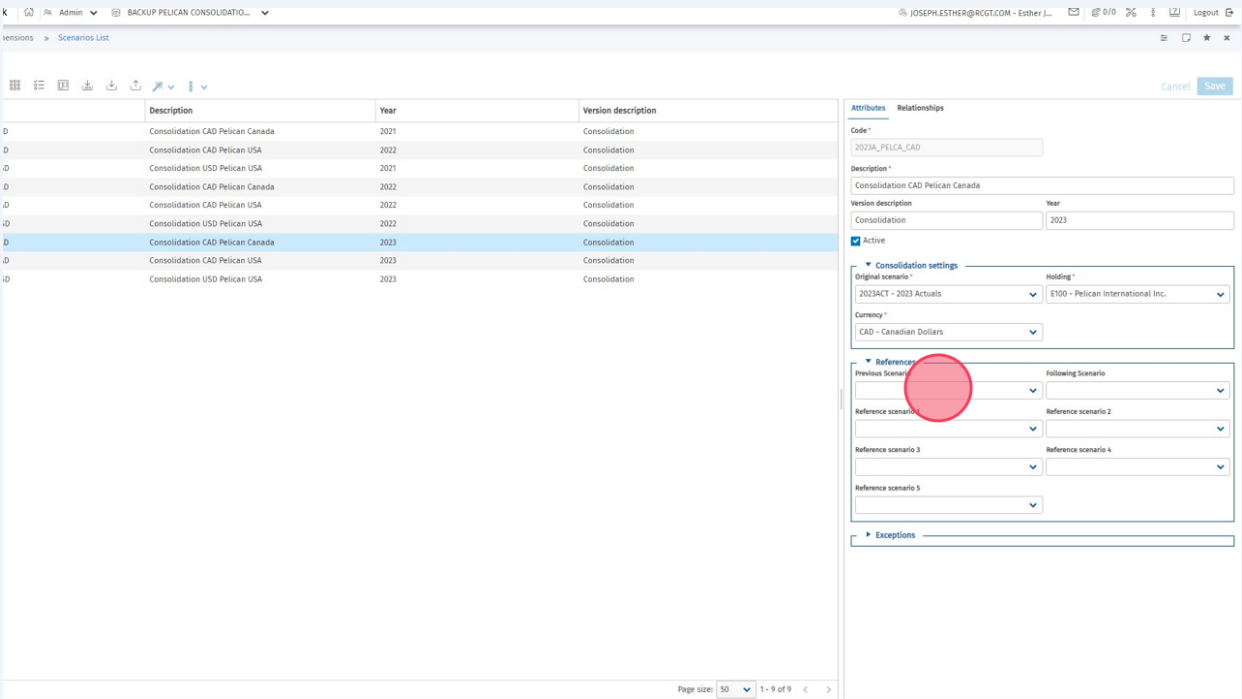

34 Checking the "Previous Scenario" and "Following Scenario".

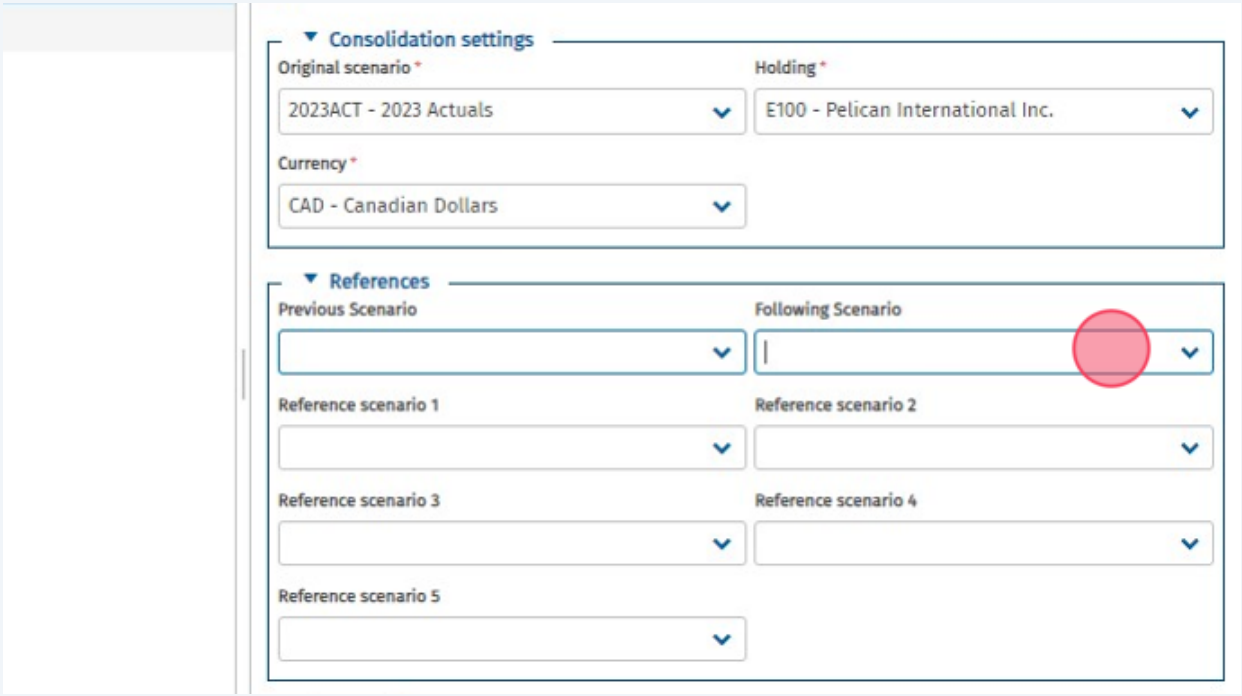

35 The same check must be done on the consolidation scenarios. To do so, click "Consolidation"

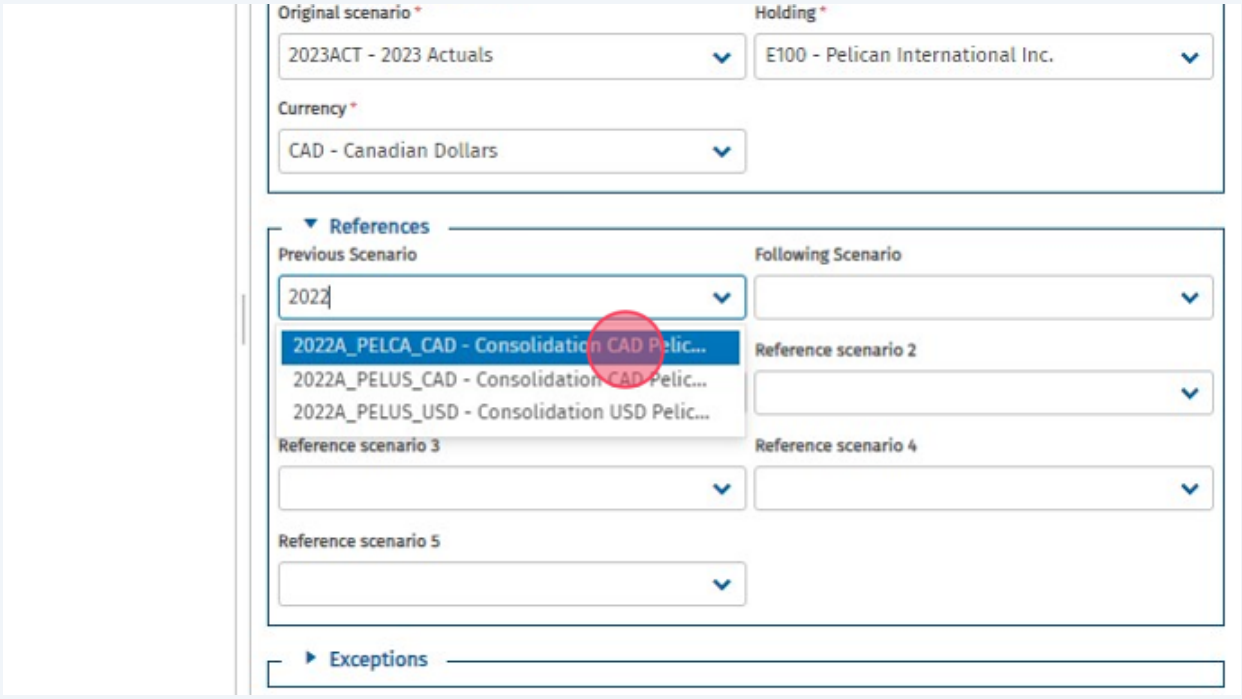

36 Go to the "References" and add the "Previous scenario" and "Following scenario" if necessary (1)

37 Go to the "References" and add the "Previous scenario" and "Following scenario" if necessary (2)

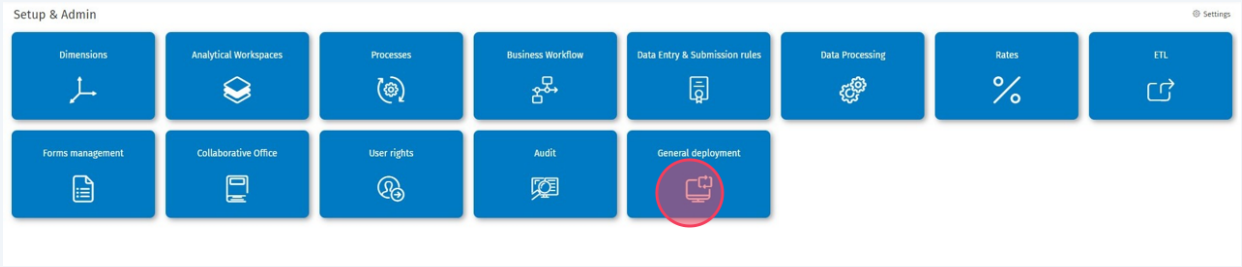

38 Go to the "References" and add the "Previous scenario" and "Following scenario" if necessary (3). For example in this case, we are adding "2022A_PELCA_CAD - Consolidation CAD Pelican Canada" as "Previous scenario".

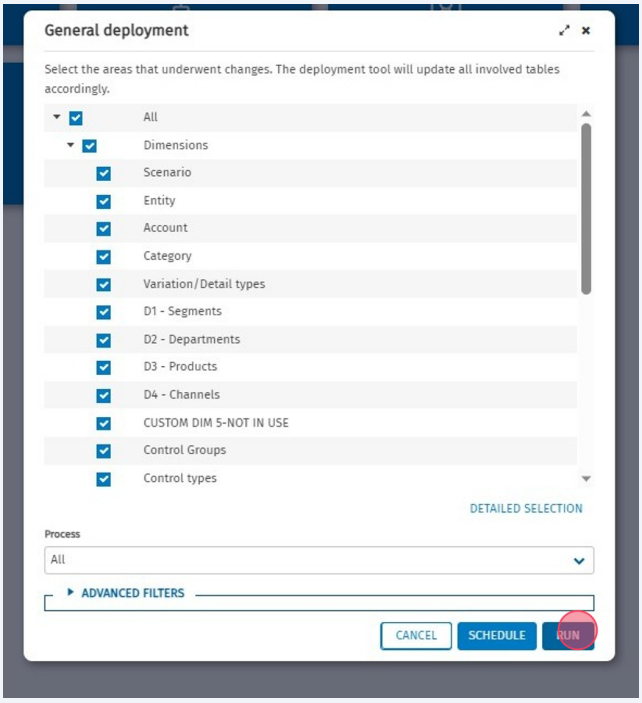

39 It is necessary to repeat this on all scenarios: original and consolidation.

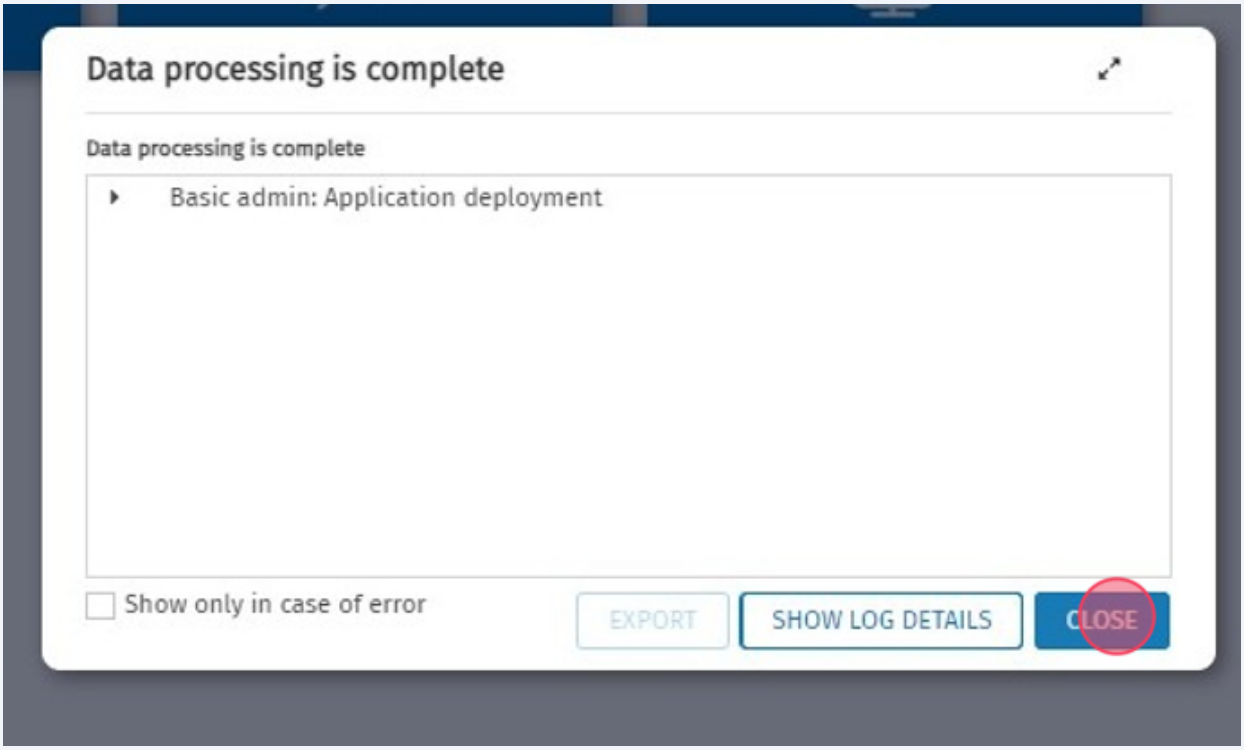

40 After changes to the scenario (or any other dimension), it is necessary to run a "General Deployment".

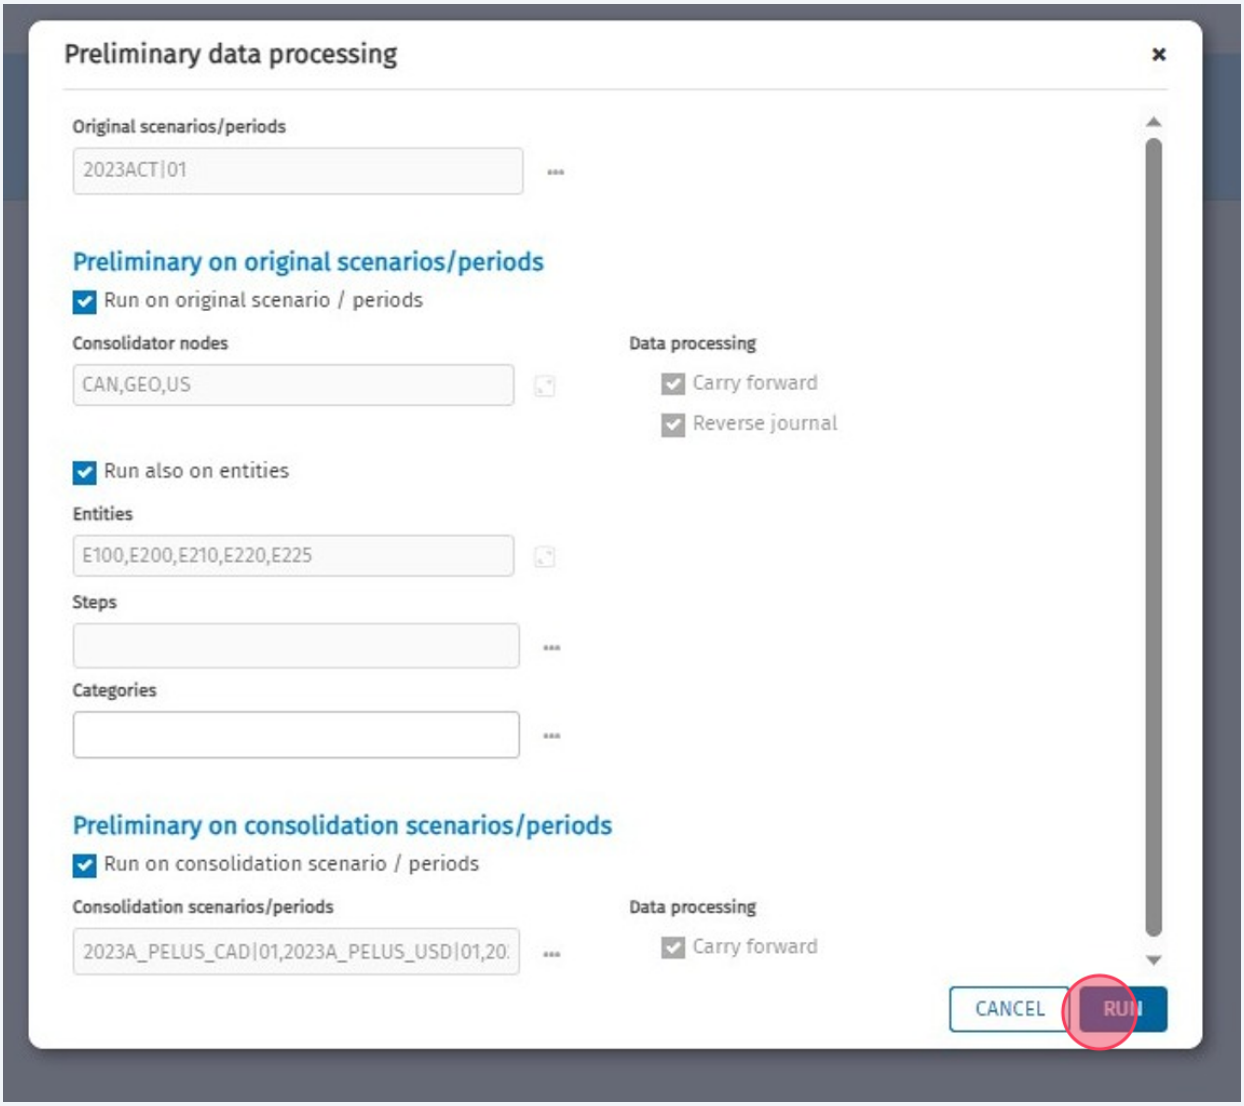

41 Run "General Deployment" (1)

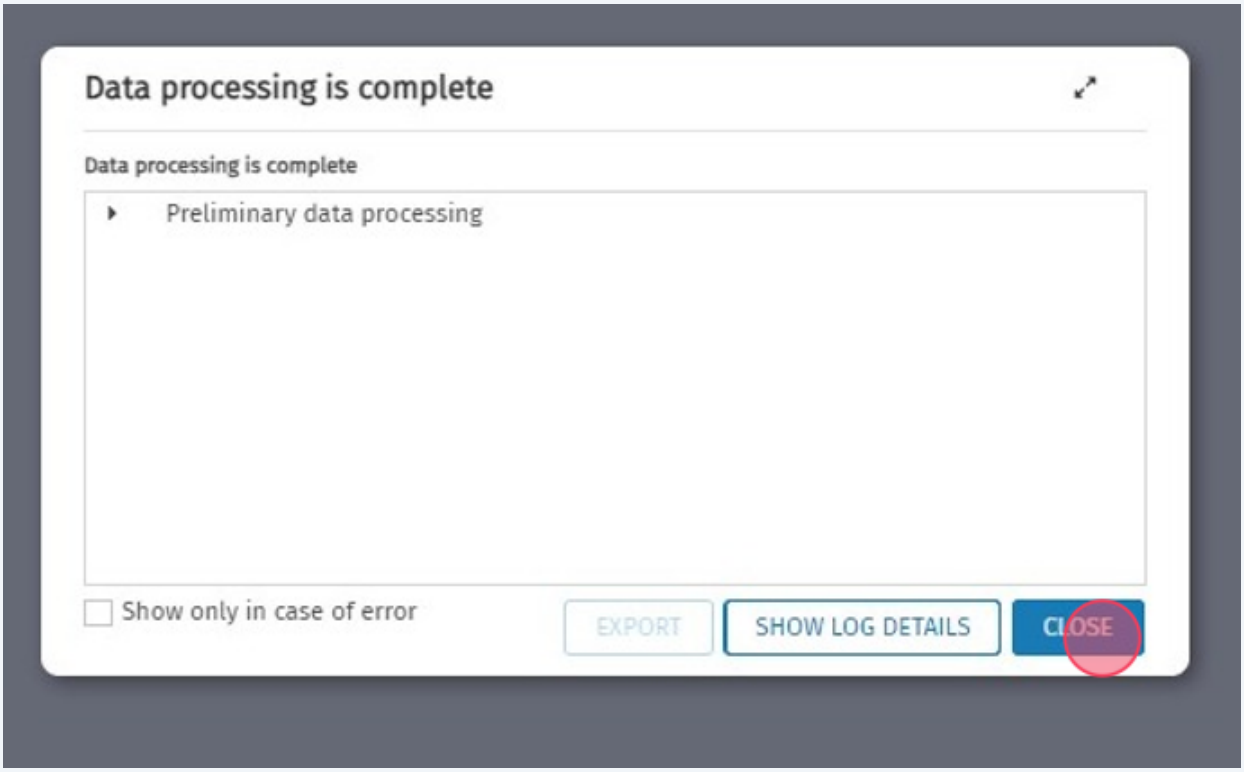

42 Run "General Deployment" (2)

43 The carry forward can now be run.

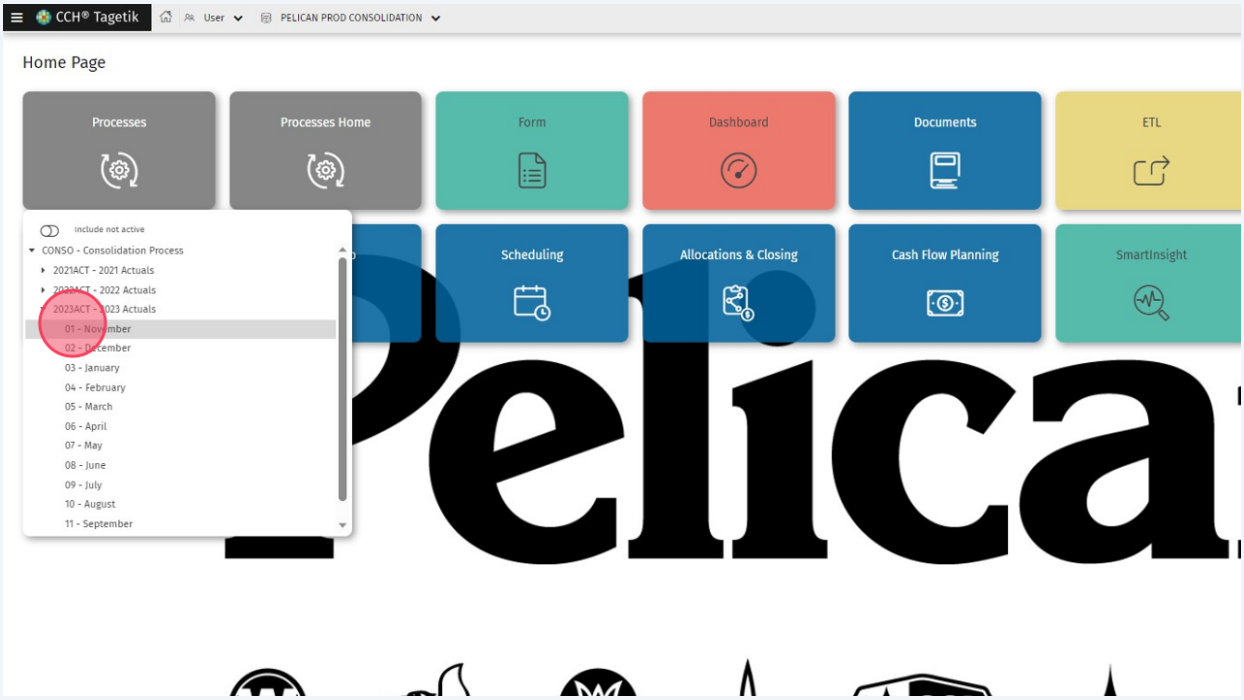

44 Click here.

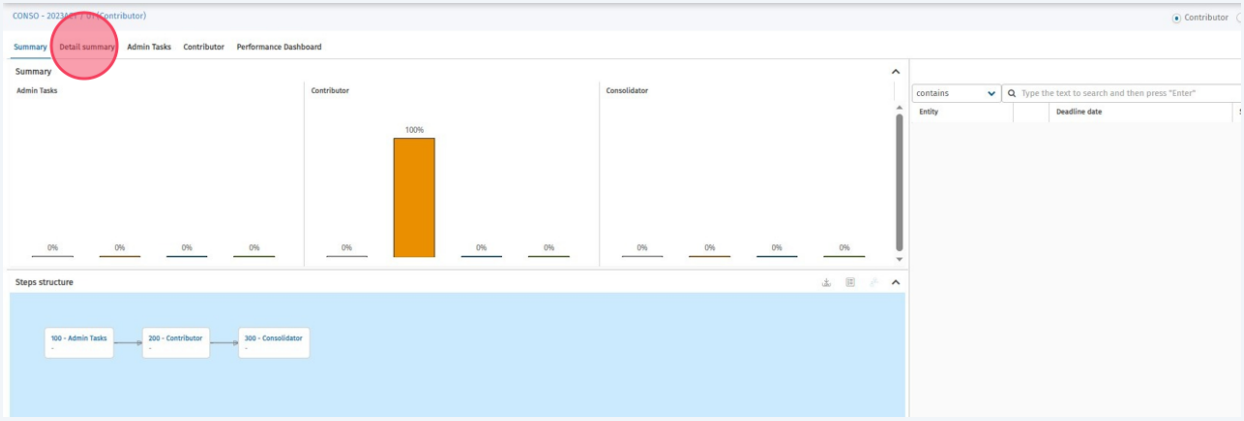

The following steps show how the contributor can run the carry forward on both the original and consolidation scenarios

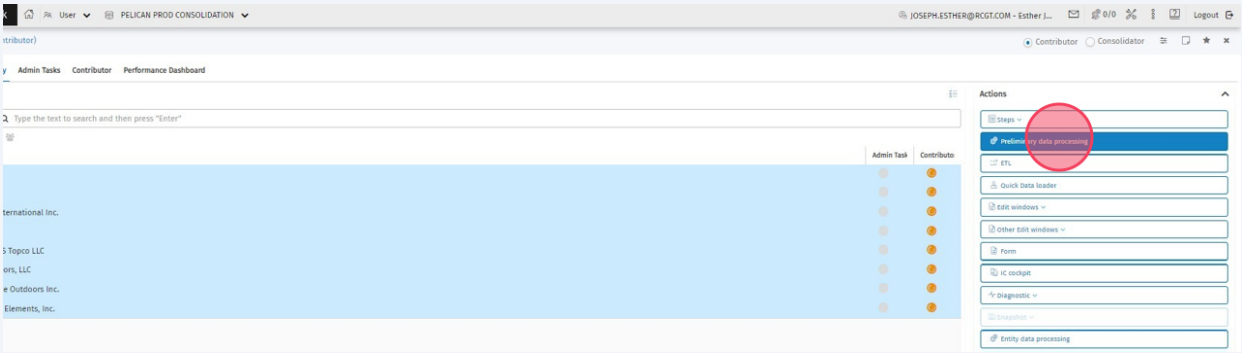

45 On the "User" page, select the target period where the carry forward should be run.

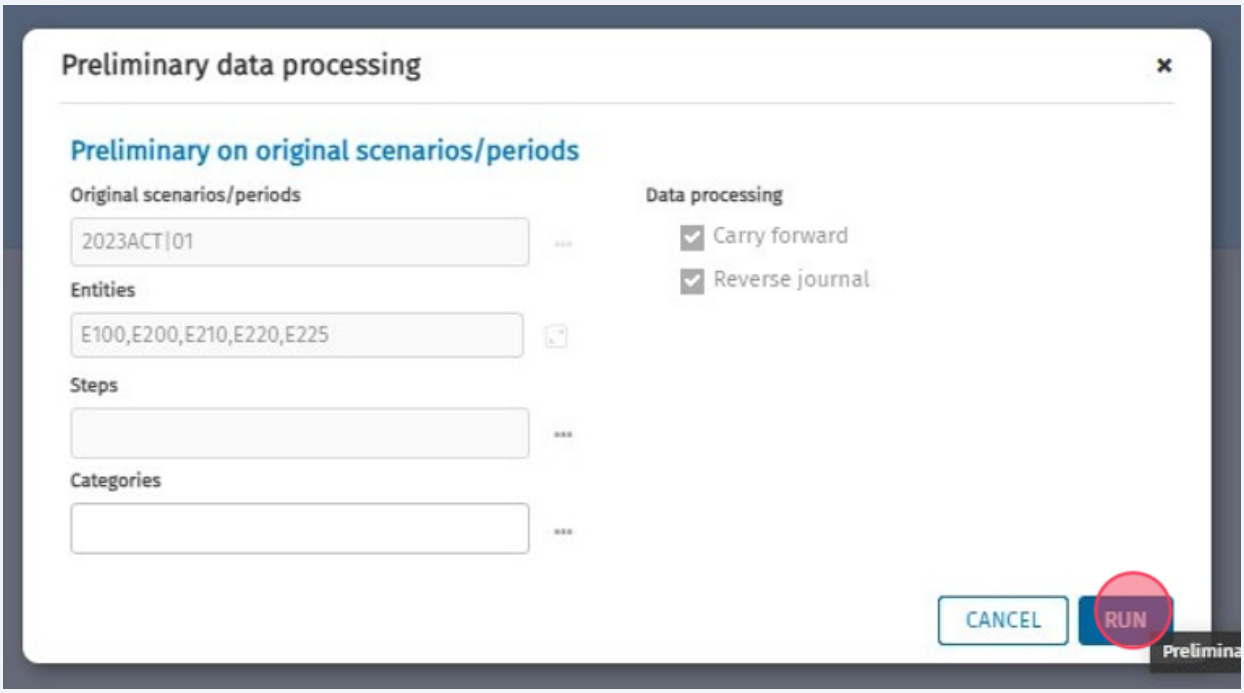

46 Stay on the "Contributor Tab" and click on "Detail summary"

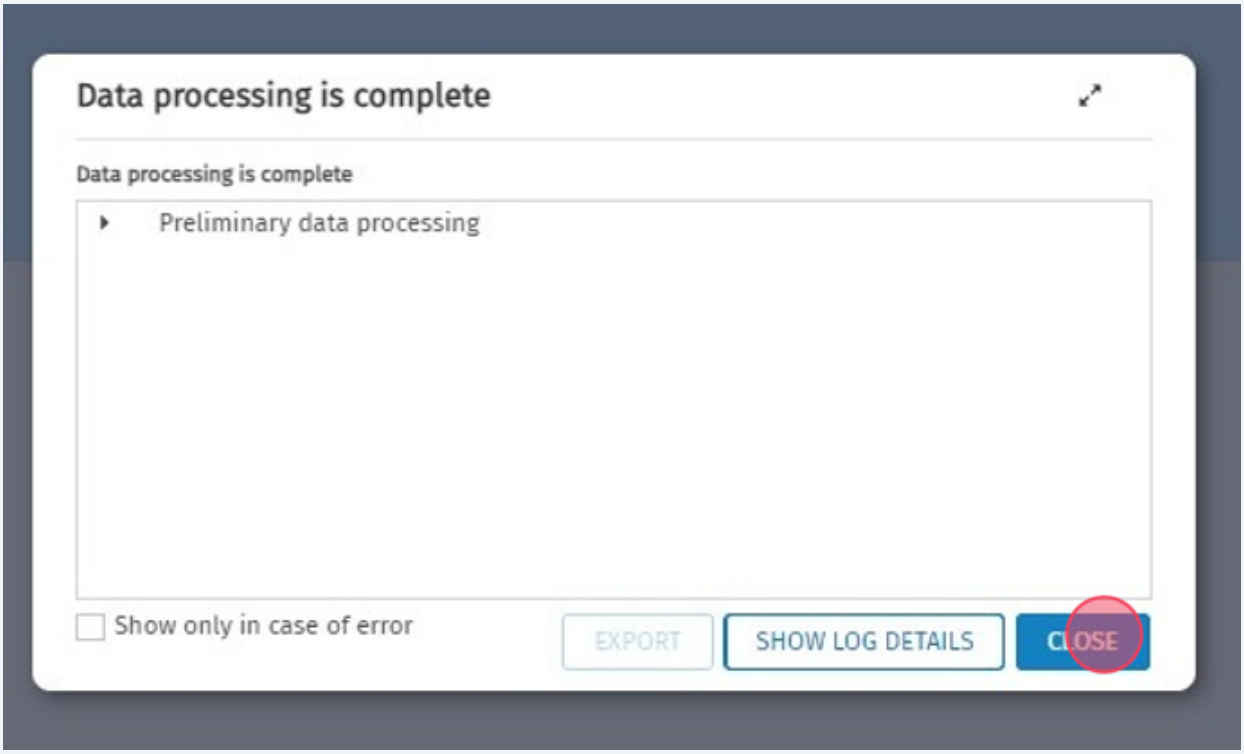

47 Depending on the your user rights, select one or many entities and click on "Preliminary data processing"

48 The options should be limited to only the "Original Scenario". Click on run.

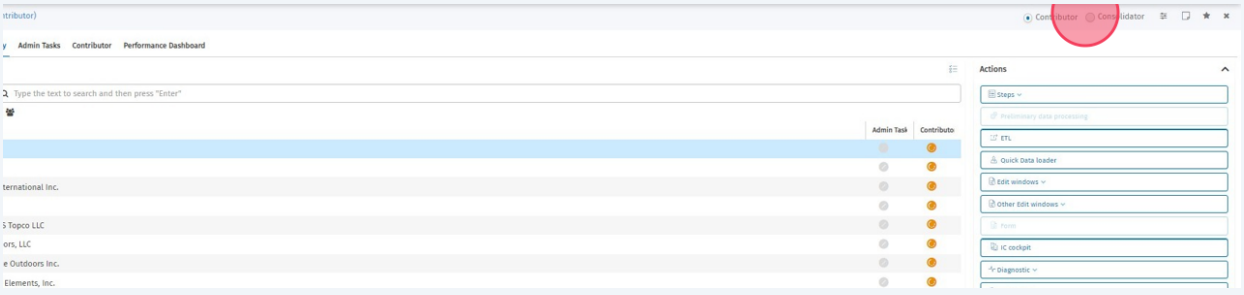

49 If there are no errors, the following message will appear when the carry forward is completed.

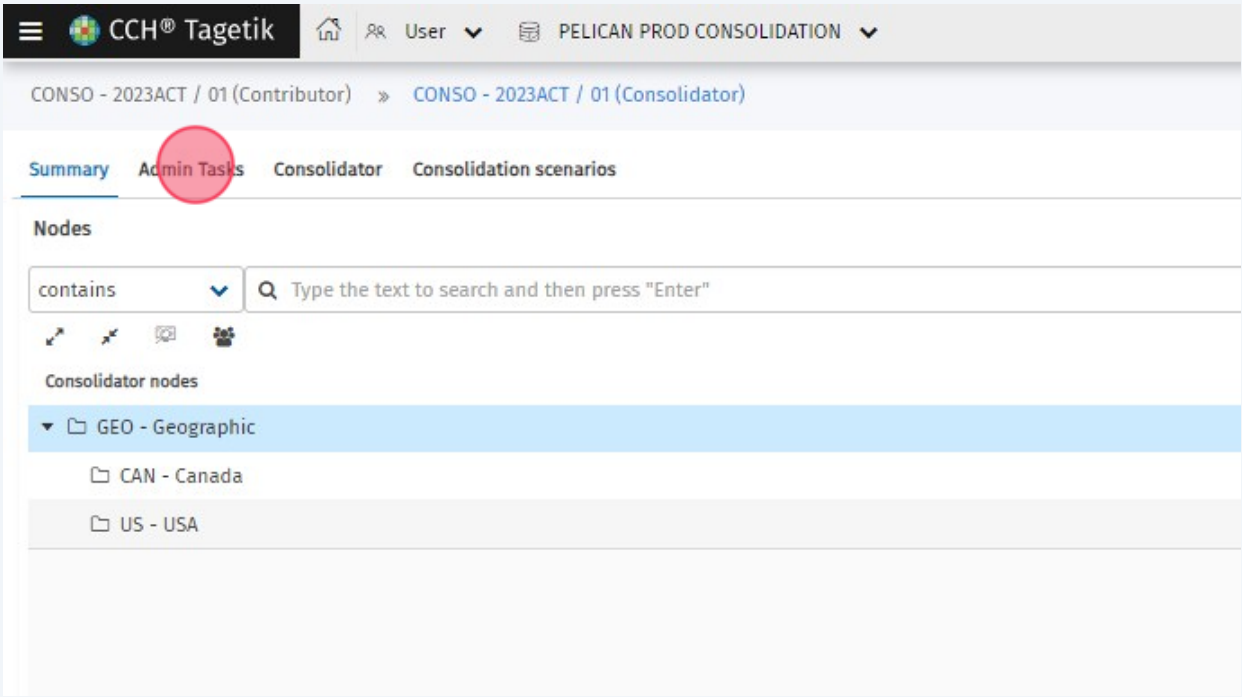

The Carry Forward is also added to the admin task workflows.

50 In the process, Click "Consolidator"

51 Click "Admin Tasks"

52 Identify "Run Carry Forward" on either the original or consolidation scenario. Click "Run"
